Programme, 1950-1971 Charles N Hill,2001-04-02 A Vertical Empire describes the work in rocketry and space research carried out in the UK in the 1950s and 1960s At one time the programme was as sophisticated as those in the US and Russia The projects were cancelled one by one as Britain s attempts to keep up militarily with the two superpowers weakened as a consequence of Treasury pressure and the belief that there was no economic future in space technology Much of the material in this invaluable book has never been available before due partly to the 30 Year Rule concerning government documents and partly to the sensitive military nature of the work The projects covered include rocket propelled aircraft large military missiles such as the medium range ballistic missile Blue Streak the test rocket Black Knight and the re entry experiments it carried and the satellite launcher Black Arrow In addition proposed projects that could have been developed from these vehicles are covered in depth There is also considerable political analysis of why these projects were eventually discontinued

Textbook of Interventional Radiology S. H. Chandrashekhara,2024-12-31 The textbook covers all the aspects of interventional radiology IR ranging from anatomy pre procedural evaluation technique post procedure care and complications It provides a comprehensive overview of both vascular and non vascular interventions and thus fills the gap in the existing literature The Initial chapters of the book focus on the hardware drugs contrast media and imaging systems used in IR enabling the reader to become oriented to the interventional techniques that are covered in the subsequent chapters Each chapter in the book focuses upon a particular set of interventions on an organ or organ system from head to toe thereby facilitating convenient reading by the users This book is designed not only to guide trainees enrolled in super specialty and fellowship courses in interventional radiology IR but also to offer foundational IR training for general radiologists effectively bridging the gap between general radiology and IR It equips trainees with all the essential knowledge needed to practice IR and prepare for exams such as FRCR EDiR RANZCR DM and fellowship examinations Additionally it serves as a valuable reference for both practicing general radiologists and interventional radiologists The book is relevant for MD DNB trainees in radiology radiodiagnosis DM DNrB trainees in interventional radiology neuroradiology cardiovascular radiology and fellowship trainees in interventional radiology and its subspecialties **Water Bears: The Biology of Tardigrades** Ralph

O. Schill, 2019-02-14 Offering extensive information on tardigrades this volume begins with a chapter on the history of tardigrades from the first description by Goeze in 1773 until 1929 when the most comprehensive monographic approach by E. Marcus was published. Tardigrades organ systems including their integument, body cavity, digestive, muscular, nervous and reproductive systems as well as their overall external morphology are summarized in the second chapter. Subsequent chapters present the current state of knowledge on tardigrade phylogeny, biogeography, paleontology, cytology and cytogenetics. In addition, the book provides insights into the ecology of tardigrades in marine, freshwater and terrestrial habitats. The reproduction, development and life cycles are summarized and the extraordinary environmental adaptations of encystment and cyclomorphosis, desiccation tolerance, freezing tolerance and radiation tolerance are discussed in detail. Further chapters provide an overview of key approaches in molecular tardigrade studies and describe techniques for sampling and sample processing. The book closes with a list of tardigrade taxa up to a subgeneric level, including the type species of each genus, the numbers of lower taxa in each taxon and the main environments in which the taxa were found. Given its depth of coverage, the volume offers an invaluable resource for scientists from various disciplines who plan to research tardigrades and for all others who are interested in these fascinating animals. **Exploring Roles of Diagnostic**
