The Impact of New Technologies on the Quality of Life of People with Disabilities Theo Bougie, 2002-01-01 This report analyses the impact of new technologies on the quality of life of people with disabilities including consumer technology and of course assistive technology It takes into account the different types of disability covering not only physical and sensorial impairments but also intellectual disabilities mental illnesses and restrictions in social participation due to personal or environmental factors The study gives examples of good practice and indicates the strengths weaknesses opportunities and threats of new technologies for enhancing the quality of life of disabled people Proposals are made for such enhancement through legislation service delivery design standardisation and market development

Disability, Society and Assistive Technology Bodil Ravneberg, Sylvia Söderström, 2017-03-27 The provision of assistive technology is an important individual and collective service of the welfare state The state plays a significant role towards linking users and products and the matching of devices and users is both a science and an art However many people feel it is stigmatising to use individually designed assistive technologies as they often in a subtle way convey discriminating barriers in society The major challenges of assistive technology are thus to reduce social exclusion and marginalisation and importantly to reduce individual risks and societal costs related to non use due to deficiencies in usability aesthetics and design of the technologies This groundbreaking book discusses the relationships among society disability and technology by using different empirical examples e g school everyday life to show why the combination of disability studies and STS studies science technology and society is a fruitful approach to understanding and meeting these challenges The book explores the significance of the technologies for users society and the field identifies challenges to designing adopting and using assistive technologies and points at theoretical challenges in research as well as professional challenges in assistive technology service provision The book also scrutinises the role of assistive technology devices as well as the organisational structure of the assistive technology market in relation to disabled people's lives This book will be

valuable reading for students academics teachers and social educators interested in Disability Studies STS Studies Product Design Sociology Occupational Therapy and Physiotherapy as well as engineers working in the field of assistive technology

Living in the State of Stuck Marcia Joslyn Scherer,1996 Assistive technology is radically changing the lives of people with disabilities Here Dr Scherer sets the background for this radical transformation and discusses the implications of assistive technology for the lives of those born disabled or who become disabled later in life In the author s words this book shows how paradoxically the more technology became available and the more free from limitations individuals became the more stuck they seemed A severe disability no longer need prevent a person from attaining the same educational personal and career goals as other adults Scherer details assistive devices that enhance the quality of their lives mobility speech and ability to work But while these devices may enhance independence Scherer explains how friends and relatives can better understand the personal issues and needs that arise from living with a disability and needing these devices This is a unique well researched account that will help anyone disabled or not deal with the physical and emotional aspects of adjusting to a life with assistive technology

Assistive Technology from Adapted Equipment to Inclusive Environments Laura Burzagli,Andrea Como,Anna-Liisa Salminen,2009-08-15 The concept of Assistive Technology is moving away from adopting the most appropriate devices to overcome the limitations of users to the designing and setting up of total environments in which people can live supported by suitable services and additional support devices integrated within the environment These two perspectives are deeply intertwined both from technological and social points of view and the relationship between them currently represent the primary challenge for the field of Assistive Technology This publication covers the proceedings of the 10th European Conference of the Association for the Advancement of Assistive Technology in Europe <http://www.aaate.net> the organisation which stimulates the advancement of assistive technology for the benefit of people with disabilities including elderly people This conference seeks to bridge the gap between these two complementary approaches providing an opportunity to clarify differences and common points and better define future direction Topics covered by the conference include technological innovation in assistive technology the need for multidisciplinary approaches equipment interconnectivity and compatibility cultural aspects and the acceptance of different approaches and the role of Europe in building inclusion competence worldwide Disability results not only from a person s intrinsic attributes but also from the context in which they live This publication is a significant contribution to the advancement of inclusion for people living with a disability everywhere

 Bringing together information about the needs of people with disabilities and the equipment available this guide shows how the two can be brought together to provide an effective match of person and product The authors have reviewed the available evidence that informs choice of the most appropriate assistive device to meet individual need Advancement of Assistive Technology George Anagnostakis, Christian Bühler, Mathijs Soede, 1997
 People go traveling for two reasons because they are searching for something or they are running from something Katie's world is shattered by the news that her headstrong and bohemian younger sister Mia has been found dead at the bottom of a cliff in Bali The authorities say that Mia jumped that her death was a suicide Although they'd hardly spoken to each other since Mia suddenly left on an around the world trip six months earlier Katie refuses to accept that her sister would have taken her own life Distraught that they never made peace Katie leaves her orderly sheltered life in London behind and embarks on a journey to find out the truth With only the entries in Mia's travel journal as her guide Katie retraces the last few months of her sister's life and page by page country by country begins to uncover the mystery surrounding her death Weaving together the exotic settings and suspenseful twists of Alex Garland's *The Beach* with a powerful tale of familial love in the spirit of Rosamund Lupton's *Sister Swimming at Night* is a fast paced accomplished and gripping debut novel of secrets loss and forgiveness

