Congenital Abnormalities and Preterm Birth Related to Maternal Illnesses During Pregnancy Nándor

Ács, Ferenc G. Bánhid, Andrew E. Czeizel, 2010-07-05 The major objective of our studies in the last decade was a systematic analysis of maternal diseases during pregnancy to reveal their possible adverse effects on birth outcomes The two most important factors of infant mortality were partially analyzed structural birth defects known as congenital abnormalities CAs and preterm birth PB In general the objectives of scientific studies might be either to test a new hypothesis or to confirm or confront previously published results However less frequently the authors scientists have personal motivations determined by their professional activities The authors of this book are practicing physicians and genetic epidemiologist who are mainly interested in the following three practical questions 1 The possible adverse effects of pharmaceutical products The possible teratogenic potential of about 170 drugs has been evaluated very thoroughly using the data set of the Hungarian Case Control Surveillance of Congenital Abnormalities HCCSCA in the last 50 years These drugs were used to treat maternal diseases and the findings of our population based case control studies will be cited in this book and are shown in the Appendix at the end of the book However our long experiences showed two problems in the drug teratology In general the evaluation of clinical doses of these drugs is a particularly difficult challenge due to the modification effects of confounders This problem motivated one of the authors to establish a new model of disaster epidemiology

Birth Control Beth Sundstrom, Cara Delay, 2020

Birth control offers women the opportunity to prevent pregnancy plan and space their births or have no births at all And yet in the United States half of all pregnancies remain unintended and access to birth control is beset by inequities in education access and coverage Research indicates that women are familiar with the range of contraceptive methods available today But the persistently high rates of unintended pregnancy combined with common dissatisfaction and discontinuation suggest that women's contraceptive needs continue to be unmet Birth Control What Everyone Needs to Know will offer more than a user's guide to available means of contraception it will examine how supported family planning infrastructure impacts society as a whole Through reviews of policy scientific literature and supplemental interviews with women it will uncover women's concerns and apprehensions about contraception as well as the ways birth control empowers women and increases access to educational and professional opportunities It will provide an overview the history of birth control the risks and benefits of contraception the role of menstruation and the future of birth control The goal of this book is to provide accurate unbiased scientific information about contraception in the context of women's lived experiences and the realities of how individuals make decisions about birth control

In the Face of Death Fabian F.

Grassl, 2020-01-01 My theological work was always only a superstructure placed upon the experiences and sufferings of my life Helmut Thielicke Thielicke's story is one of extraordinary circumstances Especially as a young man living through Germany's darkest hour he was time and again put on the brink of death by fatal sickness Nazi oppression and war These

experiences left an indelible mark on his worldview In this thoroughly researched study Fabian F Grassl takes a fresh and original look at Thielicke's turbulent life through the specific lens of suffering and death He paints an intimate portrait of a boundary rider whose theology uniquely developed in the face of death As a result new light is cast on one of the outstanding theologians ethicists and preachers of the twentieth century The reader is invited to explore a world of thought decidedly shaped by the eschatological existence of an intriguing personality a flawed human being like the rest of us yet endowed with a fascinating theological prowess taking his stand amongst Germany's major historical upheavals of the last century

Health Consequences of Service During the Persian Gulf War Institute of Medicine, Medical Follow-up Agency, Committee to Review the Health Consequences of Service During the Persian Gulf War, 1996-11-10 In January 1995 the Institute of Medicine released a preliminary report containing initial findings and recommendations on the federal government's response to reports by some veterans and their families that they were suffering from illnesses related to military service in the Persian Gulf War The committee was asked to review the government's means of collecting and maintaining information for assessing the health consequences of military service and to recommend improvements and epidemiological studies if warranted This new volume reflects an additional year of study by the committee and the full results of its three year effort

