Jan K. E. E. Nuyts

Aspects Of A Cognitivepragmatic Theory Of Language:

Aspects of a Cognitive-Pragmatic Theory of Language Jan Nuyts, 1991-01-01 This book is about a theory of language that combines two observations 1 that language is based on an extensive cognitive infrastructure cognitivism and 2 that it is functional for its user functionalism These observations are regarded as two dimensions of one phenomenon that both need to be accounted for simultaneously and coherently in accounting for language Chapter 1 presents the cognitivist and functionalist points of view and their interrelation and discusses the integration of language research under a cognitive umbrella the issue of defining functions of language and the formalism functionalism debate Chapter 2 criticizes the Chomskyan formalist conception of language and cognition from the perspective of cognitive pragmatic theory The focus is on different aspects of the competence performance dichotomy and in particular on the nature of linguistic knowledge The ontogenesis and phylogenesis of language are also discussed Chapter 3 deals with the potential contribution of a functional linguistic grammar to an integrated conception of the cognitive systems of language viz Dik's Functional Grammar and introduces the concept of a Functional Procedural Grammar as a more integrative model for language production Special attention is also paid to the nature of conceptual knowledge and the relationship between language production and interpretation The debate is illustrated by an analysis of negative raising

Aspects of a Cognitive-pragmatic Language Theory Jan K. E. E. Nuyts, 1991 **Structure and Function □ A Guide to Three Major Structural-Functional Theories** Christopher S. Butler, 2003-06-30 This book and its companion volume present a detailed guide to three major structural functional theories Functional Grammar Role and Reference Grammar and Systemic Functional Grammar This first volume provides the necessary background through a discussion of the

characteristics of functional theories followed by a brief analysis of six approaches to language in the light of this discussion. These chapters lead to a characterization of a smaller set of structural functional grammars among which FG RRG and SFG are central. An overview of each of these theories in relation to the simplex clause is then presented followed by a more critical comparison. The remainder of the book deals with the structure and meaning of phrasal units, the representation of situations and the treatment of tense, aspect, modality and polarity across the three theories. A major feature of the book is the use of examples from corpora of English and other languages which serve not only to exemplify theoretical and descriptive claims but also at times to challenge them.

The ^AOxford Handbook of Cognitive Linguistics Dirk Geeraerts, Hubert Cuyckens, 2010-06-09 The Oxford Handbook of Cognitive Linguistics presents a comprehensive overview of the main theoretical concepts and descriptive theoretical models of Cognitive Linguistics and covers its various subfields, theoretical as well as applied.

The Japanese Sentence-final Particles in Talk-in-interaction Hideki Saigo, 2011 The Japanese sentence final particles *ne*, *yo* and *yone* have proved notoriously difficult to explain and are especially challenging for second language users. This book investigates the role of the particles in talk in interaction with the aim of providing a comprehensive understanding that accounts for their pragmatic properties and sequential functions and that provides a sound basis for second language pedagogy. This study starts by setting up an original particle function hypothesis based on the figure ground gestalt and then tests its validity empirically with unmarked, marked and native/non-native talk in interaction data. The analysis illustrates not only expectable but also unexpected or strategic use of particles as well as the problems posed for native speakers by non-native speakers whose use of particles is idiosyncratic. The study demonstrates that the proposed hypothesis is capable of accounting for all the uses of particles in the extensive and varied data set examined. This book will be of interest to students and scholars in pragmatics and CA and to teachers of Japanese as a foreign language.

Discourse Patterns in Spoken and Written Corpora Karin Aijmer, Anna-Brita Stenström, 2004-01-01 This book brings together a number of empirical studies that use corpora to study discourse patterns in speech and writing. It explores new trends in the area of text and discourse characterized by the alliance between text linguistics and areas such as corpus linguistics, genre analysis, literary stylistics and cross-linguistic studies. The contributions to the volume show how established corpora can be used to ask a number of new questions about the interface between speech and writing, the relation between grammar and discourse, academic discourse, cohesive markers, stylistic devices such as metaphor, deixis and non-verbal communication. The corpora used for text analysis can also be tailor-made for the study of particular genres such as journal article abstracts, lectures, e-mailing list messages, headlines and titles. A recent development is to bring in contrastive data from bilingual corpora to show what is language specific in the organization of the text.

