Law and Legal Institutions of Asia E. Ann Black, Gary F. Bell, 2011-03-10 The study of Asia and its plural legal systems is of increasing significance both within and outside Asia Lawyers whether in Australia America or Europe or working within an Asian jurisdiction require a sound knowledge of how the law operates across this fast growing and diverse region Law and Legal Institutions of Asia is the first book to offer a comprehensive assessment of eleven key jurisdictions in Asia China Hong Kong Taiwan Japan Korea Vietnam Malaysia Indonesia Brunei Darussalam Singapore and the Philippines Written by academics and practitioners with particular expertise in their state or territory each chapter uses a breakthrough approach facilitating cross jurisdictional comparisons and giving essential insights into how law functions in different ways across the region and in each of the individual jurisdictions The Asian Pacific American Journal ,1999 Asia-Pacific Population Journal ,2005 *Asia and the Drafting of the Universal Declaration of Human Rights* Robin Ramcharan, Bertrand Ramcharan, 2018-11-19 This is the first book that explicitly outlines Asian contributions to the elaboration of universal human rights values that were proclaimed in the Universal Declaration of Human Rights of 1948 Evidence of Asia's contribution from the historical records of the Commission on Human Rights 1946 to 1948 profoundly refutes any remnants of the relativist Asian values discourse Asians shaped the new humanism of the UDHR and the universal values that they also brought to bear on the drafting of this document The book brings this evidence into focus in order to enter them into contemporary human rights discourse in Asia The book coincides with the 70th anniversary 2018 of the UDHR and contributes to the ongoing global dialogue between states and societies in the development of human rights norms At this time the elucidation of the Asian contribution in this work is part of this dialogue **Indices and Indicators in Development** Stephen Morse, 2013 The use of numbers to condense complex systems into easily digested bites of information is very much in fashion At one level they are intended to enhance transparency accountability and local democracy while at another they provide a means of enhancing performance However all indicators suffer from the same basic problem that ironically is also their biggest advantage condensing something highly complex into a few simple numbers Love them or hate them there is no denying that people use indicators to make decisions Indices and Indicators explores the use of indicators within the field of human development Part I provides a brief outline of the contested meaning of development and how indices and indicators have been used as means of testing the realization of these development visions in practice in a range of institutional contexts Part II discusses the limitations of such indices and indicators and illustrates how they are dependent upon the vision of development adopted The book also suggests how indices and indicators can best be employed and presented Given our overwhelming reliance on indices and indicators for measuring progress directing policy and allocating resources this book is essential core reading for academics undergraduate and post graduate students in social science economics geography and development studies as well as development practitioners policy makers and

There is a pre-publication price on this title; the price rises to 150 three months after publication **The Development of Jury Service in Japan** Anna Dobrovolskaia, 2016-08-19 This book presents a comprehensive account of past and present efforts to introduce the jury system in Japan. Four legal reforms are documented and assessed: the implementation of the bureaucratic and all-judge special jury systems in the 1870s; the introduction of the all-layperson jury in the late 1920s; the transplantation of the Anglo-American style jury system to Okinawa under the U.S. Occupation; and the implementation of the mixed court lay judge saiban-in system in 2009. While being primarily interested in the related case studies, the book also discusses the instances when the idea of introducing trial by jury was rejected at different times in Japan's history. Why does legal reform happen? What are the determinants of success and failure of a reform effort? What are the prospects of the saiban-in system to function effectively in Japan? This book offers important insights on the questions that lie at the core of the law and society debate and are highly relevant for understanding contemporary Japan and its recent and distant past *America's Challenge* Michael D. Swaine, 2012-05-01 The emergence of the People's Republic of China on the world scene constitutes the most significant event in world politics since the end of World War II. As the world's predominant political, economic and military power, the United States faces a particularly significant challenge in responding to China's rising power and influence, especially in Asia. Offering a fresh perspective on current and future U.S. policy toward China, Michael Swaine examines the basic interests and beliefs behind U.S. China relations, recent U.S. and Chinese policy practices in seven key areas, and future trends most likely to affect U.S. policy. American leaders, he concludes, must reexamine certain basic

assumptions and approaches regarding America's position in the Western Pacific integrate China policy more effectively into a broader Asian strategy and recalibrate the U S balance between cooperative engagement and deterrence toward Beijing

