Physician-Assisted Suicide: What are the Issues? L.M. Kopelman, K.A. de Ville, 2012-12-06 Physician Assisted Suicide What are the Issues offers a detailed discussion of recent supreme court rulings that have had an impact on the contemporary debate in the United States and elsewhere over physician assisted suicide Two rulings by the U S Supreme Court have altered the contemporary debate on physician assisted suicide Washington v Glucksberg 1997 and Vacco v Quill 1997 In these cases the Supreme Court ruled that state laws could prohibit assisted suicide and therefore physician assisted suicide These rulings mark the apex of over two decades of unprecedented litigation regarding end of life care and signal the beginning of a new clinical ethical and legal debate over the extent of an individual s rights to control the timing manner and

means of his her death The debate over suicide and assisting suicide is ancient and contentious and intertwined with questions about the permissibility of voluntary active euthanasia or mercy killing Responses to these issues can be divided into those who defend physician assisted suicide and many of these other activities and those who object But those who object may do so on principled grounds in that they regard these activities as wrong in all cases or non principled in that they believe there are more prudent less disruptive or more efficient policies The authors in this book sort out these responses and look at the assumptions underlying them Several of these authors give startling new interpretations that a culture gap deeper and wider than that in the abortion debate exists

Assisted Suicide: The Liberal, Humanist Case Against Legalization K. Yuill,2013-03-05 This book presents an atheistic case against the legalization of assisted suicide Critical of both sides of the argument it questions the assumptions behind the discussion Yuill shows that our attitudes towards suicide not euthanasia are most important to our attitudes towards assisted suicide

The Future of Assisted Suicide and Euthanasia Neil M. Gorsuch,2009-04-12 After assessing the strengths and weaknesses of arguments for assisted suicide and euthanasia Gorsuch builds a nuanced novel and powerful moral and legal argument against legalization one based on a principle that surprisingly has largely been overlooked in the debate the idea that human life is intrinsically valuable and that intentional killing is always wrong At the same time the argument Gorsuch develops leaves wide latitude for individual patient autonomy and the refusal of unwanted medical treatment and life sustaining care permitting intervention only in cases where an intention to kill is present

Assisted Suicide - Legal,

Quill,Margaret P. Battin,2004-10-13 In this volume a distinguished group of physicians ethicists lawyers and activists come together to present the case for the legalization of physician assisted dying for terminally ill patients who voluntarily request it To counter the arguments and assumptions of those opposed to legalization of assisted suicide the contributors examine ethical arguments concerning self determination and the relief of suffering analyze empirical data from Oregon and the Netherlands describe their personal experiences as physicians family members and patients assess the legal and ethical responsibilities of the physician and discuss the role of pain depression faith and dignity in this decision Together the essays in this volume present strong arguments for the ethical acceptance and legal recognition of the practice of physician assisted dying as a last resort not as an alternative to excellent palliative care but as an important possibility for patients who seek it

Handbook of Death and Dying Clifton D. Bryant,2003-10 Dying is a social as well as physiological phenomenon Each society characterizes and consequently treats death and dying in its own individual ways ways that differ markedly These particular patterns of death and dying engender modal cultural responses and such institutionalized behavior has familiar economical educational religious and political implications The Handbook of Death and Dying takes stock of the vast literature in the field of thanatology arranging and synthesizing what has been an unwieldy body of knowledge into a concise yet comprehensive reference work This two volume handbook will provide direction and momentum to the study of death related behavior for many years to come Key Features More than 100 contributors representing authoritative expertise in a diverse array of disciplines Anthropology Family Studies History Law Medicine Mortuary Science Philosophy Psychology Social work Sociology Theology A distinguished editorial board of leading scholars and researchers in the field More than 100 definitive essays covering almost every dimension of death related behavior Comprehensive and inclusive exploring concepts and social patterns within the larger topical concern Journal article length essays that address topics with appropriate detail Multidisciplinary and cross cultural coverage **Assisted Dying** Sheila McLean,2007-11-27 Assisted Dying explores the law relating to euthanasia and assisted suicide tracing its development from prohibition through to the laissez faire attitude adopted in a number of countries in the 21st Century This book provides an in depth critique of the arguments surrounding legislative control of such practices and particularly looks into the regulatory role of the state In the classical tradition of libertarianism the state is generally presumed to have a remit to intervene where an individual s actions

threaten another rather than harm the individuals themselves This arguably leaves a question mark over the state's determined intervention in the UK and elsewhere into the private and highly personal choices of individuals to die rather than live The perceived role of the state in safeguarding the moral values of the community and the need for third party involvement in assisted suicide and euthanasia could be thought to raise these practices to a different level These considerations may be in direct conflict with the so called right to die espoused by some individuals and groups within the community However this book will argue that the state's interests are and should be second to the interests that the people themselves have in choosing their own death Assisted Dying is winner of the The Minty Prize of the Society of Authors and winner of the Royal Society of Medicine Book Awards 2008

Assisted Suicide Lois Snyder, Arthur L. Caplan, 2002 There is no constitutional right to physician assisted suicide says the U S Supreme Court Most states have laws against it but states can also allow it as Oregon has done others are considering legalization Still very little guidance has been offered about its practice Assisted Suicide Finding Common Ground fills that void A diverse group of experts some for some against provide a framework for thinking about what assisted suicide particularly physician assisted suicide is and how its legalized practice might be guided The book does not take a position on the continuing debate about the morality or wisdom of legalizing assisted suicide But physician assisted suicide is now taking place and the more pressing concerns are those pertaining to its implementation Editors Lois Snyder and Art Caplan attempt to find common ground on those real world concerns Among the questions asked and answered are What is assisted suicide Is physician assisted suicide different from refusal of treatment Are there alternatives to assisted suicide How useful are currently available guidelines for physician assisted suicide Who should have access to what Does assisted suicide necessarily mean physician assisted suicide Can the practice be effectively and meaningfully regulated How should physicians respond to requests for assisted suicide Assisted suicide is one of the most ethically challenging issues in medicine and bioethics defining who we are and want to be as individuals and as a society This book takes a hard look at alternatives to the practice the implications for the patient physician relationship who should write guidelines and how to regulate physician assisted suicide and establish safeguards so that it is voluntary and an option of last resort

Against Physician Assisted Suicide David Jeffrey, 2009 The majority of doctors and nurses involved in specialist palliative care reject the legalisation of physician assisted suicide PAS This book explores the reasons why the healthcare professionals who have the most experience of caring for dying patients should object to a change in the law Debate about euthanasia and PAS often arises in response to a well publicised tragic case of unrelieved suffering Such heart rending stories do not reflect the fact that the majority of people dying have a dignified death There is a marked disparity between medical intuitions and the philosophers arguments about euthanasia and PAS It seems that part of the moral constitution of a doctor is a commitment not to intend the death of a patient and to protect them from harm The perspective of those who are privileged to care for thousands of dying patients and their families should inform the debate about PAS This book will enable those who are not working within palliative care to gain an insight into the scope of this speciality and to understand why legalisation of PAS should be resisted to maintain and improve care of dying patients
