Assault On Rural Poverty:

Assault on Rural Poverty Haileleul Getahun, Hailemariam Getahun, 2001 In *Assault on Rural Poverty* Haileleul Getahun analyzes the various causes of rural poverty and constraints impeding increased agricultural productivity during the last four decades in Ethiopia under three different regimes Getahun examines the feudalistic system under Emperor Haile Selassie the command economic system of the military junta led by Mengistu Haile Mariam and the current capitalist system of the Federal Republic of Ethiopia led by Meles Zenawi Getahun discusses the lessons drawn from Ethiopian experience during these three regimes as well as from other African and Asian countries These provide the basis for recommending a small farmer led agricultural and rural development strategy that if implemented would alleviate rural poverty in Ethiopia The author maintains that the keys for successful development are the provision of institutional savings and credit for small scale farmers and small business owners the deep involvement of the community in project planning implementation evaluation and sharing of the benefits and the use of development support communication for motivation information dissemination and training Getahun argues strongly that ethnic politics in Ethiopia are destructive to Ethiopian society and militates against sustainable development Rather the path to peace and sustainable development requires that ethnic politics be scrapped and replaced by a genuinely democratic and widely acceptable system of governance

Displacement by Development Peter Penz, Jay Drydyk, Pablo S. Bose, 2011-01-20 For decades policy makers in government development banks and foundations NGOs researchers and students have struggled with the problem of how to protect people who are displaced from their homes and livelihoods by development projects This book addresses these concerns and explores how debates often become deadlocked between managerial and movementist perspectives Using development ethics to determine the rights and responsibilities of various stakeholders the authors find that displaced people must be empowered so as to share equitably in benefits rather than being victimized They propose a governance model for development projects that would transform conflict over displacement into a more manageable collective bargaining process and would empower displaced people to achieve equitable results Their book will be valuable for readers in a wide range of fields including ethics development studies politics and international relations as well as policy making project management and community development

The Political Economy of Rural Poverty M. Riad El-Ghonemy, 2006-05-10 With the use of wide ranging case studies the author clearly illustrates the impact of schemes intended to re allocate land in developing countries Concluding that land reform can play a major part in stimulating rural economies this book explores the extent to which such policies can