An Introduction to Assistive Technology Suraj Singh Senjam, 2020-11-24
 Globally more than one billion people suffer some form of disability and may require assistive devices for their functioning Only 5 to 10% of them can access some level of rehabilitation services Assistive technology is essential while providing rehabilitation services to people with disabilities or health impairment The first edition of this book will help professionals working in habilitation and rehabilitation services and the chapters cover various aspects of assistive technologies The first chapter shares existing evidence on assistive technologies ATs that aid in rehabilitation intervention

among children and adolescents with neurodevelopmental disorders It provides the reader with a selective overview of the newest empirical contributions available in the literature on the use of AT based interventions for enabling adaptive skills and reducing challenging behaviors in children with neurodevelopmental disabilities The second chapter highlights the ViEW a computer based assistive technology for visual impairment ViEW Vision Enhancement for the World is a portable device that uses a computer vision technique to extract textual information The product can notify the nearest objects surrounding an individual with vision loss and read aloud with audio The product will aid in teaching students at schools for the blind The third and fourth chapters explain the existing classification for ATs for visual impairment and various devices that can be used to perform daily living tasks This chapter is designed for people working in eye care services teachers trainers in schools for the blind community based visual rehabilitation workers or other interested persons Chapter five presents advanced information and communication technologies ICT that may be used in bathroom safety without compromising personal privacy Bathroom safety is extremely important especially for older persons living independently at home The chapter reviews trends in ICT development and presents state of the art solutions for safe bathing bath accident detection and prevention Chapter six describes the applications of assistive software products in children with autism spectrum disorders where researchers deal with multiple factors to get closer to creating a model for children with autism for use in creating interactive apps Chapter seven sheds light on the newest contributions in virtual reality VR based intervention in neurodegenerative diseases Alzheimer s and or Parkinson s diseases amyotrophic lateral sclerosis or multiple sclerosis The outcomes in the majority of VR based interventions were positive The final chapter critically reviews the use of ATs and other relevant literature on the patient centered design of ATs which will ultimately help adoption pathways

Assistive Technology for People with Disabilities Denis K. Anson, How would you make a phone call or send email if you couldn t hear see or use your hands This book shows how assistive technology helps individuals with disabilities perform tasks that people without disabilities may take for granted Assistive technology can be used in two ways to help people with disabilities to do things that people without disabilities can do without technology and to improve access to everyday technology that is not designed for people with disabilities In both cases the focus is on matching individuals with the tools best suited to fill their needs A part of Greenwood s Health and Medical Issues Today series *Assistive Technology for People with Disabilities* explores what technologies are available to individuals with disabilities what they can help them to accomplish and potential hurdles to their use that must be overcome It explores this exciting field broadly and in depth while still keeping the people first mindset that is the hallmark of assistive technology In addition it provides guidance and resources for individuals seeking assistive technology for themselves or for a loved one

Assistive Technology for Visually Impaired and Blind People Marion Hersh, Michael A Johnson, 2010-05-12 Equal accessibility to public places and services is now required by law in many countries For the vision impaired specialised technology often can provide a fuller enjoyment of the facilities of

society from large scale meetings and public entertainments to reading a book or making music This volume explores the engineering and design principles and techniques used in assistive technology for blind and vision impaired people This book maintains the currency of knowledge for engineers and health workers who develop devices and services for people with sight loss and is an excellent source of reference for students of assistive technology and rehabilitation **Assistive**

Technologies for People with Diverse Abilities Giulio E. Lancioni,Nirbhay N. Singh,2014-01-07 The familiar image of the disabled tends to emphasize their limitations and reduced quality of life However many people with cognitive motor and other difficulties also have the capacity to enhance their social interactions leisure pursuits and daily activities with the aid of assistive technology Assistive devices from the simple to the sophisticated have become essential to intervention programs for this population And not surprisingly the numbers of devices available are growing steadily Assistive Technologies for People with Diverse Abilities offers expert analysis of pertinent issues coupled with practical discussion of solutions for effective support Its comprehensive literature review describes current and emerging devices and presents evidence based guidelines for matching promising technologies to individuals Program outcomes are assessed as are their potential impact on the future of the field In addition chapters provide detailed descriptions of the personal and social needs of the widest range of individuals with congenital and acquired conditions including Acquired brain damage Communication impairment Attention and learning difficulties with special focus on college students Visual impairment and blindness Autism spectrum disorders Behavioral and occupational disorders Alzheimer s disease Severe profound and multiple impairments The scope and depth of coverage makes Assistive Technologies for People with Diverse Abilities an invaluable resource for researchers professionals and graduate students in developmental psychology rehabilitation medicine educational technology occupational therapy speech pathology and clinical psychology

Assistive Technologies and Computer Access for Motor Disabilities Kouroupetroglou, Georgios,2013-08-31 Individuals with disabilities that impede their range of motion often have difficulty accessing technologies With the use of computer based assistive technology devices tools and services can be used to maintain and improve the functional capabilities of motor disabilities Assistive Technologies and Computer Access for Motor Disabilities investigates solutions to the difficulties of impaired technology access by highlighting the principles methods and advanced technological solutions for those with motor impairments This reference source is beneficial to academia industry and various professionals in disciplines such as rehabilitation science occupational therapy human computer interface development ergonomics and teaching in inclusive and special education This publication is integrated with its pair book Disability Informatics and Web Accessibility for Motor Limitations *Intellectual Disability and Assistive Technology* Fleur Heleen Boot,Julia S. Louw,Hung Jen Kuo,Roy Chen,2019-09-23 The capacity of assistive technology AT to improve the lives of individuals with disabilities is well documented Although promising it is not without challenges Historically devices that provide mobility aids and physical supports dominate the world of AT however AT solution that

specifically aims to address cognitive needs is scarce The inequality of AT accessibility has left populations such as individuals with intellectual disability ID behind these potential benefits This book presents six articles that highlight the need impact and possibilities of AT for people with ID With the emphasis on the multidisciplinary perspectives the objective of the book is to facilitate a better understanding of the needs of people with ID and the potential AT influences Ultimately we hope this book will shed some lights on this important topic and provoke more discussions and efforts devoted to improving the lives of individuals with ID through the use of AT
