Anticapitalism A Beginners Guide:

Anti-capitalism Simon Tormey, 2004 Anticapitalism and Culture Jeremy Gilbert, 2008-10-15 What does anticapitalism really mean for the politics and culture of the twenty first century Anticapitalism is an idea which despite going global remains rooted in the local persisting as a loose collection of grassroots movements and actions Anti capitalism needs to develop a coherent and cohering philosophy something which cultural theory and the intellectual legacy of the New Left can help to provide notably through the work of key radical thinkers such as Ernesto Laclau Stuart Hall Antonio Negri Gilles Deleuze and Judith Butler Anticapitalism and Culture argues that there is a strong relationship between the radical tradition of cultural studies and the new political movements which try to resist corporate globalization Indeed the two need each other whilst theory can shape and direct the huge diversity of anticapitalist activism the energy and sheer political engagement of the anticapitalist movement can breathe new life into cultural studies **Anti-capitalism** Simon Tormey, 2013-06-01 Every aspect of the anti capitalist world is covered in this helpful guide from WOMBLES to Zapatistas NGOs to environmentalism Paris 1968 to Seattle and beyond Picking up where Naomi Klein left off this is not so much a manifesto as a roadmap which captures the essence of the movement and also articulates a range of possibilities for future alternatives to the corporate domination of our planet **Social Movements: The Key Concepts** Graeme Chesters, Ian Welsh, 2010-10-04 Social Movements The Key Concepts provides an insightful contemporary introduction to some of the frequently encountered terms and groups that are central to the study of collective action and social and political activism Following an A Z format the entries defined and discussed are drawn from the following areas the old social movements of the nineteenth century the new social movements of the 1960s and 1970s the rise of contemporary network movements Key American European and global social movements are addressed with each entry related to contemporary developments and emergent tendencies within the field Including helpful references for further study this concise and up to date guide is of relevance for those studying a range of disciplines including sociology politics cultural studies and human geography **For an Anti-capitalist Psychology of Community** Nick Malherbe, 2022-04-22 Anti capitalist political struggle is a site of struggling psychologies Conscious political action is never far from unconscious desire and the fight for material justice is always also the fight for dignity and psychological well being Yet how might community psychologists conceive of their discipline in a way that opposes the very capitalist political economy that historically most of the psy disciplines have bolstered in return for disciplinary legitimacy In its consideration of an anti capitalist psychology of community this book does not ignore or try to resolve the contradictory position of such a psychology Instead it draws on these contradictions to enliven psychology to the shifting demands both creative and destructive of a community centred anti capitalism Using practical examples the book deals with the psychological components of building community centred social movements that challenge neoliberal capitalism as a political system an ideology and a mode of governing rationality The book also offers

several theoretical contributions that grapple with how an anti capitalist psychology of community can remain attentive to the psychological elements of anti capitalist struggle what the psychological can tell us about anti capitalist politics and how these politics can shape the psychological

Gramsci, Political Economy, and International Relations Theory A. Ayers, 2008-11-10 This book seeks to provide the most comprehensive and sustained engagement and critique of neo Gramscian analyses available in the literature In examining neo Gramscian analyses in IR IPE the book engages with two fundamental concerns in international relations i The question of historicity and ii The analysis of radical transformation

Routledge Handbook of Identity Studies Anthony Elliott, 2012-04-27 The Routledge Handbook of Identity Studies offers an exceptionally clear overview of the analysis of identity in the social sciences and in so doing seeks to develop a new agenda for identity studies in the twenty first century The key theories of identity ranging from classical accounts to postmodern psychoanalytic and feminist approaches are drawn together and critically appraised and there are substantive sections looking at racial ethnic gendered queer consumerist virtual and global identities The Handbook also makes an essential contribution to the debate now opening up over identity politics and its cultural consequences From anti globalization protestors to new ecological warriors from devotees of therapy culture to defenders of international human rights the culture of identity politics is fast redefining the public political sphere What future for politics is there after the turn to identity Throughout there is a strong emphasis on interdisciplinarity with essays covering sociology psychology politics cultural studies and history The Handbook s clear and direct style will appeal to a wide undergraduate audience in the social sciences and humanities

History Made Conscious Geoff Eley, 2023-08-22 How History has changed in the half century since the 1960s During the last fifty years the writing of history underwent two massive transformations First powered by Marxism and other materialist sociologies the great social history wave instated the value of social explanation Then responding to new theoretical debates the cultural turn upset many of those freshly earned certainties Each challenge was profoundly informed by politics from issues of class gender and race to those of identity empire and the postcolonial The resulting controversies brought historians radically changed possibilities expanding subject matters unfamiliar approaches greater openness to theory and other disciplines a new place in the public culture History Made Conscious offers snapshots of a

discipline continuously rethinking its charge How might we understand the social and the cultural together How do we collaborate most fruitfully across disciplines If we take theory seriously how does that change what historians do How should we think differently about politics

