Revisioning Philosophy James Ogilvy, 1992-01-01. Papers from a series of conferences organized by the Esalen Institute. Program on Revisioning Philosophy: a few of the 18 essays have been previously published; reflect one common theme: the need to cut the envelope of contemporary philosophy from its academic constriction; are diverse in approach and belief as they address various aspects of philosophical inquiry: democracy, individualism and pluralism and spiritual traditions and philosophy. Paper edition, unseen 10/95. Annotation copyrighted by Book News, Inc., Portland, OR. **Being-in-the-World**

Hubert L. Dreyfus, 1990-12-14. *Being in the World* is a guide to one of the most influential philosophical works of this century. Division I of Part One of *Being and Time*, where Martin Heidegger works out an original and powerful account of being in the world, which he then uses to ground a profound critique of traditional ontology and epistemology. Hubert Dreyfus's commentary opens the way for a new appreciation of this difficult philosopher, revealing a rigorous and illuminating vocabulary that is indispensable for talking about the phenomenon of world. The publication of *Being and Time* in 1927 turned the academic world on its head. Since then it has become a touchstone for philosophers as diverse as Marcuse, Sartre, Foucault, and Derrida, who seek an alternative to the rationalist Cartesian tradition of western philosophy. But Heidegger's text is notoriously dense, and his language seems to consist of unnecessarily barbaric neologisms to the neophyte and even to those schooled in Heidegger; thought the result is often incomprehensible. Dreyfus's approach to this daunting book is straightforward and pragmatic. He explains the text by frequent examples drawn from everyday life, and he skillfully relates Heidegger's ideas to the questions about being and mind that have preoccupied a generation of cognitive scientists and philosophers of mind.

Hubert L. Dreyfus, 2014. For fifty years, Hubert Dreyfus has done pioneering work which brings phenomenology and existentialism to bear on the philosophical and scientific study of the mind. This is a selection of his most influential essays, developing his critique of the representational model of the mind in analytical philosophy of mind and mainstream cognitive science. **Perspectives on Embodiment**
