Service Engineering for Gastronomic Sciences Takeshi Shimmura, Tomomi Nonaka, Satomi Kunieda, 2020-06-23 This pioneering book on food study pursues an interdisciplinary approach to service science and the service engineering field Further it highlights a range of experiments conducted at actual business sites to

verify the effectiveness of the proposed methodologies and theories In modern society food study has become more complex as it involves multiple fields of science For instance a long lived society entails a number of problems for human beings A balanced intake of nutrients is important for a healthy life but in many cases healthy food is not the most enjoyable As such it is important for the food industry to provide foods that are both tasty and wholesome based on the sciences of gastronomy and nutrition Conventional food study proceeds along the lines of a specific field such as nutrition agriculture or gastronomy though it should be conducted in an interdisciplinary manner This book covers multifaceted research on food study to respond to today s societal demands based mainly on the natural and social sciences It addresses a wide range of topics including food production management using mathematical modeling operations research and production engineering evaluation of food products based on big data analysis psychological experiments and ethnography food products based on consumer behavior organoleptic assessment and health improvement design of physical dining environments using virtual reality pedestrian debt recognition human indoor position measuring and observation of behavior Reporting on and assessing many studies conducted at actual business locations the book offers a unique and highly practical resource

Emerging Dynamics: Science, Energy, Society and Values Loucas G. Christophorou, 2018-06-08 Emerging Dynamics Science Energy Society and Values focuses on the impact of science science based technology and scientific values on present day humanity and its future The book advocates for a science willing to accommodate both human values and scientific facts The four main subjects focused on throughout the text are The overwhelming impact of modern science and science based technology on virtually every aspect of human life Human values and their significance for science and society The need for mutual accommodation between scientific values and the traditional values of society The fundamental role of energy for civilization and society The book cuts across scientific disciplines and looks at modern civilization through the knowledge provided by the physical chemical biomedical and other branches of natural science The book is unique in its holistic approach combining knowledge acquired by deduction reduction induction and experimental scientific methods with knowledge acquired through history philosophy the arts faith and cultural traditions Modern civilization s most distinct characteristics are due to science science based technology and energy The role of energy in the sustainability of civilization and the impact of biomedical science on man are especially emphasized throughout this timely book making a case for a hopeful future based on both science and values A science guided in its applications by human values and a value system cognizant of the facts of science and willing to accommodate them

Journal of the American Dietetic Association, 1990 **Multi-Scale Integrated Analysis of Agroecosystems** Mario Giampietro, 2003-11-24 Ecologists agronomists and others who may question the validity of current models for determining sustainable growth of agroecosystems need a new set of analytical tools that more effectively address the complex nature of related processes Those who challenge traditional assumptions of optimization and static factors in agricultural modeling demand new methods beyond differential equations

and traditional statistical tests Multi Scale Integrated Analysis of Agroecosystems explores alternative ways to study agricultural sustainability presenting new approaches to organizing data and applying complex systems theory to actual cases This innovative text recognizes the changing dynamics of the multiple processes and cross relations within an environment proposing a clearer analysis of agroecosystems than that which can be provided by rigid reductionist methods Main concepts new vocabulary and narratives and practical examples open the book followed by technical chapters that provide a more detailed explanation of concepts The final section of the book presents a tool kit based on these concepts resulting in strong support of empirical observations that challenge traditional notions regarding the sustainability of farming systems food systems and agroecosystems *Achieving Water-Energy-Food Nexus Sustainability: A Science and Data Need or a Need for Integrated Public Policy?* Richard George Lawford,Rabi Mohtar,Jill A.
