Isaac Asimov's Guide to Earth and Space Isaac Asimov, 2011-04-27 A thrilling nonfiction tour of the cosmos that brings the universe down to Earth from one of the all time masters of science fiction No one makes sense out of science like Isaac Asimov Are you puzzled by pulsars Baffled by black holes Bewildered by the big bang If so here are succinct crystal clear answers to more than one hundred of the most significant questions about the essential nature of the universe questions that have fired the imagination since the beginning of history Over the course of this fantastic voyage the origins the discoveries and the stunning achievements of astronomy will unfold before your eyes You will experience close encounters with giant planets exploding stars distant galaxies and more For anyone who has ever asked the ultimate questions who has ever looked up at the sky and asked What in heaven is going on Isaac Asimov's unique vision skill and authority will bring the big picture into focus A fine introduction to modern astronomical theory Library Journal      Asimov's Gt Science Isaac Asimov, 1972-06-08 Reports on recent advances in the physical and biological sciences to aid the general reader in understanding modern scientific phenomena      Asimov's Guide to Science 2 Isaac Asimov, 1972 Isaac Asimov gives an explanation of living cells and the chemistry of life evolution and the family tree of the animal world human behaviour and the human brain      *Conversations with Isaac Asimov* Isaac Asimov, 2005 Collected interviews with the popular and influential author considered to be one of the founding fathers of modern science fiction      Isaac Asimov's Guide to Earth and Space ,      **Isaac Asimov** Philip Wolny, 2014-07-15 Chemist Isaac Asimov was acclaimed for his fiction and nonfiction writing As a Russian Jewish immigrant Asimov told stories from an early age Among the most celebrated is his Foundation Trilogy which earned numerous awards and led him to become one of the most widely respected authors of the twentieth century He expanded on some of his early ideas in novels and stories including his beloved Robot novels Asimov made science accessible and entertaining for everyone and is credited with popularizing hard science fiction which attempts a realistic imagining of humans using science and technology within imaginary worlds and universes      *The ABC's of Science* Giuseppe Mussardo, 2020-11-05 Science with its inherent tension between the known and the unknown is an inexhaustible mine of great stories Collected here are twenty six among the most enchanting tales one for each letter of the alphabet the main characters are scientists of the highest caliber most of whom however are unknown to the general public This book

goes from A to Z The letter A stands for Abel the great Norwegian mathematician here involved in an elliptic thriller about a fundamental theorem of mathematics while the letter Z refers to Absolute Zero the ultimate and lowest temperature limit 273 15 degrees Celsius a value that is tremendously cooler than the most remote corner of the Universe the race to reach this final outpost of coldness is not yet complete but similarly to the history books of polar explorations at the beginning of the 20th century its pages record successes failures fierce rivalries and tragic desperations In between the A and the Z the other letters of the alphabet are similar to the various stages of a very fascinating journey along the paths of science a journey in the company of a very unique set of characters as eccentric and peculiar as those in *Ulysses* by James Joyce the French astronomer who lost everything even his mind to chase the transits of Venus the caustic Austrian scientist who perfectly at ease with both the laws of psychoanalysis and quantum mechanics revealed the hidden secrets of dreams and the periodic table of chemical elements the young Indian astrophysicist who was the first to understand how a star dies suffering the ferocious opposition of his mentor for this discovery Or the Hungarian physicist who struggled with his melancholy in the shadows of the desert of Los Alamos or the French scholar who was forced to hide her femininity behind a false identity so as to publish fundamental theorems on prime numbers And so on and so forth Twenty six stories which reveal the most authentic atmosphere of science and the lives of some of its main players each story can be read in quite a short period of time basically the time it takes to get on and off the train between two metro stations Largely independent from one another these twenty six stories make the book a harmonious polyphony of several voices the reader can invent his her own very personal order for the chapters simply by ordering the sequence of letters differently For an elementary law of Mathematics this can give rise to an astronomically large number of possible books all the same but then again all different This book is therefore the ideal companion for an infinite number of real or metaphoric journeys
