Bishops Palace Architecture And Authority In Medieval Italy:

The Bishop's Palace Maureen Catherine Miller, 2000 This lavishly illustrated book looks at the art and architecture of episcopal palaces as expressions of power and ideology Tracing the history of the bishop's residence in the urban centers of northern Italy over the Middle Ages Maureen C Miller asks why this once rudimentary and highly fortified structure called a domus became a complex and elegant palace palatium by the late twelfth century Miller argues that the change reflects both the emergence of a distinct clerical culture and the attempts of bishops to maintain authority in public life She relates both to the Gregorian reform movement which set new standards for clerical deportment and at the same time undercut episcopal claims to secular power As bishops lost temporal authority in their cities to emerging communal governments they compensated architecturally and competed with the communes for visual and spatial dominance in the urban center This rivalry left indelible marks on the layout and character of Italian cities Moreover Miller contends this struggle for power had highly significant but mixed results for western Christianity On the one hand as bishops lost direct governing authority in their cities they devised ways to retain status influence and power through cultural practices This response to loss was highly creative On the other hand their loss of secular control led bishops to emphasize their spiritual powers and to use them to obtain temporal ends The coercive use of spiritual authority contributed to the emergence of a persecuting society in the central Middle Ages

A Renaissance Architecture of Power, 2016-04-08 The growth of princely states in early Renaissance Italy brought a thorough renewal to the old seats of power One of the most conspicuous outcomes of this process was the building or rebuilding of new court palaces erected as prestigious residences in accord with the new

classical principles of Renaissance architecture The novelties however went far beyond architectural forms they involved the reorganisation of courtly interiors and their functions new uses for the buildings and the relationship between the palaces and their surroundings The whole urban setting was affected by these processes and therefore the social residential and political customs of its inhabitants This is the focus of *A Renaissance Architecture of Power* which aims to analyse from a comparative perspective the evolution of Italian court palaces in the Renaissance in their entirety Contributors are Silvia Beltramo Flavia Cantatore Bianca de Divitiis Emanuela Ferretti Marco Folin Giulio Girondi Andrea Longhi Marco Rosario Nobile Aurora Scotti Elena Svalduz and Stefano Zaggia

The History of Courts and Procedure in Medieval Canon Law

Wilfried Hartmann, Kenneth Pennington, 2016-09-09 By the end of the thirteenth century court procedure in continental Europe in secular and ecclesiastical courts shared many characteristics As the academic jurists of the *Ius commune* began to excavate the norms of procedure from Justinian's great codification of law and then to expound them in the classroom and in their writings they shaped the structure of ecclesiastical courts and secular courts as well These essays also illuminate striking differences in the sources that we find in different parts of Europe In northern Europe the archives are rich but do not always provide the details we need to understand a particular case In Italy and Southern France the documentation is more detailed than in other parts of Europe but here too the historical records do not answer every question we might pose to them In Spain detailed documentation is strangely lacking if not altogether absent Iberian conciliar canons and tracts on procedure tell us much about practice in Spanish courts As these essays demonstrate scholars who want to peer into the medieval courtroom must also read letters papal decretals chronicles conciliar canons and consilia to provide a nuanced and complete picture of what happened in medieval trials This volume will give sophisticated guidance to all readers with an interest in European law and courts

Medieval Irish Architecture and the Concept of Romanesque

Tadhg O'Keeffe, 2024-02-28 This book presents a fresh perspective on eleventh and twelfth century Irish architecture and a critical assessment of the value of describing it and indeed contemporary European architecture in general as Romanesque *Medieval Irish Architecture and the Concept of Romanesque* is a new and original study of medieval architectural culture in Ireland The book's central premise is that the concept of a Romanesque style in eleventh and twelfth century architecture across Western Europe

including Ireland is problematic and that the analysis of building traditions of that period is not well served by the assumption that there was a common style Detailed discussion of important buildings in Ireland a place marginalised within the Romanesque model reveals the Irish evidence to be intrinsically interesting to students of medieval European architecture for it is evidence which illuminates how architectural traditions of the Middle Ages were shaped by balancing native and imported needs and aesthetics often without reference to Romanitas This book is for specialists and students in the fields of Romanesque medieval archaeology medieval architectural history and medieval Irish studies

Conflict and Violence in Medieval Italy 568-1154 Christopher Heath, Robert Houghton, 2025-10-01 This collection of essays from both established and emerging scholars analyses the dynamic connections between conflict and violence in medieval Italy The contributors present a new critique of power that sustained both kingship and locally based elite networks throughout the Italian peninsula A broad temporal range covering the sixth to the twelfth centuries allows this book to cross a number of traditional fault lines in Italian historiography 774 888 962 and 1025 The essays provide wide ranging analyses of the role of conflict in the period the operation of power and the development of communal consciousness and collective action by individuals and groups It is thus essential reading for scholars students and general readers who wish to understand the situation in medieval Italy

