Asiatic Primulas:

Asiatic Primulas Roy Green, 1976 *Primula* John Richards, 2014-11-24 The classic text on primulas updated and revised by the leading expert Professor John Richards of the University of Newcastle. *Primula* is one of the greatest garden genera in terms of the number of varieties grown and its popularity. It is also among the largest and most widespread, with approximately 430 species. This comprehensive title covers: Major taxonomic revision; History of the exploration and introduction of *Primula*; Cultivation: temperature, soil and compost; propagation; Pests and Diseases; Evolutionary history; Biological characters used in sectional classification; Heterostyly and homostyly; Phyletic scheme for the sections of *Primula*; Synopsis of the genus *Primula*. This thorough revision brings this definitive reference work right up to date and incorporates new and improved information for most of the species. For the first time, identification keys are included for all species and other special features include several newly described species, over 30 new illustrations and important fresh details on the evolutionary history of *Primulas* from recent DNA evidence, leading to major changes in classification. The book covers the historical and practical information on the exploration and cultivation of the genus, the evolution of the species, and a chapter on heterostyly and homostyly includes the latest developments in this fascinating subject. However, the bulk of the book is given over to a systematic treatment of each species, including valid name and place of publication, synonym, description, chromosome number, breeding behaviour and flowering time, distribution, habitat, including altitudinal range, taxonomic and other general notes, variation, cultivation, hybridization. Primulas for Garden and Greenhouse Euan Hillhouse Methven Cox, George Crosbie Taylor, 1947 **Primulas, Old and New** Jack Wemyss-Cooke, 1985 **We Made a Garden** Margery Fish, 2024-06-06 An elegant new edition of a classic book from one of the twentieth century's greatest garden writers. This landmark work on creating a garden was first published in 1956 and has rarely been out of print since. *We Made a Garden* is the story of how Margery Fish, one of the leading British gardeners of the mid 20th century, and her husband Walter transformed an acre of wilderness into a stunning cottage garden still open to the public at East Lambrook Manor, Somerset, England. Quirky and readable, this book details her creation of a world-renowned cottage garden, as well as her battles with Walter in the process, who preferred the standard suburban approach. In this beautiful and timeless work, she recounts the trials and tribulations, the successes and failures of her venture, with ease and humour. Topics covered are colourful and diverse, ranging from the most suitable hyssop for the terraced garden, through composting, hedges and making paths, to the best time to lift and replant tulip bulbs. This book has been hailed as everything from a blueprint for the creation of a modern cottage garden to a feminist manifesto, and the author's practical knowledge, imaginative ideas and general good sense will encourage and inspire gardeners everywhere. **The Primula**, 1886 Horticultural Flora of South-Eastern Australia Roger Spencer, 1997 Flowering Plants Dicotyledons Part 1 is the second in the series.
