

Rethinking Security after the Cold War*

BARRY BUZAN

ABSTRACT

This paper examines aspects of the debate amongst traditionalist, widening and critical approaches to Security Studies. It looks at how the security agenda has expanded away from the narrow military focus generated by the Cold War, and argues against the traditionalist criticism that widening the concept of security necessarily makes it incoherent. To carry this argument, it proposes a constructivist method for security analysis that offers a way of confining the application of security, and some reintegrative potential, to all three schools. In this approach, security is understood not as the content of a particular sector (military), but as a particular type of politics defined by reference to existential threats and calls for emergency action in any sector. The paper concludes by examining some of the political issues raised by any attempt to widen the scope of security, setting the liberal case for narrowing security as much as possible against the pressures to widen the security agenda that ironically arise from the contemporary success of the liberal project.

Introduction

Since the winding down of the Cold War, the theoretical literature on Security Studies has become notably active. One feature of this revival has been a fragmentation of the debate into three schools: traditionalists, who want to retain a largely military focus; wideners, who want to extend the range of issues on the security agenda; and the recently launched Critical Security Studies, whose proponents want to cultivate a more questioning attitude to the whole framework in which security is conceptualized. There are some areas of overlap amongst these schools, but also major areas of disagreement. This article is mainly rooted in the widening school, and its prime purpose is to rebut the traditionalist criticism that widening makes the concept of security incoherent. It also examines the often unspoken political issues raised by any attempt to widen the scope of security. In doing this it proposes a

Asian Pacific Security After The Cold War:

Asian-Pacific Security After the Cold War Thomas Bruce Millar, 1993-01-01 Twelve experts on international relations contribute to this examination of the post Cold War situation in the Asian Pacific region Several chapters in the collection were originally given as papers at a 1991 conference in London and have been revised and updated for this second edition the first edition was published by the Sir Robert Menzies Centre for Australian Studies in London in 1991 *Asia-Pacific Security Cooperation: National Interests and Regional Order* See Seng Tan, 2014-12-18 New developments in the Asia Pacific are forcing regional officials to rethink the way they manage security issues The contributors to this work explore why some forms of security cooperation and institutionalisation in the region have proven more feasible than others This work describes the emergence of the professions in late tsarist Russia and their struggle for autonomy from the aristocratic state It also examines the ways in which the Russian professions both resembled and differed from their Western counterparts

Asian Security and the Rise of China David Martin Jones, Michael Lawrence Rowan Smith, Nicholas Khoo, 2013-01-01 Khoo Jones and Smith have pulled off a remarkable balancing act crafting a well grounded and multifaceted survey of China's rise in the context of Asian security In a field which is often marked more by scholarly effervescence than substance the authors provide a refreshingly detailed portrait of the last two decades and fairly minded point out evidence which might support both extremes of the debates they challenge with their own third way Frank Scott Douglas US Naval War College US Congratulations to the authors for a clearly argued and comprehensive treatment of China's post Cold War rise and what it means for existing and future dynamics of the Asia Pacific region Effectively employing realist theory in a fairly minded treatment of regional developments the volume shows how and why power realities are more important than non material factors in determining the region's trajectory and thereby demonstrates that China's ascendance in Asia remains complicated and conflicted Robert Sutter George Washington University US East Asia is without question a region of huge economic political and security significance Asian Security and the Rise of China offers a comprehensive overview and assessment of the international politics of the Asia Pacific since the end of the Cold War seeking to address the overarching question of how we can most convincingly explain the central dynamics of Asia's international relations Via a realist perspective on the dynamics and frictions associated with accommodating the rise of powerful states this timely book addresses the core issue in contemporary Asian politics the rise of China The contributors expertly evaluate China's rise and the impact it has had on the dynamics of regional relations in North East and South East Asia It demonstrates that China's economic development and its regional and international ambition increasingly conflict with the existing consensus based regional arrangements like the

ASEAN Regional Forum and the East Asian Summit mechanism As a consequence smaller states in the region increasingly resort to hedging and balancing strategies in an attempt to mitigate Chinese hegemony This leaves the region in the grip of a complex and potentially destabilizing security dilemma The book offers a compelling analysis of the problem that China presents for its region that will enlighten undergraduate students of regional political studies and international relations Postgraduate and Master s students on courses addressing East and South East Asia will also find plenty of information in this invaluable book *Rethinking Security in East Asia* J.
