Asian International Waters Asit K. Biswas, Tsuyoshi Hashimoto, 1996 Papers presented at the Asian Water Forum on International Waters held in Bangkok Thailand 30 Jan 1 Feb 1995 *Management of Transboundary Rivers and Lakes* Olli Varis, Cecilia Tortajada, Asit K. Biswas, 2008-03-15 Transboundary rivers and lakes are often the remaining new sources of water that can be developed for human uses These water sources were not used in the past because of the many complexities involved Written and edited by the world's leading water and legal experts this unique and authoritative book analyses the magnitudes of the transboundary water problems in different parts of the world It also examines difficulties and constraints faced to resolve these problems Bridges Over Water: Understanding Transboundary Water Conflict, Negotiation And Cooperation Ariel Dinar, Shlomi Dinar, Daene C Mckinney, Stephen C Mccaffrey, 2007-10-22 Latest Edition Bridges Over Water Understanding Transboundary Water Conflict Negotiation and Cooperation 2nd Edition Bridges over Water places the study of transboundary water conflicts negotiation and cooperation in the context of various disciplines such as international relations international law international negotiations and economics analyzing them using various quantitative approaches such as river basin modeling and game theory Case studies of particular transboundary river basins lakes and aquifers are also considered This is the first textbook for a relatively recent yet rapidly expanding field of study Errata s Errata

Bridges Over Water: Understanding Transboundary Water Conflict, Negotiation And Cooperation (Second Edition) Ariel Dinar, Shlomi Dinar, Daene C Mckinney, Stephen C Mccaffrey, 2013-02-21 Bridges over Water places the study of transboundary water conflicts negotiation and cooperation in the context of various disciplines such as international relations international law international negotiations and economics It demonstrates their application using various quantitative approaches such as river basin modeling quantitative negotiation theory and game theory Case studies of particular transboundary river basins lakes and aquifers are also considered This second edition updates the literature on international water and in depth analyses on political developments and cooperation between riparian states With an appended chapter on principles and practices of negotiation and a new case study on the La Plata Basin this edition is a timely update to the field of transboundary water studies *International Water Treaties* Shlomi Dinar, 2007-12-13 As demand for fresh water rises together with population water scarcity already features on the national security agenda of many countries In this book Dinar develops a theory to explain solutions to property rights conflicts over shared rivers Through systematic analysis of available treaty texts corresponding side payment and cost sharing patterns are gleaned Geographic and economic variables are used to explain recurring property rights outcomes Rather than focusing on a specific river or particular geographic region the book analyzes numerous rivers dictated by the large number of treaty observations and is able to test several hypotheses devising general conclusions about the manner in which states resolve their water disputes Policy implications are thereby also gained While the book simultaneously considers conflict and

cooperation along international rivers it is the focus on negotiated agreements and their embodied side payment and cost sharing regimes that justifies the use of particular independent variables

Managing Transboundary Waters of Latin America Asit Biswas, 2013-09-13 Definitive analyses of transboundary water management in Latin America are conspicuous by their absence The situation is a little better for rivers compared to groundwater resources Transboundary water management in Latin America has been evolving in a somewhat different manner compared to other continents The book includes eight authoritative case studies of Latin American transboundary rivers and aquifers as well as a thinkpiece on the complexities of managing aquifers based on global experiences The case studies are of different scales ranging from the mighty Amazon to small Silala The overall focus of the book is on ways in which such difficult and complex rivers and aquifers that are shared by two or more countries can be managed efficiently and equitably and on the lessons both positive and negative that other regions can learn from the Latin American experience This book was published as a special issue of the International Journal of Water Resources Development

Transboundary Water Politics in the Developing World Naho Mirumachi, 2015-03-05 This book examines the political economy that governs the management of international transboundary river basins in the developing world These shared rivers are the setting for irrigation hydropower and flood management projects as well as water transfer schemes Often these projects attempt to engineer the river basin with deep political socio economic and environmental implications The politics of transboundary river basin management sheds light on the challenges concerning sustainable development water allocation and utilization between sovereign states Advancing conceptual thinking beyond simplistic analyses of river basins in conflict or cooperation the author proposes a new analytical framework The Transboundary Waters Interaction NexuS TWINS examines the coexistence of conflict and cooperation in riparian interaction This framework highlights the importance of power relations between basin states that determine negotiation processes and institutions of water resources management The analysis illustrates the way river basin management is framed by powerful elite decision makers combined with geopolitical factors and geographical imaginations In addition the book explains how national development strategies and water resources demands have a significant role in shaping the intensities of conflict and cooperation at the international level The book draws on detailed case studies from the Ganges River basin in South Asia the Orange Senqu River basin in Southern Africa and the Mekong River basin in Southeast Asia providing key insights on equity and power asymmetry applicable to other basins in the developing world