Anthropology, Ecology, and Anarchism Brian Morris, 2015-01-01 Over the course of a long career Brian Morris has created an impressive body of engaging and insightful writings from social anthropology and ethnography to politics history and philosophy that have made these subjects accessible to the layperson without sacrificing analytical rigor But until now the essays collected here originally published in obscure journals and political magazines have been largely unavailable to the broad readership to which they are so naturally suited The opposite of arcane specialized writing Morris's work takes an interdisciplinary approach that moves seamlessly

among topics offering up coherent and practical connections between his various scholarly interests and his deeply held commitment to anarchist politics and thought. Approached in this way, anthropology and ecology are largely untapped veins whose relevance for anarchism and other traditions of social thought have only recently begun to be explored and debated. But there is a long history of anarchist writers drawing upon works in those related fields. Morris's essays both explore past connections and suggest ways that broad currents of anarchist thought will have new and ever-emerging relevance for anthropology and many other ways of understanding social relationships. His writings avoid the constraints of dogma and reach across an impressive array of topics to give readers a lucid orientation within these traditions and point to new ways to confront common challenges.

Social Movements and Protest Politics Greg Martin, 2023-12-22. This fully revised and updated edition of *Social Movements and Protest Politics* provides interdisciplinary perspectives on the sociology of protest movements. It considers major theories and concepts which are presented in a clear, accessible and engaging format. The second edition contains new chapters on methods and ethics of social movement research and legal mobilisation, protest policing and criminal justice activism, including calls to abolish or defund police made at protests during the COVID-19 pandemic. This edition introduces readers to the concept of the post-protest society wherein the right to protest is whittled away to near-vanishing point and authorities have considerable legal recourse to ban protests and render the tactics of protest movements ineffective. The book also looks at recent developments and novel social movements including Black Lives Matter, Extinction Rebellion, Gilets Jaunes, MeToo and Hong Kong's Umbrella Movement, as well as the rise of contemporary forms of populism in democratic societies. The book presents specific chapters outlining the early origins of social movement studies and more recent theoretical and conceptual developments. It considers key ideas from resource mobilisation theory, the political process model and new social movement approaches. It provides extensive commentary on the role of culture in social protest, including visual images, emotions, storytelling, music and sport, religious movements, geography and struggles over space, media and movements, and global activism. Historical and contemporary case studies and examples from a variety of countries are provided throughout, including the American civil rights movement, Greenpeace, Pussy Riot, Indigenous peoples' movements, liberation theology, Indignados, Occupy, Tea Party and Arab Spring. Each chapter also contains illustrations and boxed case studies to demonstrate the issues under discussion. *Social Movements and Protest Politics* will be an indispensable resource for undergraduate and postgraduate students in the social sciences and humanities wanting to be introduced to or extend their knowledge of the field. The book will also prove useful to university teachers and academic researchers, activists and practitioners interested in the study of social, cultural and political protest.

The Resources of Critique Alex Callinicos, 2006-04-17. Social criticism has enjoyed a renaissance in the past few years. The anti-globalization protests at Seattle and Genoa and the great marches against the war in Iraq have put contestation of capitalism and imperialism back on the political and intellectual agenda. But how does social critique situate itself philosophically today after

the marginalization of Marxism and the impact of postmodernism In *The Resources of Critique* Alex Callinicos seeks to address this question systematically He does so in the first part by surveying some of the most influential contemporary critical theorists Alain Badiou Jacques Bidet Luc Boltanski Pierre Bourdieu Eve Chiapello Jürgen Habermas Antonio Negri and Slavoj Žižek The limitations of all these theorists perspectives prompts Callinicos in the second part of the book to outline an alternative approach whose main elements are a critical realist ontology a Marxist theory of social contradiction and an egalitarian conception of justice The main thrust of his argument is to show that Marx's critique of political economy remains inescapable for anyone seeking to challenge the existing world order but only if it maintains an open but rigorous dialogue with other critical perspectives *The Resources of Critique* is above all a contribution to this dialogue *Democracy* David Beetham, 2005-04 Designed for the activist the student and the simply curious this book features such useful resources as an annotated list of websites and organisations and a glossary of key terms As both a handbook and a manifesto it offers new directions for a modern democracy based on freedom equality and active participation at every level of society Jacket