Recontextualizing Context Anita Fetzer, 2004 In the humanities and social sciences, context is one of those terms which is frequently used and frequently referred to but hardly made explicit. This book proposes a model for describing the

multifaceted connectedness between language and language use and between cognitive context linguistic context social context and sociocultural context and their underlying principles of well formedness grammatical acceptability and appropriateness Combining a range of theoretical frameworks in linguistics pragmatics sociolinguistics discourse analysis and philosophy of language Fetzer goes beyond the unilateral conception of speech and argues for a dialogue outlook on natural language communication based on dialogue principles and dialogue categories The most important ones are cooperation joint production micro and macro communicative intentions micro and macro validity claims co-suppositions dialogue common ground and communicative genre Rethinking Sequentiality Anita Fetzer, Christiane Meierkord, 2002-01-01 This book addresses current approaches to sequentiality in pragmatics and discourse analysis It reflects the current moves in ethnomethodological conversation analysis and speech act theory to cross methodological borders to arrive at a conception of a sequence which extends the local notion of sequentiality by integrating further constitutive components such as cognition intentionality activity type culture and genre The individual contributions were presented at the 7th IPrA Conference held in Budapest in the year 2000 They range from critical analyses of speech act theory and cognitive pragmatics to detailed micro analyses of genre and activity specific constraints on the production and interpretation of meaning The first part sequences in theory and practice minimal and unbounded discusses the theoretical premises and exemplifies these by detailed data analyses The second part sequences in discourse the micro macro interface examines genre specific constraints on individual sequences and shows the benefits of supplementing the microanalytic concept of sequentiality with macroanalytic categories *Us and Others* Anna Duszak, 2002 A look at the various cognitive social and linguistic aspects of how social identities are constructed foregrounded and redefined in interaction Concepts and methodologies are taken from studies in language variation and change multilingualism conversation analysis genre analysis sociolinguistics critical discourse analysis as well as translation studies and applied linguistics *Function and Structure* Akio Kamio, Ken-ichi Takami, 1999 This collection of papers on functional syntax shows the development of a specific stream of functional linguistics initiated by Susumu Kuno of Harvard University Inspired by Prague School linguists such as Jan Firbas and Vilém Mathesius Kuno developed a more comprehensive and theory oriented approach and linked it with the American formalist approach of generative grammar His approach is thus a unique combination of functionalism and formalism that constantly urges the promotion of interactions between these two major trends in linguistics The papers in this collection coherently deal with functional aspects of linguistics from a wide variety of perspectives such as theoretical applicational experimental and diachronic aspects incorporating the functional concept advocated by Kuno **Diachronic Perspectives on Address Term Systems** Irma Taavitsainen, Andreas H. Jucker, 2003 Topics covered in this volume include the system of Czech bound address forms until 1700 Spanish forms of address in the 16th century and pronominal usage in Shakespeare **Framing and Perspectivising in Discourse** Titus Ensink, Christoph Sauer, 2003-01-01 In discourse verbal

