## Ask About Animals:

**Questions Kids Ask about Animals** Alison Dickie, Richard Comely, 1988      *Ask An Animal* Miranda Smith, 2012-01-03  
How can some animals change color when we can't? How can they grow new limbs when one gets broken? How can they hear sounds we can't hear or predict a storm long before we can? If you want to know the answer to these and many other questions, just ask an animal. This brightly colored kid-friendly hardcover reference book is packed to the gills with trunkfuls of animal information. Animals use different skills to perform these extraordinary feats, so for each question, there are answers from several creatures, each of whom has developed his or her own special skills. On each page, there is a box explaining how humans try to emulate these animal super skills with varying degrees of success. The book is divided into four sections, each dealing with different aspects of animal skills: Chapters on the physical traits and feats of animals, their senses, their climates and habitats, and their extreme skills will leave readers with a plethora of details about their friends in the animal kingdom. Complete with a glossary and an index, this is a handy reference book for any curious child.      *Ask Your Animal* Marta Williams, 2008  
**DOMESTIC ANIMALS PETS** Marta Williams takes communicating with the animals in our lives a few steps further by offering concrete suggestions for specific animal issues. Starting with a basic overview of what it means to communicate intuitively with animals, Marta goes on to offer case studies of how such communication can work. Marta guides readers step by step to a new understanding of how and when animals communicate and teaches simple ways to begin interpreting and testing the signals animals give to humans. The particular focus of this book is solving common animal behaviour issues. Perhaps a dog constantly barks or lunges, or a cat goes missing or won't eat. Or a horse shies and won't respond to training. All of these issues and more are dealt with through examples, exercises, and case studies.      **Asking Animals** Birte Nielsen, 2020-03-20  
This book provides an introductory text covering the use and misuse of behaviour tests applied to animals. By including illustrative examples from a variety of species, the book inspires the animal scientist to think about what a given behavioural test can be used for and how the results can be interpreted. This text includes the dos and don'ts of running behaviour tests and interpreting the results, many clear simple illustrations which make the information readily accessible, down to earth practical advice, yet a thorough evidence-based approach. Information on behaviour tests for a whole range of species from companion, farm, zoo, laboratory, and wild animals. Succinct yet comprehensive text designed to be read cover to cover and stimulate further reading. This book is an essential item in the researcher's toolkit when embarking on and devising any animal behaviour test and is valuable to students, established researchers, teachers, and practitioners of applied ethology, animal welfare science, and veterinary science.      *Animals (Questions Kids Ask)* Grolier, Limited, 1992-01-01      *Let's Ask the Animals!*, 2024      Questions People Ask about Animals in Research American Physiological Society (1887-), 2001\*      Speaking for Animals Margo DeMello, 2013  
This text contributes to the growing field of human-animal studies by examining the human impulse evidenced in blogs, social networking sites, video games, comic

books and animal welfare literature to ventriloquize the animal voice      **The Animals' Agenda** Marc Bekoff, Jessica Pierce, 2017-04-18 A compelling argument that the time has come to use what we know about the fascinating and diverse inner lives of other animals on their behalf Every day we are learning new and surprising facts about just how intelligent and emotional animals are did you know rats like to play and laugh and also display empathy and the ears and noses of cows tell us how they're feeling At times we humans translate that knowledge into compassion for other animals think of the public outcry against the fates of Cecil the lion or the captive gorilla Harambe But on the whole our growing understanding of what animals feel is not resulting in more respectful treatment of them Renowned animal behavior expert Marc Bekoff and leading bioethicist Jessica Pierce explore the real world experiences of five categories of animals beginning with those who suffer the greatest deprivations of freedoms and choice chickens pigs and cows in industrial food systems as well as animals used in testing and research including mice rats cats dogs and chimpanzees Next Bekoff and Pierce consider animals for whom losses of freedoms are more ambiguous and controversial namely individuals held in zoos and aquaria and those kept as companions Finally they reveal the unexpected ways in which the freedoms of animals in the wild are constrained by human activities and argue for a more compassionate approach to conservation In each case scientific studies combine with stories of individual animals to bring readers face to face with the wonder of our fellow beings as well as the suffering they endure and the major paradigm shift that is needed to truly ensure their well being *The Animals Agenda* will educate and inspire people to rethink how we affect other animals and how we can evolve toward more peaceful and less violent ways of interacting with our animal kin in an increasingly human dominated world      *Animals and Humans* Kristina Jennbert, 2011-01-01 Animals have always been an important part of the human life world and they stand out as significant forces in the Old Norse mythology here they became imaginary creatures with strong characters In *Animals and Humans* archaeologist Kristina Jennbert explores the relationship between animals and humans in Scandinavia from the Roman Iron Age to the Viking Period Real animals and fantastical creatures in Midgard became mouthpieces for human characteristics and reflections of peoples social position Animals were of great importance in everyday life and in rituals and as metaphors in social identity and power relations In the course of time however the human view has changed and nature has increasingly been subjected to humans Through her detailed analysis Jennbert raises questions about the boundary between human and animal as well as about our ethical and moral precedence      *Animals and Society* Margo DeMello, 2021-04-13 Human animal studies is an interdisciplinary field that explores the spaces that animals occupy in human social and cultural worlds It examines the interactions humans and animals have with each other and the ways animal lives intersect with human societies Since existing social orders rely on the exploitation of animals to serve human needs the questions posed by human animal studies touch upon a wide range of fundamental issues *Animals and Society* provides a broad overview of this rapidly growing field Margo DeMello offers students and scholars a holistic and comprehensive picture of the state of inquiry into

the relationships that exist between humans and other animals She considers interactions between animals and humans in social organizations such as the family the legal system and political and religious institutions A major focus is the social construction of animals in world cultures and the way in which these social meanings are used to reinforce and perpetuate hierarchical human relationships such as racism sexism and class privilege The book also examines how different human groups construct a range of identities for themselves and for others through animals This second edition of *Animals and Society* is fully updated and expanded throughout enhancing the book's relevance for student and activist readers alike It includes many new international examples all new case studies and updated supplementary readings

**Veterinary and Animal Ethics** Christopher Wathes, Sandra Corr, Stephen May, Steven McCulloch, Martin Whiting, 2012-10-03 The first International Conference on Veterinary and Animal Ethics ICVAE held in September 2011 saw leading experts from across the world come together to discuss the most important issues of animal welfare in contemporary veterinary practice and research This is the extended proceedings of that conference enabling all those interested in this increasingly significant subject to benefit from the insights of those discussions The conference was divided into four sessions Principles of veterinary and animal ethics Justifying ends the morality of animal use Ethical analyses of animal use and Cultural political legal and economic considerations Each session contained four or five papers and these are presented here in full as well as the transcribed question and answer sessions at the end of each paper and a short post presentation reflection from each author Also included is the debate on the motion Is it better to have lived and lost than never to have lived at all which records three prepared responses to the question as well as registrants comments from the floor **KEY FEATURES**