Religion in the Neoliberal Age François Gauthier, 2016-04-08 This book together with a complementary volume *Religion in Consumer Society* focuses on religion neoliberalism and consumer society offering an overview of an emerging field of research in the study of contemporary religion Claiming that we are entering a new phase of state religion relations the editors examine how this is historically anchored in modernity but affected by neoliberalization and globalization of society and social life Seemingly distant developments such as marketization and commoditization of religion as well as legalization and securitization of social conflicts are transforming historical expressions of religion and religiosity yet these changes are seldom if ever understood as forming a coherent structured and systemic ensemble *Religion in the Neoliberal Age* includes an extensive introduction framing the research area and linking it to existing scholarship before looking at four key issues 1 How changes in state structures have empowered new modes of religious activity in welfare production and the delivery of a range of state services 2 How are religion state relations transforming under the pressures of globalization and neoliberalism 3 How historical churches and their administrations are undergoing change due to structural changes in society and what new forms of religious body are emerging 4 How have law and security become new areas for solving religious conflicts Outlining changes in both the political institutional and cultural spheres the contributors offer an international overview of developments in different countries and state of the art representation of religion in the new global political economy **Schooling for Sustainable Development in Canada and the United States** Rosalyn

McKeown, Victor Nolet, 2012-07-26 Education for sustainable development ESD presents an intriguing challenge in developed countries The very notion of sustainable development may appear to be at cross purposes with the social and political aims of large industrial economies Yet arguably the residents of wealthy countries may be most in need of new ways of thinking and behaving on an increasingly more fragile and crowded planet This book presents a collection of essays that capture the depth

and diversity of education for sustainable development ESD work in formal education in Canada and the United States Many of the authors are pioneers in the field of ESD not only in their own countries but internationally In this book they share their expertise lessons learned and insights into the ongoing success of their work The essays reflect leading edge practice innovation and depth of experience and provide clear models and strategies for expanding the application and influence of ESD in wealthy countries The ESD programs described in the book are relevant and culturally appropriate for the specific locally contexts in which they are found but also in the larger context of ESD writ large as a planetary endeavour **Global**

Outrage Peter N. Stearns, 2005 In *Almost Free* Eva Sheppard Wolf uses the story of Samuel Johnson a free black man from Virginia attempting to free his family to add detail and depth to our understanding of the lives of free blacks in the South There were several paths to freedom for slaves each of them difficult After ten years of elaborate dealings and negotiations Johnson earned manumission in August 1812 An illiterate mulatto who had worked at the tavern in Warrenton as a slave Johnson as a freeman was an anomaly since free blacks made up only 3 percent of Virginia's population Johnson stayed in Fauquier County and managed to buy his enslaved family but the law of the time required that they leave Virginia if Johnson freed them Johnson opted to stay Because slaves marriages had no legal standing Johnson was not legally married to his enslaved wife and in the event of his death his family would be sold to new owners Johnson's story dramatically illustrates the many harsh realities and cruel ironies faced by blacks in a society hostile to their freedom Wolf argues that despite the many obstacles Johnson and others faced race relations were more flexible during the early American republic than is commonly believed It could actually be easier for a free black man to earn the favor of elite whites than it would be for blacks in general in the post Reconstruction South Wolf demonstrates the ways in which race was constructed by individuals in their day to day interactions arguing that racial status was not simply a legal fact but a fluid and changeable condition *Almost Free* looks beyond the majority experience focusing on those at society's edges to gain a deeper understanding of the meaning of freedom in the slaveholding South A Sarah Mills Hodge Fund Publication **Spaces of Contention** Byron

Miller, 2016-04-01 As social movements have become more complex geographers are increasingly studying the spatial dynamics of collective resistance and sociologists and political scientists increasingly analyzing the role of space place and scale in contentious political activity Occupying a position at the intersection of these disciplinary developments this book brings together leading scholars to examine how social movements have employed spatial practices to respond to and shape changing social and political contexts It is organised into three main sections 1 Place Space and Mobility sites of mobilization and regulation 2 Scale and Territory structuring collective interests identities and resources and 3 Networks connecting actors and resources across space It concludes by suggesting that different spatialities place scale networks interlink within one another in particular instances of collective action playing distinctive yet complementary roles in shaping how these actions unfold in the political arena By mapping state of the art conceptual and empirical terrain across Geography Sociology

and Political Science Spaces of Contention provides readers with a much needed guide to innovative research on the spatial constitution of social movements and how social movements tactically and strategically approach and produce space
