The Expanding Boundaries of Black Politics Georgia A. Persons, 2017-09-04 This volume joins the preceding volumes in this distinguished series in presenting contemporary research by leading political scientists addressing topics of interest to those concerned with African American affairs It captures the expanding boundaries of black politics and the persistent interests of the black community at large The anchoring symposium *The Expanding Boundaries of Black Politics* presents the

scholarship of a cadre of young black political scientists actively engaged in the critical tasks of moving forward the study of black politics. Their concerns include expanding the boundaries of black politics along the lines of epistemology and methodology especially in regard to core issues and areas within this field. In an introductory essay by Todd Shaw the work of these scholars is situated within the context of temporal shifts in scholarly emphases. Overlapping issues and concerns across time as well as black political scholarship as defined in the field since its beginning are addressed. The second part of this volume entitled *Maximizing the Black Vote: Recognizing the Limits of Electoral Politics* concentrates on serious lingering social concerns. These include the policy significance of black mayors affecting the concomitant impact of the black vote, the boundaries being pushed concerning the conjunction of black theology and sexual identity, a gendered analysis of familial policies and the deepening social and economic plight of young black males including felon disfranchisement. The *Expanding Boundaries of Black Politics* carries forth the search for an understanding of the relationship between religion, the black church and black political behavior, cross racial group coalitions as concerns matters of immigration, growing multiculturalism and the impact on black politics, maximizing the impact of the black vote, focusing on voting rights enforcement, the black vote in presidential elections and the voice of the Congressional Black Caucus.

Encyclopedia of African American Politics Robert C. Smith, 2003. An A to Z presentation of over 400 articles on African American politics and notable people from the abolitionist movement to Whitney Young.

After Whiteness Mike Hill, 2004. What comes after white becomes a minority in the United States.

Encyclopedia of African-American Politics, Third Edition Robert Smith, 2021-05-01. This A to Z volume examines the role of African Americans in the political process from the early days of the American Revolution to the present. Focusing on basic political ideas, court cases, laws, concepts, ideologies, institutions and political processes, this book covers all facets of African Americans in American government. Written by a nationally renowned scholar in the field, the *Encyclopedia of African American Politics Third Edition* will enlighten readers to the struggles and triumphs of African Americans in the American political system. Entries include Abolitionist Movement, African immigrants, Barack Obama, Black Lives Matter, Black Panther Party, Civil Rights Act of 1964, Emancipation Proclamation, Forty Acres and a Mule, Freedmen's Bureau, Hurricane Katrina, Institutional racism, Integrationism, Juneteenth, Lynching, Malcolm X, Million Man March, Raphael Warnock.

Troubling the Family Habiba Ibrahim, 2012. *Troubling the Family* argues that the emergence of multiracialism during the 1990s was determined by underlying and unacknowledged gender norms. Opening with a germinal moment for multiracialism, the seemingly massive and instantaneous popular appearance of Tiger Woods in 1997, Habiba Ibrahim examines how the shifting status of racial hero for both black and multiracial communities makes sense only by means of an account of masculinity. Ibrahim looks across historical events and memoirs beginning with the *Loving v. Virginia* case in 1967 when miscegenation laws were struck down to reveal that gender was the starting point of an analytics that made categorical multiracialism and multiracial politics possible. Producing a genealogy of multiracialism's gendered basis.

allows Ibrahim to focus on a range of stakeholders whose interests often ran against the grain of what the multiracial movement of the 1990s often privileged the sanctity of the heteronormative family the labor of child rearing and more precise forms of racial tabulation all of which when taken together could form the basis for creating so called neutral personhood Ibrahim concludes with a consideration of Barack Obama as a representation of the resurrection of the assurance that multiracialism extended into the 2000s a version of personhood with no memory of its own gendered legacy and with no self account of how it became so masculine that it can at once fill the position of political leader and the promise of the end of politics

Democracy at Risk Stephen Macedo, 2006-05-25 Voter turnout was unusually high in the 2004 U S presidential election At first glance that level of participation largely spurred by war in Iraq and a burgeoning culture war at home might look like vindication of democracy If the recent past is any indication however too many Americans will soon return to apathy and inactivity Clearly all is not well in our civic life Citizens are participating in public affairs too infrequently too unequally and in too few venues to develop and sustain a robust democracy This important new book explores the problem of America s decreasing involvement in its own affairs *Democracy at Risk* reveals the dangers of civic disengagement for the future of representative democracy The authors all eminent scholars undertake three main tasks documenting recent trends in civic engagement exploring the influence that the design of political institutions and public policies have had on those trends and recommending steps that will increase the amount and quality of civic engagement in America The authors focus their attention on three key areas the electoral process including elections and the way people get involved the impact of location including demographic shifts and changing development patterns and the critical role of nonprofit organizations and voluntary associations including the philanthropy that help keep them going This important project initially sponsored by the American Political Science Association tests the proposition that social science has useful insights on the state of our democratic life Most importantly it charts a course for reinvigorating civic participation in the world s oldest democracy The authors Stephen Macedo Princeton University Yvette Alex Assensoh Indiana University Jeffrey M Berry Tufts Michael Brintnall American Political Science Association David E Campbell Notre Dame Luis Ricardo Fraga Stanford Archon Fung Harvard William

Trust in Black America Shayla Nunnally, 2023-11-21 The more citizens trust their government the better democracy functions However African Americans have long suffered from the lack of equal protection by their government and the racial discrimination they have faced breaks down their trust in democracy Rather than promoting democracy the United States government has from its inception racially discriminated against African American citizens and other racial groups denying them equal access to citizenship and to protection of the law Civil rights violations by ordinary citizens have also tainted social relationships between racial groups social relationships that should be meaningful for enhancing relations between citizens and the government at large Thus trust and democracy do not function in American politics the way they should in part because trust is not color blind Based on the premise that racial

discrimination breaks down trust in a democracy Trust in Black America examines the effect of race on African Americans lives Shayla Nunnally analyzes public opinion data from two national surveys to provide an updated and contemporary analysis of African Americans political socialization and to explore how African Americans learn about race She argues that the uncertainty risk and unfairness of institutionalized racial discrimination has led African Americans to have a fundamentally different understanding of American race relations so much so that distrust has been the basis for which race relations have been understood by African Americans Nunnally empirically demonstrates that race and racial discrimination have broken down trust in American democracy

Contours of African American Politics Georgia A. Persons, 2017-07-05

Contours of African American Politics chronicles the systematic study of African American politics and its subsequent recognition as an established field of scholarly inquiry African American politics emanates from the demands of the prolonged struggle for black liberation and empowerment Hence the study of African American politics has sought to track codify and analyse the struggle that has been mounted and to understand the historic and changing political status of African Americans within American society This two volume set presents a selection of scholarship on African American politics as it appeared in The National Political Science Review from its initial launch in 1989 to the spring of 2009 Represented are contributions from some of the leading scholars of African American politics who have helped to establish and sustain the field The volumes are organised around themes that derive from the unfolding real life drama of African American politics and its subsequent scholarly treatment The result is a window into the political efforts that meld the historically disparate strands of black political expressions into a reconstructed and strategically nimble electoral based mass mobilisation necessary for optimising the impact of the African American vote Sections in the volumes also chronicle the evolution of the National Conference of Black Political Scientists as a professional organisation The two volumes illuminate a pivotal epoch in black political empowerment and provide a context for the future of black politics
