FINSYS-2 Joseph E. Barnard, J. David Born, 1978 *The demand for nonconsumptive wildlife uses* Thomas A. More, 1979

Beyond Natural Resources to Post-Human Resources Peter Baofu, 2014-09-18 Are natural resources really so limited that as Mahatma Gandhi once famously said Earth provides enough to satisfy every man's need but not every man's greed TE 2012 This limiting view of natural resources can be contrasted with an opposing view by John Maynard Keynes who summarized Say's Law as supply creates its own demand but then turned Say's Law on its head in the 1930s by declaring that demand creates its own supply so whenever a demand exists there will be resources to create the supply EN 2012 Contrary to these opposing views and other ones as will be discussed in the book natural resources in relation to both diversity and discontinuity are neither possible or impossible nor desirable or undesirable to the extent that the respective ideologues on different sides would like us to believe Needless to say this challenge to the opposing views of natural resources does not mean that natural resources are unimportant or that those interdisciplinary fields related to natural resources like conservation biology environmental management ecological economics political ecology environmental ethics adaptive management genetic engineering Malthusianism and so on are not worth studying Of course neither of these extreme views is reasonable Rather this book offers an alternative better way to understand the future of natural resources especially in the dialectic context of diversity and discontinuity while learning from different approaches in the literature but without favoring any one of them or integrating them since they are not necessarily compatible with each other More specifically this book offers a new theory that is the resilient theory of natural resources to go beyond the existing approaches in a novel way If successful this seminal project is to fundamentally change the way that we think about natural resources in relation to diversity and discontinuity from the combined perspectives of the mind nature society and culture

Consumer Tribes in Tourism Christof Pforr, Ross Dowling, Michael Volgger, 2020-11-18 This book adopts a collectivist perspective on special interest tourism consumption bringing together research on special interest tourism and niche tourism as well as more recent research into the interdisciplinary applications of the sociological concept of neo tribes It promotes a shift in perspective away from special interest tourism understood as a sum of similarly motivated individuals to a collective view of special interest tourists who share common characteristics e g shared values beliefs and mutual interests and group structures This approach provides a better understanding of groupings that are not unified by a common tourism motivation but brought together by otherwise conditioned commonalities in actual behavior triggered by supply side contexts e g Airbnb The book considers tourism micro segments as consumer tribes i e as symbolic communities in which individuals are embedded and loosely bound together As there is limited research on the collectivist perspective on special interest tourism consumption in the first part the book s conceptual theoretical discourse contributes to a better understanding of groupings in tourism behavior but also collectives that are not unified by a common tourism motivation Presenting international examples the book explores in Part 2 the group culture of a range of tourist tribes by describing emerging tourism micro segments identifying shared identities and analyzing their collective mechanisms