messages are framed speakers offer cues on the basis of which hearers are able to anchor the verbal message to the context Furthermore speakers cannot contribute to the discourse without at the same time showing their view on the subject matter of the discourse the content of a discourse is necessarily displayed from a certain perspective Both the framing and perspectivising of verbal messages are not static but subject to possible changes during the development of the discourse Both concepts function at the intersection of a psychological cognitive and a social functional approach to discourse In this volume eight contributions are brought together which offer theoretical tools for describing and explaining framing and perspectivising devices in the production and comprehension of discourse and apply them to the analysis of several types of discourse such as political satire letters to the editor everyday narrations and newspaper reports **Discourse Constructions of Youth Identities** Jannis K. Androutsopoulos, Alexandra Georgakopoulou, 2003-01-01 This volume sets out to foreground the issues of youth identity in the context of current sociolinguistic and discourse research on identity construction Based on detailed empirical analyses the twelve chapters offer examinations of how youth identities from late childhood up to early twenties are locally constructed in text and talk The settings and types of social organization investigated range from private letters to graffiti from peer group talk to video clips from schoolyard to prison Comparably a wide range of languages is brought into focus including Danish German Greek Japanese and Turkish Drawing on various discourse analytic paradigms e g Critical Discourse Analysis Conversation Analysis the contributions examine and question notions with currency in the field such as young people s linguistic creativity and resistance to mainstream norms At the same time they demonstrate the embeddedness of constructions of youth identities in local activities and communities of practice where they interact with other social identities and factors in particular gender and ethnicity **Rethinking Communicative Interaction** Colin B. Grant, 2003-01-01 From government eavesdropping to Internet crime reality TV to computer mediated communication and mobile telephones the face of communication has fundamentally changed The contingencies and complexities of communication can be witnessed in old and new media in changing patterns of face to face interactions and the pluralization of the self and blurring of the distinction between the real and virtual To date theories of interaction have been slow to conceptualize communication in terms of its instabilities Social communication models remain heavily indebted to an interaction paradigm which is often intuitive epistemologically conservative and even a critical By contrast an interdisciplinary programme in communication covers a complex field which requires the broadest possible range of approaches beyond current disciplinary confines This collection seeks to examine some of the implications for our understanding of interaction when communication is conceptualized as a complex uncertainty **Getting Acquainted in Conversation** Jan Svennevig, 2000-02-15 What makes a getting acquainted a recognizable conversational activity and how are interpersonal relationships established in a first conversation This book presents a theoretical framework for the study of relationship management in conversation and an empirical study of a corpus of initial interactions It provides detailed

descriptions of the sequential resources unacquainted interlocutors use in order to generate self presentation introduce topics establish common contextual resources It is argued that these sequential patterns embody conventionalized procedures for establishing an interpersonal relationship involving some degree of solidarity mutual rights and obligations familiarity mutual knowledge of personal background mutual affect emotional commitment The sequential analysis is based on a conversation analytic approach while the interpretive framework consists of pragmatic theories of politeness conversational style and common ground

Represented Discourse, Resonance and Stance in Joking Interaction in Mexican Spanish Minerva Oropeza Escobar, 2011 The book provides a new angle for the study of otherwise amply discussed discourse and interactional phenomena The new perspective consists in addressing the interconnections between resonance stance represented discourse and joking in Mexican conversational discourse In so doing it contributes to a better understanding of the interplay between collaboration intersubjectivity and emergence among other relevant issues Scholars and advanced students concerned with dialogic syntax theory stance theory and Spanish will find the present analysis interesting and innovative However the writing and methodology based on clearly discussed and presented examples from selected conversational excerpts including graphic representations of linguistic and discourse data makes the analysis easy to follow also to non specialists The book is thus interesting to a broad circle of readers whether they are concerned with any of the issues dealt with or with their mutual connections whether they are specialists or not

Gender in Interaction Bettina Baron, Helga Kotthoff, 2002-04-12 In this volume gender is seen as a communicative achievement and as a social category interacting with other social parameters such as age status prestige institutional and ethnic frameworks cultural and situative contexts The authors come from a variety of backgrounds such as sociology of communication anthropological linguistics sociolinguistics social psychology and text linguistics Masculinity and femininity are conceived of as varying culturally historically and contextually All contributions discuss empirical research of communication and the question of whether and how gender is a salient variable in discourse So one aim of the book is to trace the varying relevance of gender in interaction Emotion politics ideology body concepts and speech styles are related to ethnographic description of the contexts within which communication takes place These contexts range from private to public communication and from mixed sex to same sex conversations framed by different cultural backgrounds Australian German Georgian Turkish US American

Sell,2000-01-01 This book offers foundations for a literary criticism which seeks to mediate between writers and readers belonging to different historical periods or social groupings This makes it among other things a timely intervention in the postmodern culture wars though the theory put forward will be of interest not only to students of literature and culture but also to linguists Sell describes communication in general as strongly interactive as very much affected by the disparate situationalities of sending and receiving yet as by no means completely determined by them Seen this way men and women are both social beings and individuals capable of empathizing with sociohistorical formations which are alien to them sometimes even to the extent of changing their own life world By treating literary activity as communicational in this same dynamic sense Sell radically modifies the main paradigms of twentieth century literary theory casting much new light on questions of genre interpretation affect and ethics
