

John Mason, Sue Johnston-Wilder

Aspects of Teaching and Learning in Secondary Schools Hilary Bourdillon, Anne Storey, 2013-07-04 This textbook heads the Open University's flexible PGCE Perspectives on Practice series which provides a practical illustration of skills knowledge and understanding required to teach in the secondary classroom As well as describing concepts and ideas the book provides a critical examination of some of the key issues and will encourage the reader to engage with the ideas and consider their views and beliefs This book accompanies each of the subject specific books in the series providing a valuable link between disciplines The series complements our other OU series Teaching in the Secondary School which addresses theoretical issues relating to teaching Together these to series provide a complete resource for students Teaching, Learning and the Curriculum in Secondary Schools Steven Hutchinson, Bob Moon, Ann Shelton Mayes, 2005-07-08 The articles which make up this reader provide both overview and analysis of the central issues in secondary education Focused closely upon what it means to teach and learn in the modern secondary classroom this book provides invaluable insight into the development of secondary education today It is an ideal introduction to the task of teachers in secondary schools Issues covered in the book include the new agenda around teaching and learning effective pedagogy the teacher student relationship teaching learning and the digital age grouping by ability managing the curriculum change assessment equal opportunities and educational change This is the lead book in a series which bring together collections of articles by highly experienced educators which introduce explore and illuminate the issues surrounding teaching in secondary schools They are invaluable resources for those training to become teachers newly qualified teachers and more experienced practioners particularly those mentoring Teaching Mathematics in Secondary Schools Linda Haggarty, 2013-09-13 A companion to Aspects of Teaching **NOTs** Secondary Mathematics this book introduces and explores the contemporary issues and key ideas entailed in the teaching and learning of this subject This book is concerned with exploring the bigger picture of mathematics education and is aimed particularly at those learning to teach mathematics teachers in the classroom who want to continue thinking and developing as mathematics teachers and those concerned with education who would like to be better informed about mathematics education Divided into seven sections to help structure reading this book offers a completely up to date comprehensive overview written by the most known well respected experts in the field **Teaching Music in Secondary Schools Gary** Spruce, 2002 This series brings together a range of articles extracts from books and reports that inform an understanding of secondary schools in today s educational climate Aspects of Teaching Secondary Science Sandra Amos, Richard Boohan, 2003-09-02 This book is structure reflects the different dimensions to learning science. The first section focuses on the importance of talk in the science classroom while the second explores the key role of practical work The third section is concerned with the creative theoretical aspect of science Section four follows this by considering the communication of ideas and how pupils learn to participate in the discourse of the scientific community Section five emphasizes the place of science

in the broader context considering its moral and ethical dimensions and its place in a cultural context Finally section six explores the complexity of the task faced by science teachers highlighting the knowledge and skills science teachers must acquire in order to create an environment in which students are motivated to learn science Teaching Geography in Secondary Schools Margaret Smith, 2005-06-29 A companion to Aspects of Teaching Secondary Geography Teaching Geography in the Secondary School A Reader brings together a wide range of key writings that look at central issues debates and ideas surrounding geography education today It encourages students to reflect critically upon the issues in order to develop their understanding of these issues and to consider the implications for their classroom practice Modern Foreign Languages in Secondary Schools Ann Swarbrick, 2013-10-11 A companion to Aspects of Teaching Secondary Modern Foreign Languages this book charts developments during the past few decades of reform in MFL teaching considering the origins of these reforms and analysing their impact on the classroom The reader is divided into four sections Controversies and disagreements is an overview of changes to MFL teaching and learning during the last thirty years MFL schools and society looks at the role of MFL in a wider social and educational context Developing strategy looks at how more effective MFL teaching might be achieved Research and the MFL teacher looks at the implications for classroom practice of recent research into MFL teaching and Learning Aspects of Teaching Secondary Modern Foreign Languages Ann Swarbrick, 2013-07-04 This lively and inspiring collection of readings is divided into three sections Developing teaching strategies and effective classroom management covers all major aspects of classroom practice Planning evaluating and assessing MFL learning is a guide to the day to day requirements and practicalities of MFL teaching In search of a wider perspective considers how MFL teaching might develop and expand and its place outside the classroom Fully engaged with teaching and learning MFL at a practical level it illustrates concepts and good practice through a braod range of classroom based examples and case studies Issues covered in this book include maximising potential engaging pupils in their learning developing listening reading and oral skills use of information communication technology assessment and differentiation broadening the content of MFL lessons role play in the language class MFL beyond the classroom Aspects of Teaching Secondary Design and Technology Gwyneth Owen-Jackson, 2003-09-02 Beginning by outlining the national curriculum for design and technology Aspects of Teaching Secondary Design and Technology goes on to look at what design and technology is in the primary school at examination level and post 16 Vocational qualifications relevant to design and technology are also discussed There are chapters looking at the relationship between design and technology and the wider social and cultural context The development of cross curricular skills and value judgements are discussed as are sustainability and the role of the community in the teaching and learning of design and technology Together these articles comprise a sound guide to good classroom practice related to the requirements of the curriculum and rooted in the professional perspectives of experienced teachers Teaching Science in Secondary Schools Sandra Amos, Richard Boohan, 2013-10-11 A companion to Aspects of

