Taxonomy of the birds of the world fotolulu,2018-10-30 How do you come up with the idea to list all the birds in the world including the subspecies and to give all birds English names There is a reason for it my favorite saying whose author is unknown Everyone said that s not possible then there was one who did not know that and just did it I am an animal photographer and probably a little bit crazy I ve built a complete animal database for mammals and birds over the last decade This facilitates my work in determining and archiving images and assigning keywords especially among the many subspecies With this book I would like to give all birding friends and ornithologists a complete overview in English For this I have given unique English names to all subspecies The naming should not meet any scientific requirements The names are based on translations from the Latin name geographical distribution areas and the names of the discoverers The entries consist of the scientific name the English name the distribution areas and the author I wish you a lot of fun with this book but especially while watching the fascinating birdlife fotolulu **Ornithology in Laboratory and Field** Olin Sewall

Pettingill,2013-10-02 Ornithology in Laboratory and Field is intended as an aid to ornithological study at the college or university level Students who lack the background knowledge usually acquired during a course in general zoology or biology should keep it handy for ready reference a standard elementary text on the subject This book contains extensive material for purely informational reading possibly enough to supplant the need of an additional textbook Its principal purpose still complies with the title of its predecessors for it is essentially a manual to guide and assist the student in direct observations All twenty sections except the last The Origin Evolution and Decrease of Birds suggest methods and provide instructions for studies and all conclude with an extensive list of references frequently annotated for further information The twenty sections

of the book can be taken up in almost any order and some may be omitted without affecting the instructional value of the others. A feature of this new edition is an introduction to birds and ornithology intended for reading at the beginning of a course. The purpose is twofold: to show the significance of birds for study and to give an overall preview of ornithology the subject with emphasis on its wide scope, how it is studied, and some of the continuing and exciting opportunities that it offers for investigation.

Phoenix and the Birds of Prey Mark Moyar, 2022-01-18 This study explodes prevailing myths about the Phoenix Program, the CIA's top secret effort to destroy the Viet Cong by neutralizing its civilian leaders. Drawing on recently declassified documents and interviews with American South Vietnamese and North Vietnamese sources, Mark Moyar examines the attempts to eradicate the Viet Cong infrastructure and analyzes their effectiveness. He addresses misconceptions about these efforts and provides an accurate, complete picture of the allies' decapitation of the Viet Cong shadow government. Combining social and political history with a study of military operations, Moyar offers a fresh interpretation of the crucial role the shadow government played in the Viet Cong's ascent. Detailed accounts of intelligence operations provide an insider's view of their development and reveal what really happened in the safe havens of the Viet Cong. Filled with new information, Moyar's study sets the record straight about one of the last secrets of the Vietnam War and offers poignant lessons for dealing with future Third World insurgencies. This Bison Books edition includes a new preface and chapter by the author.

Reading South Vietnam's Writers Thomas Engelbert, Chi P. Pham, 2023-07-04 This edited book examines how South Vietnam's formerly the Republic of Vietnam 1955-1975 literary and journalistic writers were perceived and potentially influenced by Western thought led by thinkers such as Jean Paul Sartre, Franz Kafka, Sigmund Freud, Thomas Mann, Martin Heidegger, Hermann Hesse, Edmund Husserl, Stefan Zweig, Graham Greene, and Somerset Maugham. The book reveals the dynamism and diversity of Western thought in individual literary texts as well as among the authors themselves. The volume considers how writers and their texts engaged with issues that are socially, culturally, politically, and philosophically significant to Vietnam and beyond past and present. This approach to South Vietnam's literary and journalistic tradition enables an alternative, plural, inclusive view of the significance of these texts, which are shown to be neither exclusively anti-Communist nor bourgeois individualist. Unlike as they have so often been interpreted, both in and outside of Vietnam, such an interpretation problematically retains the marginal position of South Vietnam's literature in mainstream Vietnamese literature and in the literatures of the host countries where these Vietnamese authors have migrated, settled, and continued to write following the Fall of Saigon. This volume presents itself as a key text for those studying Asian and postcolonial literatures as well as scholars in the humanities researching
