Personnel Policies and Practices United States Civil Service Commission. Library,1975 **Industrial Management Review** ,1959 **Performing the Body/Performing the Text** Amelia Jones,Andrew Stephenson Nfa,Andrew Stephenson,2005-08-12 This book explores the new performativity in art theory and practice examining ways of rethinking interpretive processes in visual culture Since the 1960s visual art practices from body art to minimalism have taken contemporary art outside the museum and gallery by embracing theatricality and performance and exploding the boundaries set by traditional art criticism The contributors argue that interpretation needs to be recognised as much more dynamic and contingent Offering its own performance script and embracing both canonical fine artists such as Manet De Kooning and Jasper Johns and performance artists such as Vito Acconci and Gunter Brus this book offers radical re readings of art works and points confidently towards new models for understanding art **psychology today** ,1972 **The Urban South** Lawrence H. Larsen,2014-07-15 In this panoramic survey of urbanization in the American South from its beginnings in the colonial period through the Sunbelt era of today Lawrence Larsen examines both the ways in which southern urbanization has paralleled that of other regions and the distinctive marks of southernness in the historical process Larsen is the first historian to show that southern cities developed in layers spreading ever westward in response to the expanding transportation needs of the Cotton Kingdom Yet in other respects southern cities developed in much the same way as cities elsewhere in America despite the constraints of regional racial and agrarian factors And southern urbanites far from resisting change quickly seized upon technological innovations most recently air conditioning to improve the quality of urban life Treating urbanization as an independent variable without an ideological foundation Larsen demonstrates that focusing on the introduction of certain city services such as sewerage and professional fire departments enables the historian to determine points of urban progress Larsen s landmark study provides a new perspective not only on a much ignored aspect of the history of the South but also on the relationship of the distinctive cities of the Old South to the new concept of the Sunbelt city Carrying his story down to the present he concludes that southern cities have gained parity with others throughout America This important work will be of value to all students of the South as well as to urban historians
