The homes of the birds; or, Nests and their builders Percy (grandfather, pseud.),1874 *Orientation in Birds* P. Berthold,2013-03-08 If it is true that science proceeds from a romantic through a scientific to a technological stage then research on bird orientation is certainly on its move from its first to its second grade and recent developments in radiotelemetry and satellite tracking of migrating birds might already indicate the advent of the third stage At this juncture *Orientation in Birds* is a timely account Even though the study of animal migration in general and bird navigation in particular has produced a literature of impressive proportions the threads provided by the plethora of research papers review articles and symposiums volumes have not yet been knitted into a theoretical fabric This is partly due to our still incomplete understanding of fundamen tal topics in avian navigation The answer to the most intriguing question of how a bird displaced to unknown territory finds its way back home is as obscure now as it was a few decades ago Whether and how birds solve this problem by using far ranging grid maps or more local familiar area maps as has been proposed off and on is still a matter of heated debates These debates frequently center around provocative hypotheses let alone the question about the physical topographic magnetic infrasonic olfactory parameters which might constitute such maps

The Welfare of Domestic Fowl and Other

Captive Birds Ian J. H. Duncan, Penny Hawkins, 2009-12-29 Animal welfare is attracting increasing interest worldwide especially in developed countries where the knowledge and resources are available to at least potentially provide better management systems for farm animals as well as companion zoo and laboratory animals The key requirements for adequate food water a suitable environment appropriate companionship and good health are important for animals kept for all of these purposes There has been increased attention given to farm animal welfare in many countries in recent years This derives largely from the fact that the relentless pursuit of financial reward and efficiency to satisfy market demands has led to the development of intensive animal production systems that challenge the conscience of many consumers in those countries In developing countries human survival is still a daily uncertainty so that provision for animal welfare has to be balanced against human needs Animal welfare is usually a priority only if it supports the output of the animal be it food work clothing sport or companionship In principle the welfare needs of both humans and animals can be provided for in both developing and developed countries if resources are properly husbanded In reality however the inequitable division of the world's riches creates physical and psychological poverty for humans and animals alike in many parts of the world **Wild Birds at Home** Charles Kirk, 1907 **First Aid For Birds** Julie Rach, Gary A. Haukos, Clint Boal, 2016-02-22 Shortlisted for the 2018 TWS Wildlife Publication Awards in the edited book category Lesser Prairie Chickens have experienced substantial declines in terms of population and the extent of area that they occupy While they are an elusive species making it difficult at times to monitor them current evidence indicates that they have been persistently