Teaching Secondary Science the first section of this reader provides an overview of the key issues discussing the nature of science and its role in the school curriculum The second section goes on to examine critically the ways in which science is reflected in the school curriculum while the third section discusses recent curriculum initiatives and developments Turning the focus from what is taught on to who is taught section four shows that students are very much active learners in the classroom making sense of their experiences and constructing their own meanings The final section covers the role of research in science education giving examples of research papers and considering how productive collaboration between teachers and researchers can impact upon the effectiveness of classroom practice *Teaching Design and Technology in Secondary Schools* Gwyneth Owen-Jackson,2013-09-13 Teaching Design and Technology in Secondary Schools begins by providing information on the nature purpose and development of design and technology in schools An aptitude for design and technology combines practical skills and theoretical knowledge and the book addresses what this means in practice Design and technology takes in work with such diversity as resistant materials textiles food and systems and control so attention is given to connections between these areas and what makes them design and technology Together these articles comprise a stimulating and comprehensive overview of the issues and ideas surrounding this new popular and exciting element of the secondary school curriculum This book is the companion to Aspects of Teaching Secondary Design and Technology

Aspects of Teaching Secondary Music Gary Spruce, 2003-08-27 Aspects of Teaching Secondary Music provides a practical illustration of the skills knowledge and understanding required to teach music in the secondary classroom Musical concepts and ideas are discussed and a critical examination of key issues is given This encourages the reader to engage with these thoughts and consider their views and beliefs in terms of how they will influence their potential to teach music in an inspired and effective manner **Aspects of Teaching Secondary Mathematics** Linda Haggarty, 2003-09-02 If learners in the classroom are to be excited by mathematics teachers need to be both well informed about current initiatives and able to see how what is expected of them can be translated into rich and stimulating classroom strategies. The book examines current initiatives that affect teaching mathematics and identifies pointers for action in the classroom Divided into three major sections it looks at the changing mathematics classroom at primary secondary and tertiary level major components of the secondary curriculum practical pedagogical issues of particular concern to mathematics teachers Each issue is explores in terms of major underpinnings and research in that area and practical ideas can be drawn from the text and implemented in the reader's classroom practice Each chapter has been written by a well respected writer researcher and practitioner in their field and all share a common goal to look thoughtfully and intelligently at some of the practical issues facing mathematics teachers and offer their perspectives on those issues Fundamental Constructs in Mathematics Education John Mason, Sue Johnston-Wilder, 2004 This book brings together a collection of classic tasks extracts and texts that have **Aspects of Teaching Secondary Geography Margaret** been quoted repeatedly in mathematics education literature

Smith,2003-09-02 This book provides a practical illustration of the skills knowledge and understanding required to teach in the secondary classroom As well as discussing concepts and ideas the book gives a critical examination of some of the key issues and will encourage the reader to engage with the ideas and consider their views and beliefs It is an invaluable resource for those who are learning to teach or for those teachers who wish to reflect on their teaching practice

