Hand Guide to the Birds of New Zealand Hugh Robertson, Barrie Heather, 2001-01-11 This is a more portable updated edition of the original Field Guide to the Birds of New Zealand The original edition was published in two parts the first containing an identification guide with color plates and distribution maps the second giving more detailed information on the biology and ecology of the species described The current book combines the two sections into one book of plates maps short descriptions introduction and a section on where to find the birds It is a smaller more manageable guide perfect for field work and birding for pleasure **Birds of New Zealand** Stuart Chambers, 2000 An introduction to the birds of New Zealand aimed at all levels of birdwatcher and of special use to travellers to the islands For each of the 170 plus species there is a brief description local and Maori names range and a guide to localities where it may be seen This revised and updated second edition contains more species and more areas to watch them The book does not attempt a complete coverage of New Zealand birds or places Rather it is selective introducing people to birds they have a chance of seeing and only taking birders to places which are easy to get to and which promise results This book supports the notion that birds are less endangered and better protected if the public is knowledgeable and educated about them *New Zealand Journal of Zoology*, 1982 **A List of the Chewing Lice (Insecta: Mallophaga) from Birds in New Zealand** R. L. C. Pilgrim, R. L. Palma, 1982 Journal of the Royal Society of New Zealand, **Aves (Columbidae to Coraciidae)** Richard Schodde, I. J. Mason, 1997 This is the first of four proposed volumes that will catalogue the birds of Australia It contains a wealth of detail about the complex nomenclature and includes informative qualifications and taxonomic decisions The Catalogue also documents type localities distribution ecology and bibliographic references The authoritative work compiled by world experts is the culmination of many years of research and will be much in demand as the directory to the status of knowledge on the Australian fauna Features comprehensive introductions 14 families 12 subfamilies 10 tribes 130 living indigenous and established feral species over 200 genus available names over 700 species available names nomina nuda incertae sedis and taxa confirmanda subgeneric arrangements subspecific arrangements alternative taxonomic arrangements many new taxonomic and nomenclatural decisions synonymies with authorities detailed qualifications of the status of names location and status of type material new type designations type localities summaries of distribution and ecology ecological keywords
