general readers and students studying the many relevant subjects from medicine to law sociology politics philosophy and ethics Julian C Hughes has studied and been a professor of both philosophy and of old age psychiatry He was an NHS consultant in old age psychiatry and served as deputy chair of the Nuffield Council on Bioethics UK His most recent book was *Dementia and Ethics Reconsidered* published by Open University Press Ilora G Finlay is a Crossbench Peer in the House of Lords an honorary professor of palliative medicine at Cardiff University UK past President of the BMA and the Royal Society of Medicine A founder director of Living and Dying Well she co authored *Death by Appointment* and led on legislation to encourage the availability of palliative care for all Assisted Death in Europe and America Guenter Lewy, 2011 Advances in medical treatment now enable physicians to prolong life to a previously unknown extent however in many instances these new techniques mean not the saving of life but prolonging the act of dying In the eyes of many medical technology has run out of control and contributes to unnecessary suffering Hence the demand has arisen that patients should be entitled to choose death when pain and physical and mental deterioration have destroyed the possibility of a dignified and meaningful life and that their doctors should help them to realize this endeavor At the present time there are seven jurisdictions in the world that with various restrictions have legalized the practice of assisted death physician assisted suicide and or voluntary euthanasia to wit the Netherlands Belgium Luxembourg Switzerland in Europe and the states of Oregon Washington and Montana in the United States Four of these regimes in the Netherlands Belgium Switzerland and the state of Oregon have been functioning for many years and we have for them a substantial body of data as well as much observational research This book is based upon this material The literature dealing with the moral legal and social aspects of assisted death is voluminous but there is a paucity of writing that provides a detailed account of the way these four regimes are actually working Many partisans on both sides of the issue cite existing data selectively or at times willfully distort the empirical evidence in order to strengthen their case Based on the documentary record and interviews with officials and scholars this book seeks to give the specialist as well as the general interested reader a reliable picture of the way assisted death functions and to draw relevant lessons While accurate factual information cannot settle a moral debate it nevertheless is a precondition of any well founded argument The author speaks authoritatively about the issues he addresses I think this book does make an important contribution to the field It will be of interest to students and scholars of PAS as a source of information and reference I definitely recommend publication Stuart Youngner Department of Bioethics Case Western Reserve University School of Medicine The information collected here makes an important contribution to the literature on PAS because it collects a broad array of relevant information into a single volume It is interesting and enlightening This will make the book a valuable resource for anyone interested in the subject and an especially useful resource for academics who study or teach about the issues Rosamond Rhodes Director Bioethics Education Mt Sinai School of Medicine **The Future of Assisted Suicide and Euthanasia** Neil M. Gorsuch, 2009-03-23 From U S Supreme Court Justice and bestselling author

Neil Gorsuch an argument against the legalization of assisted suicide and euthanasia *The Future of Assisted Suicide and Euthanasia* provides the most thorough overview of the ethical and legal issues raised by assisted suicide and euthanasia as well as the most comprehensive argument against their legalization ever published In clear terms accessible to the general reader Neil Gorsuch thoroughly assesses the strengths and weaknesses of leading contemporary ethical arguments for assisted suicide and euthanasia He explores evidence and case histories from the Netherlands and Oregon where the practices have been legalized He analyzes libertarian and autonomy based arguments for legalization as well as the impact of key U S Supreme Court decisions on the debate And he examines the history and evolution of laws and attitudes regarding assisted suicide and euthanasia in American society After assessing the strengths and weaknesses of arguments for assisted suicide and euthanasia Gorsuch builds a nuanced novel and powerful moral and legal argument against legalization one based on a principle that surprisingly has largely been overlooked in the debate the idea that human life is intrinsically valuable and that intentional killing is always wrong At the same time the argument Gorsuch develops leaves wide latitude for individual patient autonomy and the refusal of unwanted medical treatment and life sustaining care permitting intervention only in cases where an intention to kill is present Those on both sides of the assisted suicide question will find Gorsuch s analysis to be a thoughtful and stimulating contribution to the debate about one of the most controversial public policy issues of our day

**Is there a Christian Case for Assisted Dying** Paul Badham, 2009-01-23 Issues surrounding euthanasia and assisted dying continue to hit the headlines with strong feelings on both sides In *Is There a Christian Case for Assisted Dying* Paul Badham makes a significant and controversial contribution to this important and current debate

**Assisted Suicide and Euthanasia** Mr Craig Paterson, 2012-10-01 As medical technology advances and severely injured or ill people can be kept alive and functioning long beyond what was previously medically possible the debate surrounding the ethics of end of life care and quality of life issues has grown more urgent In this lucid and vigorous book Craig Paterson discusses assisted suicide and euthanasia from a fully fledged but non dogmatic secular natural law perspective He rehabilitates and revitalises the natural law approach to moral reasoning by developing a pluralistic account of just why we are required by practical rationality to respect and not violate key demands generated by the primary goods of persons especially human life Important issues that shape the moral quality of an action are explained and analysed intention foresight action omission action consequences killing letting die innocence non innocence person non person Paterson defends the central normative proposition that it is always a serious moral wrong to intentionally kill an innocent human person whether self or another notwithstanding any further appeal to
