Activity 3 – Personal Reflection on Pregnancy

Name: Jayme, Cherry Lou S.

Date: September 29, 2022

As I was watching all the videos provided with regards to pregnancy, I couldn't help myself but be amazed at how amazing our bodies are. There's a lot of complex mechanisms and processes that undergo on producing an offspring. Everything is working in synchronous harmony together. From the changes of our body while we're pregnant, to the discomforts that we feel, the Do's and Don'ts on Pregnancy, as well as the food we eat. It's almost an unfathomable fact that we, women, are capable of enduring that.

In retrospect, I also noticed how everyone is feeling ecstatic, especially about having a baby. Even the narrator on the video was very joyful as she was explaining things about pregnancy as well. I had certain encounters with women that seemed like their pregnancies were the best thing that ever happened to them, which is why, I couldn't help but wonder if I would also feel the same way if such a situation happened to me in the near future.

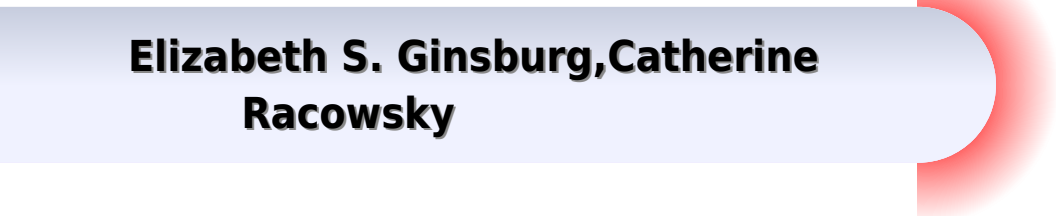

Throughout the past years, teenage pregnancy has been prevalent and even young women are celebrating it. I have no intention of putting a negative connotation in this one but with regard to teenage pregnancy, I just think it is something we should not normalize. Having a baby is a lifetime responsibility and it sure is not easy to look after one especially if we are still not capable of providing. I have no problem with women that are openly celebrating their motherhood, in fact, it actually makes me feel really proud that they are strong enough to enter such a milestone in life.

Pregnancy is something really beautiful and sometimes serves as the essence of womanhood. Nonetheless, I am a bit fixated on the notion of me not wanting a baby. I don't have anything against having one, it's just a personal reason of mine. I actually felt alienated before as to why I think this way when the majority of women think otherwise. But, I also wouldn't want to invalidate myself and I don't want to just conform to what the society is telling me what to do.

In conclusion, I do believe Pregnancy empowers women and it may serve as one of their sole purpose for living but I also think Bodily Autonomy is really important too. Just because a woman prefers not to have a baby, doesn't make her less of a woman herself.

Aspect Ethiq De Repro Hum:

Scientific and Medical Aspects of Human Reproductive Cloning National Research Council, Division on Earth and Life Studies, Board on Life Sciences, Policy and Global Affairs, Committee on Science, Engineering, and Public Policy, 2002-06-17 Human reproductive cloning is an assisted reproductive technology that would be carried out with the goal of creating a newborn genetically identical to another human being. It is currently the subject of much debate around the world involving a variety of ethical, religious, societal, scientific, and medical issues. *Scientific and Medical Aspects of Human Reproductive Cloning* considers the scientific and medical sides of this issue plus ethical issues that pertain to human subjects research. Based on experience with reproductive cloning in animals, the report concludes that human reproductive cloning would be dangerous for the woman, fetus, and newborn and is likely to fail. The study panel did not address the issue of whether human reproductive cloning, even if it were found to be medically safe, would be or would not be acceptable to individuals or society.

Case Studies in the Ethics of Assisted Reproduction Louise P. King, Isabelle C. Band, 2023-10-17 This book evaluates some of the most common ethical issues confronted by reproductive endocrinologists, embryologists, and their teams. The authors apply core ethical principles and approaches to problem solving to each of the cases raised. This work is a guide for both those on the front lines of patient care as well as for students in the field, whatever their background. By outlining sample cases, the book is an instigator for ethical discussions among ethicists, medical practitioners, and students.