Holy Bishops in Late Antiquity Claudia Rapp, 2013-05-01 Between 300 and 600 Christianity experienced a momentous change from persecuted cult to state religion One of the consequences of this shift was the evolution of the role of the bishop as the highest Church official in his city from model Christian to model citizen Claudia Rapp s exceptionally learned innovative and groundbreaking work traces this transition with a twofold aim to deemphasize the reign of the emperor Constantine which has traditionally been regarded as a watershed in the development of the Church as an institution and to bring to the fore the continued importance of the religious underpinnings of the bishop s role as civic leader Rapp rejects Max Weber s categories of charismatic versus institutional authority that have traditionally been used to distinguish the nature of episcopal authority from that of the ascetic and holy man Instead she proposes a model of spiritual authority ascetic authority and pragmatic authority in which a bishop s visible asceticism is taken as evidence of his spiritual powers and at the same time provides the justification for his public role In clear and graceful prose Rapp provides a wholly fresh analysis of the changing dynamics of social mobility as played out in episcopal appointments

Apollo and Vulcan Guido Guerzoni, 2011-06-01 Guido Guerzoni presents the results of fifteen years of research into one of the more hotly debated topics among historians of art and of economics the history of art markets Dedicating equal attention to current thought in the fields of economics economic history and art history Guerzoni offers a broad and far reaching analysis of the Italian scene highlighting the existence of different forms of commercial interchange and diverse kinds of art markets In doing so he ranges beyond painting and sculpture to examine as well the economic drivers behind architecture decorative and sumptuary arts and performing or ephemeral events Organized by thematic areas the ethics and psychology of

consumption an analysis of the demand labor markets services prices laws that cover a large chronological period from the 15th through the 17th century various geographical areas and several institution typologies this book offers an exhaustive and up to date study of an increasingly fascinating topic *Rome and Religion in the Medieval World* Valerie L.

Garver,Owen M. Phelan,2016-04-08 *Rome and Religion in the Medieval World* provides a panoramic and interdisciplinary exploration of Rome and religious culture The studies build upon or engage Thomas F X Noble s interest in Rome especially his landmark contributions to the origins of the Papal States and early medieval image controversies Scholars from a variety of disciplines offer new viewpoints on key issues and questions relating to medieval religious cultural and intellectual history Each study explores different dimensions of Rome and religion including medieval art theology material culture politics education law and religious practice Drawing upon a wide range of sources including manuscripts relics historical and normative texts theological tracts and poetry the authors illuminate the complexities of medieval Christianity especially as practiced in the city of Rome itself and elsewhere in Europe when influenced by the idea of Rome Some trace early medieval legacies to the early modern period when Protestant and Catholic theologians used early medieval religious texts to define and debate forms of Roman Christianity The essays highlight and deepen scholarly appreciation of Rome in the rich and varied religious culture of the medieval world **The Social Life of Hagiography in the Merovingian Kingdom** Jamie

Kreiner,2014-04-03 This book shows how a set of great stories changed the political playing field in an early medieval society

The Transformation of the Laity in Bergamo, 1265-c.1400 Roisin Cossar,2006-07-01 This book examines the tension between social mores and religious activities among the laity in the Italian diocese of Bergamo during the later Middle Ages 1265 c 1400 Comparing the religious activities of lay men and women both rich and poor across a range of pious and ecclesiastical institutions including confraternities hospitals parishes and the diocese Roisin Cossar shows how the laity s access to these institutions increasingly came to depend on their gender and social status during the fourteenth century At the same time she argues that all lay people regardless of gender and social status viewed themselves as equal members of a lay ordo The book thus illuminates the complexity of late medieval religious culture as it simultaneously reflected and challenged secular social values *The Sephardic Frontier* Jonathan Ray,2013-01-14 No subject looms larger over the

historical landscape of medieval Spain than that of the reconquista the rapid expansion of the power of the Christian kingdoms into the Muslim populated lands of southern Iberia which created a broad frontier zone that for two centuries remained a region of warfare and peril Drawing on a large fund of unpublished material in royal ecclesiastical and municipal archives as well as rabbinic literature Jonathan Ray reveals a fluid often volatile society that transcended religious boundaries and attracted Jewish colonists from throughout the peninsula and beyond The result was a wave of Jewish settlements marked by a high degree of openness mobility and interaction with both Christians and Muslims Ray s view challenges the traditional historiography which holds that Sephardic communities already fully developed were simply

reestablished on the frontier In the early years of settlement Iberia's crusader kings actively supported Jewish economic and political activity and Jewish interaction with their Christian neighbors was extensive Only as the frontier was firmly incorporated into the political life of the peninsular states did these frontier Sephardic populations begin to forge the communal structures that resembled the older Jewish communities of the North and the interior By the end of the thirteenth century royal intervention had begun to restrict the amount of contact between Jewish and Christian communities signaling the end of the open society that had marked the frontier for most of the century

