The Neo-Assyrian Empire in the Southwest Avraham Faust, 2021-01-18 The Neo Assyrian empire the first large empire of the ancient world has attracted a great deal of public attention ever since the spectacular discoveries of its impressive remains in the 19th century The southwestern part of this empire located in the lands of the Bible is archaeologically speaking the best known region in the world and its history is described in a plethora of texts including the Hebrew Bible Using a bottom up approach Avraham Faust utilises this unparalleled information to reconstruct the outcomes of the Assyrian conquest of the region and how it impacted the diverse political units and ecological zones that comprised it In doing so he draws close attention to the transformations the imperial take over brought in its wake His analysis reveals the marginality of the annexed territories in the southwest as the empire focused its activities in small border areas facing its prospering clients A comparison of this surprising picture to the information available from other parts of the empire suggests that the distance of these provinces from the imperial core is responsible for their fate This sheds new light on factors influencing imperial expansion the considerations leading to annexation and the imperial methods of control challenging old conventions about the development of the Assyrian empire and its rule Faust also examines the Assyrian empire within the broader context of ancient Near Eastern imperialism to answer larger questions on the nature of Assyrian domination the reasons for its harsh treatment of the distant provinces and the factors influencing the limits of its reach His findings highlight the historical development of imperial control in antiquity and the ways in which later empires were able to overcome similar limitations paving the way to much larger and longer lasting polities