School-age Pregnancy and Parenthood Jane Beckman Lancaster, Beatrix A. Hamburg, This important work examines in detail and depth how as a consequence of changing technologies diet patterns of reproduction and work relations between children and parents have altered The editors and contributors hold that biosocial science is particularly relevant to research on human family systems and parenting behavior The family is the universal social institution in which the care of children is based and the turf where cultural tradition beliefs and values are transmitted to the young as they fulfill their biological potential for growth development and reproduction The biosocial perspective takes into account the biological substratum and the social environment as critical co-determinants of behavior and pinpoints areas in which contemporary human parental behavior exhibits continuities with and departures from patterns evident throughout history This work crosses disciplinary lines without ignoring their relevance to the broader themes of the book School age pregnancy and parenthood is a powerful anchor for the dissection of large scale issues The contributors deal in turn with

Women and Pressure Caroline E. Fife, Marguerite St. Leger Dowse, 2010-01-01

Women and Pressure is a remarkable look at women's progress in the fields of diving and altitude. With content ranging from the history of women divers, combat pilots, and astronauts to the unique physiological characteristics of females working and playing in altered barometric pressure environments, this book is long overdue. Featuring contributions from 35 authors, many of whom are pioneers in their field, it represents a wide range of disciplines and offers a comprehensive dialogue about the effects of pressure on women. This book is a must read for women divers, dive instructors, men who dive with women, and anyone involved in these fields. As an admirable collection of the current research and attitudes regarding the most frequent concerns of divers, instructors, and aviators, topics are explored on a level of seriousness and urgency. The essays included in this text contain crucial discussions of such relevant factors as pregnancy, the menstrual cycle, and decompression illness. Decompression illness susceptibility compared with men, fitness to dive, thermal tolerance, equipment, legal issues, and women in the workplace. The pool of information in this book displays the serious nature of a text addressing the past, present, and future of issues of consequence in relation to the well-being of the women involved.

From the Foreword: It is obviously important to have a good understanding of how women's physical and psychological responses might differ from those experienced by men. I believe that this book is a scholarly attempt to answer these questions, and I hope that it will make a valuable contribution to the health and welfare of women engaged in these highly specialized occupations.

HRH Prince Philip, Duke of Edinburgh

Over the years, different data, theories, and hypotheses have been proffered, but there has never been an authoritative compendium on these issues. This is perhaps the only work in existence that in one place provides physicians, physiologists, and other interested divers and aerospace professionals with what's broadly known about the subject of women in diving and aerospace.

Karl Shreeves, The Undersea Journal 2010

Proceeds from this book will go to the Diving Diseases Research Center to support further diving research.

Research Relating to Children , Lead and Public Health

Paul Mushak, 2011-08-08

The book presents a detailed assessment of the health science of lead and the human health risk assessment models for lead's human health impacts, followed by an account of various regulatory efforts in the United States and elsewhere to eliminate or reduce human toxic exposures to lead. The science of lead as presented here covers releases of lead into the environment, lead's movement through the environment to reach humans who are then exposed, and the spectrum of toxic effects, particularly low-level toxic effects on the developing central nervous system of the very young child. The section on human health risk assessment deals with quantifying not only the dose-response relationships that underlie toxic responses to lead in sensitive populations but also with the likelihood of toxic responses vis-à-vis environmental lead at some level of exposure. This section includes a treatment of computer models of lead exposure, particularly those that use lead

in whole blood as a key measure Various models convert lead intake via various body compartments into measures of body lead burden Such measures are then directly related to severity of injury The final section of the book deals with past and present regulatory efforts to control lead releases into the human environment Current control efforts present a mixed picture The most problematic issue is the continued presence of lead paint in older housing and lead in soils of urban and mining industry communities Comprehensive assessment of the three major facets of the public health problem of lead the voluminous science the risk assessment approaches and approaches to controlling lead as a public health problem Integration of the above three elements to provide a coherent whole Provides a single source of information that will be extremely valuable to all professionals working in areas impacted by this toxic substance *Wyllie's Treatment of Epilepsy* Elaine Wyllie, Barry E.