Internationalization of Higher Education in East Asia Ka-Ho Mok, Kar Ming Yu, 2013-11-12 The rise in demand for higher education in the Asia Pacific region is an undeniable reflection of the growing pace of globalization and the subsequent pressures imposed by it. Aspiring to become globally competitive and to position favourably in the global university league tables, governments in Asia have either engaged in a serious quest to become a regional education hub or they have concentrated on developing transnational higher education to create more opportunities in order to meet their citizens' pressing demand for higher education. *Internationalization of Higher Education in East Asia* critically examines and provides comparative perspectives on the major strategies that selected Asian countries and societies have adopted to transform their higher education sector and enhance their national competitiveness in the increasingly globalized world. This volume by leading scholars in the field of education development and policy studies makes critical reflections on how Asian governments in particular and universities in general have responded to the growing challenges of globalization by promoting more internationalization, student mobility and entrepreneurship in higher education. This book is an essential collection for policy makers, researchers and postgraduate students studying higher education, Asian education and international education.

Beyond Demographic Dividends Fang Cai, 2014 This book presents empirical observations and theoretical thinking of the fundamental changes in the Chinese economy. It starts with a warning of the arrival of the Lewis Turning Point, which is empirically proven by disappearance of surplus labor force and a rapid increase in wages of unskilled workers. It further reveals that China's rapid population aging trend is diminishing the demographic dividend that has kept China's economic growth rate high. Subsequently, it touches upon employment challenges that arise after reaching the Lewis Turning Point, further propelling urbanization, a balanced regional development and so on. Finally, it introduces the middle income trap, which is one of the biggest challenges China is facing, followed by recommendation of policies for the Chinese government to tackle the challenges ahead. This book should be of great interest to graduates, undergraduates, researchers and specialists who follow closely the economic development and demographic transition of China, the world's most populous country.

China's New Imperialism Yu-Ping Chang,2023-02-14 This book discusses the nature of China s current international reassertion of itself and the thinking and attitudes which lie behind it It argues that the Chinese leadership has a strongly held view of its own high moral authority which emphasizes inclusion equality and mutual benefits and that this sense of morality underpins the driving forces for China s foreign policies rationalization of China s overseas activities the overall Chinese worldview and China s vision of a Chinese world order It highlights how the country s outward expansion has been characterized mainly by spreading influence through non use of force and strategies of co operation and managed conflict under the umbrella of winning without fighting A set of Chinese geo strategic reasoning that addresses how the possession of capabilities in land power and sea power will interact to produce favorable balance of power corresponds to the country s pattern of overseas activities The book approaches the subject empirically based on original research into both writings for policy making purposes which indicate realistic assessments of world politics and of China s international capacity and also narratives for public consumption which have less emphasis on selfinterest and realpolitik The book concludes that Beijing s self privileging high morality might have the unfortunate consequence of reinforcing its own behavior which defies international order and which others disapprove of thereby increasing the likelihood of non armed and armed conflicts

Southeast Asian-centred Economies Or Economics? Mason C. Hoadley,1999 This book is not a definitive research statement nor yet another account of Asia s financial crisis Rather it offers Southeast Asian perspectives quite at variance to orthodox Western economic thinking Topics range from macro perspectives of Indonesia s Ekonomi Pancasila and Thailand s Buddhist Economics through Malaysia s Islamic financial institutions to regional and international perspectives of the remaining ASEAN countries and the IMF World Bank all tied up by setting them within a diachronic historical framework In so doing this volume looks to open up challenging and provocative fields of research essential for a real understanding of Southeast Asia and its current economic situation BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved
