The Birth of Plenty William J. Bernstein, 2010 *The Birth of Plenty: How the Prosperity of the Modern World was Created* William J. Bernstein, 2010-07-12 Compact and immensely readable a tour de force Prepare to be amazed John C Bogle Founder and Former CEO The Vanguard Group Bernstein is widely respected as author of the bestseller *The Intelligent Asset Allocator* Identifies and explains the four conditions necessary for human progress **Essential Goals in World Politics** Jisi Wang, 2021-05-04 This book presents a unique effort to apply political philosophy to realities of the world Among numerous objectives that states politicians and individuals try to reach some are vague like power interest and happiness Some others like democracy order and rule of law are ways and means to serve more fundamental purposes While national reunification is seen as prerequisite on the political agenda of the People's Republic of China and both South and North Korea and religious purity is regarded as essential to many Muslim communities these are not universally accepted principal goals in the world The author identifies and defines security wealth faith justice and freedom as five ultimate goals in world politics and explains why they are central Without jargons and using many cases in China and other countries the author illustrates that different countries at different times have varied priorities in their national politics but they must provide security sustain economic growth set up a value system maintain social justice and secure personal freedom for their citizens Although the world today has been relatively peaceful and accumulated much more wealth as compared to the past centuries vacuums of faith and morality conflicting beliefs and lack of social justice are threatening mankind In theory the five ultimate goals should be reached simultaneously and reinforce each other However in practice they are often in contradiction For example national security might be strengthened at the expense of prosperity and industrialization for economic growth has sacrificed nontraditional security interests such as the environment The accumulation of wealth often results in its unequal distribution and grievances about injustice and freedom and equality are regarded by some political thinkers as natural enemies to each other A virtuous state should be able to reach all the five goals while a bad state may not have even one of them Looking around the world today Denmark in Europe and Japan in Asia are closer to a virtuous state than most other countries despite their own deficiencies but they are generally homogeneous in terms of ethnicity and culture Singapore with its ethnic diversity has to limit freedom to obtain other goals This book compares the development paths of China the United States and some other countries to demonstrate their advantages and disadvantages in becoming a better polity *The US National Debt, 1787-1900 Vol 1* Robert E Wright, 2024-10-28 This volume assembles a broad selection of rare primary resource materials in the form of essays reports books and compendia informing on US public finances in the late eighteenth century It investigates the debates put forward from which comparisons with today's debt can be drawn **Global Politics in the 21st Century** Robert J. The 1% and the Rest of Us Tim Di Muzio,2015-03-12 While the Occupy movement faces many strategic and organizational challenges one of its major accomplishments has been to draw global attention to the massive disparity of income wealth and privilege held by 1% of the population in nations across the world In The 1% and the Rest of Us Tim Di Muzio explores what it means to be part of a socio economic order presided over by the super rich and their political servants Incorporating provocative and original arguments about philanthropy social wealth and the political role of the super rich Di Muzio reveals how the 1% are creating a world unto themselves in which the accumulation of ever more money is really a symbolic drive to control society and the natural environment

The Objectification Spectrum John M. Rector,2014-06-30 What lies at the heart of humanity s capacity for evil Any tenable answer to this age old question must include an explanation of our penchant for objectifying and dehumanizing our fellow human beings The Objectification Spectrum Understanding and Transcending Our Diminishment and Dehumanization of Others draws upon timeless wisdom to propose a new model of objectification Rather than offering a narrow definition of the term the author explores objectification as a spectrum of misapprehension running from its mildest form casual indifference to its most extreme manifestation dehumanization Using vivid examples to clearly demarcate three primary levels of objectification the author engages in a thoughtful exploration of various dispositional and situational factors contributing to this uniquely human phenomenon These include narcissism the ego death denial toxic situations and our perceived boundaries of self among others Rector then gives us reason to hope by orienting his model of objectification into a broader continuum of

human capability one that includes a countervailing enlightenment spectrum Gleaning insights from classic philosophy the world's five most prominent religious traditions and current social science research he examines the best antidotes humankind has devised thus far to move us from casual concern for our fellow human beings toward interconnectedness and ultimately unity consciousness Broad in scope and deeply penetrating The Objectification Spectrum advances the conversation about the nature of human evil into personally relevant potentially transformative territory

The Poverty of Slavery Robert E. Wright, 2017-02-20 This ground breaking book adds an economic angle to a traditionally moral argument demonstrating that slavery has never promoted economic growth or development neither today nor in the past While unfree labor may be lucrative for slaveholders its negative effects on a country's economy much like pollution drag down all members of society Tracing the history of slavery around the world from prehistory through the US Antebellum South to the present day Wright illustrates how slaveholders burden communities and governments with the task of maintaining the system while preventing productive individuals from participating in the economy Historians economists policymakers and anti slavery activists need no longer apologize for opposing the dubious benefits of unfree labor Wright provides a valuable resource for exposing the hidden price tag of slaving to help them pitch antislavery policies as matters of

Sims, 2009-06-01 This work presents an evangelical theology of the child nurtured in the context of American evangelicalism and affluence It employs an eclectic theological critical method to produce a theological anthropology of the affluent American evangelical child AAEC through interdisciplinary evangelical engagement of American history sociology and economics Sims articulates how affluence constitutes a significant impediment to evangelical nurture of the AAEC in the discipline and instruction of the Lord Thus the problem he addresses is nurture in evangelical affluence conceived as a theological anthropological problem Nurture in the cultural matrices of the evangelical affluence generated by technological consumer capitalism in the U.S. impedes spiritual and moral formation of the AAEC for discipleship in the way of the cross This impediment risks disciplinary formation of the AAEC for capitalist culture cultivates delusional belief

that life consists in an abundance of possessions and hinders the practice of evangelical liberation of the poor on humanity's underside. The result is the AAEC's spiritual moral lack in late modernity. Chapter 1 introduces the problem of the AAEC. Chapters 2 and 3 provide a diachronic lens for the theological anthropology of the AAEC through critical assessment of the theological anthropologies of the child in Jonathan Edwards, Horace Bushnell, and Lawrence Richards. Chapters 4 and 5 constitute the synchronic perspective of the AAEC. Chapter 4 presents an evangelical sociology of the AAEC drawing upon William Corsaro's theory of interpretive reproductions, and chapter 5 constructs an evangelical theology of the AAEC through critical interaction with John Schneider's moral theology of affluence. Chapter 6, 'Whither the AAEC', concludes with a recapitulation of the work and a forecast of possible futures for the AAEC in the twenty-first century.
