Michigan Audubon Society Quarterly News Letter ,2002 Ethics of Alaska Travel Writing since 1959

Benjamin Ferguson,2025-08-28 This book digs into environmental themes in Alaska travel writing since U S statehood in 1959 drawing on the works of six authors including Barry Lopez Jonathan Raban Tom Lowenstein and others Each work though disparate in style advocates for the empowerment of the Alaska Native people by connecting not only with diverse perspectives but with the lived realities in the geographical spaces that have formed them In analyzing how these authors have succeeded in depicting the realities of alterities and where they have perhaps fallen short by more recent standards we may begin to carve out a system of ethics This is important as fresh waves of travel writers search for their own place in the environmental conversations surrounding the ever evolving 21st century Arctic and its place on the front lines of a changing climate Nature's Ghosts Mark V. Barrow,2024-05-31 The rapid growth of the American environmental movement in recent decades obscures the fact that long before the first Earth Day and the passage of the Endangered Species Act naturalists and concerned citizens recognized and worried about the problem of human caused extinction As Mark V Barrow reveals in Nature s Ghosts the threat of species loss has haunted Americans since the early days of the republic From Thomas Jefferson s day when the fossil remains of such fantastic lost animals as the mastodon and the woolly mammoth were first reconstructed through the pioneering conservation efforts of early naturalists like John James Audubon and John Muir Barrow shows how Americans came to understand that it was not only possible for entire species to die out but that humans themselves could be responsible for their extinction With the destruction of the passenger pigeon and the precipitous decline of the bison professional scientists and wildlife enthusiasts alike began to understand that even very common species were not safe from the juggernaut of modern industrial society That realization spawned public education and legislative campaigns that laid the foundation for the modern environmental movement and the preservation of such iconic creatures as the bald eagle the California condor and the whooping crane A sweeping beautifully illustrated historical narrative that unites the fascinating stories of endangered animals and the dedicated individuals who have studied and struggled to protect them Nature s Ghosts offers an unprecedented view of what we ve lost and a stark reminder of the hard work of preservation still ahead **The Environment in Anthropology, Second Edition** Nora Haenn,Richard Wilk,Allison Harnish,2016-04-26 Presents ecology and current environmental studies from an anthropological point of view The Environment in Anthropology presents ecology and current environmental studies from an anthropological point of view From the classics to the most

current scholarship this text connects the theory and practice in environment and anthropology providing readers with a strong intellectual foundation as well as offering practical tools for solving environmental problems Haenn Wilk and Harnish pose the most urgent questions of environmental protection How are environmental problems mediated by cultural values What are the environmental effects of urbanization When do environmentalists goals and actions conflict with those of indigenous peoples How can we assess the impact of environmentally correct businesses They also cover the fundamental topics of population growth large scale development biodiversity conservation sustainable environmental management indigenous groups consumption and globalization This revised edition addresses new topics such as water toxic waste neoliberalism environmental history environmental activism and REDD Reducing Emissions from Deforestation and Forest Degradation and it situates anthropology in the multi disciplinary field of environmental research It also offers readers a guide for developing their own plan for environmental action This volume offers an introduction to the breadth of ecological and environmental anthropology as well as to its historical trends and current developments Balancing landmark essays with cutting edge scholarship bridging theory and practice and offering suggestions for further reading and new directions for research The Environment in Anthropology continues to provide the ideal introduction to a burgeoning field

Johnsgard, 2011-01-01 Driving west from Lincoln to Grand Island Nebraska Paul A Johnsgard remarks is like driving backward in time I suspect he says that the migrating cranes of a preice age period some ten million years ago would fully understand every nuance of the crane conversation going on today along the Platte
