Assessment for the New Curriculum Joanne Gainen, Paul Locatelli, 1995 *The Routledge Companion to Accounting Education* Richard M.S. Wilson, 2014-04-29 Many enquiries into the state of accounting education training undertaken in several countries over the past 40 years have warned that it must change if it is to be made more relevant to students to the accounting profession and to stakeholders in the wider community This book's overriding aim is to provide a comprehensive and authoritative source of reference which defines the domain of accounting education training and which provides a critical overview of the state of this domain including emerging and cutting edge issues as a foundation for facilitating improved accounting education training scholarship and research in order to enhance the educational base of accounting practice The Routledge Companion to Accounting Education highlights the key drivers of change whether in the field of practice on the one hand e.g. increased regulation globalisation risk and complexity or from developments in the academy on the other e.g. pressures to embed technology within the classroom or to meet accreditation criteria on the other Thirty chapters written by leading scholars from around the world are grouped into seven themed sections which focus on different facets of their respective themes including student curriculum pedagogic and assessment considerations Building a Scholarship of Assessment Trudy W. Banta, 2002-05-06 In this book leading experts in the field examine the current state of assessment practice and scholarship explore what the future holds for assessment and offer guidance to help educators meet these new challenges The contributors root assessment squarely in several related disciplines to provide an overview of assessment practice and scholarship that will prove useful to both the seasoned educator and those new to assessment practice Ultimately Building a Scholarship of Assessment will help convince skeptics who still believe outcomes assessment is a fad and will soon fade away that this is an interdisciplinary area with deep roots and an exciting future Best Practices in Accounting Program Assessment, 2003 South African Accounting Education Stocktake Jaco Fouché, Nico van der Merwe, 2020-04-07 This book is intended to take stock of the current state of accounting education with a specific emphasis on the South African situation It provides a critical overview of the current published research and identified gaps Through this it aims to equip accounting academics with information and tools to motivate them to research the field of accounting education to improve teaching and learning It also aids in the identification of suitable research topics in this regard and highlights potential pitfalls in researching accounting education The book therefore focuses on accounting educators as specialists in their respective disciplines Different authors with a keen interest in a specific area relating to accounting education research wrote each chapter in this book It forms a planned collective work assembled by appropriately qualified and experienced scholars in the accounting education field which generates a new conceptual synthesis that advances scholarship of accounting education research since no such synthesis currently exists for accounting education research in South Africa Advances in Accounting Education Dorothy Feldmann, Timothy J. Rupert, 2013-07-25 Topics included in
