

The background of the entire image is a vibrant, painterly illustration of a forest. A waterfall cascades down mossy rocks into a calm pool of water. Sunlight filters through the dense canopy of green trees, creating a magical atmosphere. Two white birds are in flight, one on the left and one on the right. Pink cherry blossoms are scattered throughout the scene, some on the trees and some floating in the water.

Promoting Healthy and Supportive Acoustic Environments: Going beyond the Quietness Francesco Aletta, Jian Kang, 2020-11-04 This book gathers 14 original contributions published in an IJERPH Special Issue that deal with the perception of environmental sounds and how such sounds are likely to affect human quality of life and well being and the

experience of a place The research focus over the years has been gradually shifting from treating sound simply as noise and something that cities should get rid of to a potential resource to promote and support community life in public spaces Three main topics or needs to be addressed by researchers and practitioners emerged from this Special Issue 1 the need to re think quietness in cities as something that goes beyond the mere pursuit of silence 2 the need to integrate additional contextual factors in the characterization and management of urban acoustic environments for public health and 3 the need to consider the acoustic quality of indoor spaces as opposed to an outdoor only perspective The contributions collected in this book will hopefully trigger new questions and inform the agenda of future researchers and practitioners in the environmental acoustics domain