International Perspectives on the Teaching and Learning of Geometry in Secondary Schools Patricio Herbst, Ui Hock Cheah, Philippe R. Richard, Keith Jones, 2018-04-27 This book presents current perspectives on theoretical and empirical issues related to the teaching and learning of geometry at secondary schools It contains chapters contributing to three main areas A first set of chapters examines mathematical epistemological and curricular perspectives A second set of chapters presents studies on geometry instruction and teacher knowledge and a third set of chapters offers studies on geometry thinking and learning Specific research topics addressed also include teaching practice learning trajectories learning difficulties technological resources instructional design assessments textbook analyses and teacher education in geometry Geometry remains an essential and critical topic in school mathematics As they learn geometry students develop essential mathematical thinking and visualization skills and learn a language that helps them relate to and interact with the physical world Geometry has traditionally been included as a subject of study in secondary mathematics curricula but it has also featured as a resource in out of school problem solving and has been connected to various human activities such as sports games and artwork Furthermore geometry often plays a role in teacher preparation undergraduate mathematics and at the workplace New technologies including dynamic geometry software computer assisted design software and geometric positioning systems have provided more resources for teachers to design environments and tasks in which students can learn and use geometry In this context research on the teaching and learning of geometry will continue to be a key element on the research agendas of mathematics educators as researchers continue to look for ways to enhance student learning and to understand student thinking and teachers decision making **Mentoring History Teachers in the Secondary School** Victoria Crooks, Laura London, Terry Haydn, 2023-12-07 Mentoring History Teachers in the Secondary School supports mentors to develop the knowledge skills and understanding essential to the successful mentoring of beginning history teachers who are undertaking their initial teacher training or being inducted into the profession as early career teachers The authors critically explore models of mentoring and place subject specificity at the heart of every chapter offering practical mentoring strategies rooted in the best evidence and research from the history teaching community This book is a vital source of encouragement and inspiration for all those involved in developing the next generation of history teachers providing accessible summaries of history specific thinking on a range of topics alongside mentoring support Key topics include Understanding what being a subject specific mentor of beginning history teachers involves Establishing a dialogic mentor mentee relationship Supporting beginning teachers to develop the substantive and disciplinary knowledge they need

to become excellent history teachers Guiding beginning history teachers through the lesson planning process Conducting subject specific lesson observations and pre and post lesson discussions Supporting beginning history teachers to consider the purpose of history education and how they can navigate this in relation to values education the use of ICT and the teaching of controversial and sensitive issues Mentoring History Teachers in the Secondary School offers an accessible and practical guide to mentoring beginning history teachers with ready to use strategies to support and inspire both mentors and beginning teachers alike Practices and Perspectives of Teaching and Teacher Education in Africa Boadu, Gideon, Odhiambo, George, Marandi, Pegah, 2023-09-25 Teacher education is a known variable that impacts the quality of teaching and schooling yet while research on practices in teaching and teacher education abound in other contexts there seems to be no comprehensive reference work on teaching and teacher education in Africa With Africa and the diaspora boasting rich diverse political and educational contexts and practices this gap in knowledge requires that attention be focused on investigating issues that shape the pace course and direction of teaching and teacher education in these contexts Practices and Perspectives of Teaching and Teacher Education in Africa facilitates scholarly discussions among scholars and practitioners about practices innovations and future possibilities for educating the next generation of competent students and teachers in Africa Covering topics such as educational reforms equity career progression and curriculum development this major reference work is ideal for administrators industry professionals researchers academicians scholars practitioners instructors and students Perspectives on Mathematical Practices Bart van Kerkhove, jean paul van bendegem, 2007-06-01 Philosophy of mathematics today has transformed into a very complex network of diverse ideas viewpoints and theories Sometimes the emphasis is on the classical foundational work often connected with the use of formal logical methods sometimes on the sociological dimension of the mathematical research community and the products it produces then again on the education of future mathematicians and the problem of how knowledge is or should be transmitted from one generation to the next The editors of this book felt the urge first of all to bring together the widest variety of authors from these different domains and secondly to show that this diversity does not exclude a sufficient number of common elements to be present In the eyes of the editors this book will be considered a success if it can convince its readers of the following that it is warranted to dream of a realistic and full fledged theory of mathematical practices in the plural If such a theory is possible it would mean that a number of presently existing fierce oppositions between philosophers sociologists educators and other parties involved are in fact illusory TALIS 2013 Results An International **Perspective on Teaching and Learning** OECD, 2014-06-25 This report presents the results of the second cycle of the

TALIS survey conducted in 2013
