Black Children Just Keep On Growing Alternative Curriculum Models For Young Black Children:

Black Children Just Keep on Growing Madeleine W. Coleman, 1977 **We Are an African People** Russell

Rickford, 2016-01-14 During the height of the Black Power movement of the late 1960s and 1970s dozens of Pan African nationalist private schools from preschools to post secondary ventures appeared in urban settings across the United States. The small independent enterprises were often accused of teaching hate and were routinely harassed by authorities. Yet these institutions served as critical mechanisms for transmitting black consciousness. Founded by activist intellectuals and other radicalized veterans of the civil rights movement, the schools strove not simply to bolster the academic skills and self esteem of inner city African American youth but also to decolonize minds and foster a vigorous and regenerative sense of African identity. In *We Are An African People*, historian Russell Rickford traces the intellectual lives of these autonomous black institutions established dedicated to pursuing the self determination that the integrationist civil rights movement had failed to provide. Influenced by Third World theorists and anticolonial campaigns, organizers of the schools saw formal education as a means of creating a vanguard of young activists devoted to the struggle for black political sovereignty throughout the world. Most of the institutions were short lived and they offered only modest numbers of children a genuine alternative to substandard inner city public schools. Yet their stories reveal much about Pan Africanism as a social and intellectual movement and as a key part of an indigenous black nationalism. Rickford uses this largely forgotten movement to explore a particularly fertile period of political, cultural and social revitalization that strove to revolutionize African American life and envision an alternate society. Reframing the post civil rights era as a period of innovative organizing, he depicts the prelude to the modern Afrocentric movement and contributes to the ongoing conversation about urban educational reform, race and identity.

Achieving Blackness Algernon Austin, 2006-04-10 *Achieving Blackness* offers an important examination of the complexities of race and ethnicity in the context of black nationalist movements in the United States. By examining the rise of the Nation of Islam, the Black Power Movement of the 1960s and 1970s and the Afrocentric era of the 1980s through 1990s, Austin shows how theories of race have shaped ideas about the meaning of Blackness within different time periods of the twentieth century. *Achieving Blackness* provides both a fascinating history of Blackness and a theoretically challenging understanding of race and ethnicity. Austin traces how Blackness was defined by cultural ideas, social practices and shared identities as well as shaped in response to the social and historical conditions at different moments in American history. Analyzing black public opinion on black nationalism and its relationship with class, Austin challenges the commonly held assumption that black nationalism is a lower class phenomenon. In a refreshing and final move, he makes a compelling argument for rethinking contemporary theories of race away from the current fascination with physical difference, which he contends sweeps race back to its misconceived biological underpinnings. *Achieving Blackness* is a wonderful contribution to the sociology of race and African American Studies.
