Anticipatory Adaptive Europeanization:

Anticipatory and Adaptive Europeanization of Hungary Attila Ágh, 2011-11-14 **Enlargement of the European Union** Allan F. Tatham, 2009-01-01

The development of EU enlargement has raised many thorny issues unanticipated by the framers of the EC Treaty. A significant upshot of these issues is that the concept of European identity defined in terms of such factors as culture, history and economics has supplanted the long dominant theme of widening and deepening, particularly since the Union's expansion has become primarily eastward. The major contribution of this important book lies in its analysis of the conceptualization and perception of enlargement from various points of view, focusing on the concerns of stakeholders and the identity conflicts and uncertainties incurred by enlargement initiatives. In the course of its presentation, it details the actual pre-accession Europeanization process and its complex history. Among the key elements discussed are the following: the conflict between widening and deepening and the effect on EU institutional reform; institutional requirements on candidate countries; pre-accession criteria and negotiations; administrative capacity; judicial capacity; and legal approximation in accession states; capacity of the EU to absorb new Member States; and EC law as part of European identity. Also covered are specific historical details of particular pre-accession negotiations, e.g. Greece, Spain, Portugal, Malta, and Cyprus; the still inconclusive negotiations with Turkey; and the Western Balkan states; and political factors involved in the non-accession of Norway, Iceland, and Switzerland. Assembling powerful evidence and applying incisive analysis, the author's conclusion shows that, absent further and major EU institutional reform, it will be difficult for an enlarging Union to continue to deliver the goods. A watershed in the continuing great debate on the fulfilment of the EC Treaty's determination to foster and promote an ever closer union of the peoples of Europe, this book will prove invaluable to anybody interested in the European integration project, particularly lawyers, academics, officials, and policymakers in the EU Member States.

Anticipatory and Adaptive Europeanization in Hungary Attila Ágh, 2003 *Malta in the European Union* Mark Harwood, 2016-05-13

Malta has bucked the trend of its EU Mediterranean neighbours in many ways. This smallest of EU states barely dipped into recession during the global financial crisis and remains a stable member of the Eurozone whilst also having one of the lowest infringement rates and highest transposition of EU law records amongst the 28 member states. Providing the first comprehensive study of Malta's complex road to EU membership, this book looks at the impact of membership on the country's political structures and processes and explains the principal factors that have conditioned the country's Europeanization experience. Reflecting Malta's unique and often contentious road to membership, the book explores the historical context and outlines how Maltese processes and policies have changed since membership and whether a causative link exists between these changes and Malta's membership of the

EU A wide range of primary and secondary sources facilitate the study complemented by a series of interviews with a broad range of Malta's political and social actors as well as individuals from EU institutions This depth of analysis enables a holistic view of Malta's first decade of EU membership and helps establish the fundamental characteristics of Malta's unique Europeanization experience

The Routledge Handbook to Regional Development in Central and Eastern Europe Gábor Lux, Gyula Horváth, 2017-07-06 Twenty five years into transformation Central and Eastern European regions have undergone substantial socio economic restructuring integrating into European and global networks and producing new patterns of regional

Limits to Democratic Constitutionalism in Central and Eastern Europe Bogusia Puchalska, 2016-05-06 In this book Bogusia Puchalska develops an original theory of democratic constitutionalism and uses it to support the argument that constitution making and law making in constitutional moments should be politically and not just constitutionally legitimate In doing so she expertly assesses the potential implications of the prospects of democratic consolidation and constitutionalism in Poland after 1989 and asks whether it is likely to be applicable to other transition countries such as Hungary Czech Republic and Slovakia This original and informative book should be read by all curious to understand how the democratic learning and the foundations of grass root constitutionalism might have been damaged in post communist countries

Globalization and Social Stress Grzegorz W. Kołodko, 2005 Globalisation like no other term has gained in recent years a prominent position in nearly all branches of social science Consequently its definitions abound also in economics a discipline to which it has a special relevance In economic terms Globalisation is the historical process of gradual yet persistent liberalisation followed by the coalescence of the hitherto

largely fragmented markets of goods capital and labour into a single global market The concurrent regional integration processes should by no means be seen as a trend opposed to Globalisation which they may even facilitate in some circumstances by moving integration to a higher level from that of national economics up to that of international organisations for instance the EU integrating with NAFTA ASEAN with CIS or Mercosur with Caricom Thus defined Globalisation depends on a variety of circumstances and has numerous implications It is an extremely dynamic and complex process which therefore allows of no unambiguous assessment Globalisation is an irreversible process although as the experience of the last two or three years has shown its progress can be significantly impeded in the short run by various kinds of political and economic shocks So the idea is to follow an enlightened and wise development strategy and a well co ordinated policy in this case on the international and global scale that would minimise the attendant problems and eliminate as far as possible the concomitant social stress How to achieve this goal is the question the authors address in this volume