Power and Place in Europe in the Early Middle Ages Jayne Carroll, Andrew Reynolds, Barbara Yorke, 2019-12-17 This book reveals a high degree of organisational capacity in early medieval societies It outlines a new agenda for assessing and interpreting early medieval power how it was formed how it functioned and how it developed across time providing the basis for the kingdoms of the European Middle Ages

Religious Practices and Christianization of the Late Antique City (4th - 7th cent.), 2015-06-24 In Religious Practices and Christianization of the Late Antique City historians archaeologists and historians of religion provide studies of the phenomenon of the Christianization of the Roman Empire within the context of the transformations and eventual decline of the Greco Roman city The eleven papers brought together here aim to describe the possible links between religious but also political economic and social mutations engendered by Christianity and the evolution of the antique city Combining a multiplicity of sources and analytical approaches this book seeks to measure the impact on the city of the progressive abandonment of traditional cults to the advantage of new Christian religious practices

A Wider Trecento Louise Bourdua, Robert Gibbs, 2011-12-09 These studies explore aspects of Julian Gardner's wide range of interests and approaches ranging from Parisian metalwork to the Wilton diptych Franciscan iconography the tomb of a leading theologian and several studies of the art of Rome and Northern Italy

The Corrupter of Boys Dyan Elliott, 2020-11-27 In the fourth century clerics began to distinguish themselves from members of the laity by virtue of their augmented claims to holiness Because clerical celibacy was key to this distinction religious authorities of all stripes patristic authors popes theologians canonists monastic founders and commentators became progressively sensitive to sexual scandals that involved the clergy and developed sophisticated tactics for concealing or dispelling embarrassing lapses According to Dyan Elliott the fear of scandal dictated certain lines of action and inaction the consequences of which are painfully apparent today In *The Corrupter of Boys* she demonstrates how in conjunction with the requirement of clerical celibacy scandal averse policies at every conceivable level of the ecclesiastical hierarchy have enabled the widespread sexual abuse of boys and male adolescents within the Church Elliott examines more than a millennium's worth of doctrine and practice to uncover the origins of a culture of secrecy and concealment of sin She charts the continuities and changes from late antiquity into the high Middle Ages in the use of boys as sexual objects before focusing on four specific milieus in which boys and adolescents would have been especially at risk in the high and later Middle Ages the monastery the choir the schools and the episcopal court The

Corrupter of Boys is a work of stunning breadth and discomforting resonance as Elliott concludes that the same clerical prerogatives and privileges that were formulated in late antiquity and the medieval era and the same strategies to cover up the abuses they enable remain very much in place *Church and People in the Medieval West, 900-1200* Sarah Hamilton, 2015-08-12 During the middle ages belief in God was the single more important principle for every person and the all powerful church was the most important institution It is impossible to understand the medieval world without understanding the religious vision of the time and this new textbook offers an approach which explores the meaning of this in day to day life as well as the theory behind it Church and People in the Medieval West gets to the root of belief in the Middle Ages covering topics including pastoral reform popular religion monasticism heresy and much more throughout the central middle ages from 900 1200 Suitable for undergraduate courses in medieval history and those returning to or approaching the subject for the first time **Writing the City Square** Martin Zerlang, 2023-05-03 The history of cities is also the history of city squares The agora the forum the piazza the plaza All presuppose the idea of a center It s a material and mental phenomenon Literature is an important part of this history and the interplay between the square as physical space and the square as literature is the topic of this book This is an encyclopedic book combining an overview of the history of city squares with a plethora of analytical examples of its reflection in literature Literature uses the city square as a frame city squares serve as frames for drama novels and other kinds of literature comment on city squares city squares are sources of inspiration for all sorts of literary activities Socrates in the agora Cicero in the Forum Calder n in the Plaza Mayor Corneille in the Place Royale Richardson in Grosvenor Square James in Washington Square Woolf in Bloomsbury Square D blin and Gr schner in Alexanderplatz Rodoreda in Diamond Square in Barcelona DeLillo in Times Square Al Aswany in Tahrir Square the Maidanistas in the Maidan of Kyiv These are just some of the examples presented and analyzed in this book The book is of direct interest for researchers students and professionals such as architects and urban planners but it is written in a way that makes it accessible for all readers with an interest in urban culture architecture history literature and cultural studies
