Aspects Of Anglosaxon And Norman Colchester Cba Research Report 39:

Aspects of Anglo-Saxon and Norman Colchester Philip Crummy, Nina Crummy, 1981 **Cultural Transition in the Chilterns and Essex Region, 350 AD to 650 AD** John T. Baker, 2006 This comparison of the archaeological evidence from the fourth to seventh centuries AD in the Chilterns and Essex regions focuses on the considerable body of place name data from the area The counties of Hertfordshire Middlesex Essex and parts of Buckinghamshire Bedfordshire and Cambridgeshire are included **Transformations of Identity and Society in Anglo-Saxon Essex** Alexander Mirrington, 2025-10-01 Transformations of Identity and Society in Anglo Saxon Essex A Case Study of an Early Medieval North Atlantic Community presents the results of a comprehensive archaeological study of early medieval Essex c AD 400 1066 This region provides an important case study for examining coastal societies of north western Europe Drawing on a wealth of new data the author demonstrates the profound influence of maritime contacts on changing expressions of cultural affiliation It is argued that this Continental orientation reflects Essex s longterm engagement with the emergent dynamic North Sea network The wide chronological focus and inclusive dataset enables long term socio economic continuity and transformation to be revealed These include major new insights into the construction of group identity in Essex between the 5th and 11th centuries and the identification of several previously unknown sites of exchange The presentation also includes the first full archaeological study of Essex under Viking rule Godliness and Governance in Tudor Colchester Laquita M. Higgs, 1998 The Tudor period was a time of extremes when Henry VIII beheaded wives and Queen Mary executed non Catholics With the ascension of Protestant Elizabeth I to the throne the borough of Colchester breathed relief and set about to establish a Godly society Historian Laquita M Higgs shows that Colchester provided one of the earliest illustrations of both the workings and tensions of Puritan town governance **The Ending of Roman Britain** A.S. Esmonde-Cleary, 2002-11 This book explains what Britain was like in the fourth century AD and how this can only be understood in the wider context of the western Roman Empire **Kings and Kingdoms of Early Anglo-Saxon England** Barbara Yorke, 2002-11 Kings and Kingdoms of Early Anglo Saxon England provides a unique survey of the six major Anglo Saxon kingdoms and their royal families examining the most recent research in this field **Kingdom, Civitas, and County** Stephen Rippon, 2018 This book explores the development of territorial identity in the late prehistoric Roman and early medieval periods Over the course of the Iron Age a series of marked regional variations in material culture and landscape character emerged across eastern England that reflect the development of discrete zones of social and economic interaction The boundaries between these zones appear to have run through sparsely settled areas of the landscape on high ground and corresponded to a series of kingdoms that emerged during the Late Iron Age In eastern England at least these pre Roman socio economic territories appear to have survived throughout the Roman period despite a trend towards cultural homogenization brought about by Romanization Although there is no direct evidence for the relationship between these socio economic zones and the Roman

administrative territories known as civitates they probably corresponded very closely The fifth century saw some Anglo Saxon immigration but whereas in East Anglia these communities spread out across much of the landscape in the Northern Thames Basin they appear to have been restricted to certain coastal and estuarine districts The remaining areas continued to be occupied by a substantial native British population including much of the East Saxon kingdom very little of which appears to have been Saxon By the sixth century a series of regionally distinct identities that can be regarded as separate ethnic groups had developed which corresponded very closely to those that had emerged during the late prehistoric and Roman periods These ancient regional identities survived through to the Viking incursions whereafter they were swept away following the English reconquest and replaced with the counties with which we are familiar today

The Architecture of Norman England Eric Fernie, 2002 This important addition to the literature is the first overall study of the architecture of Norman England since Sir Alfred Clapham's English Romanesque Architecture after the Conquest 1934 Eric Fernie a recognized authority on the subject begins with an overview of the architecture of the period paying special attention to the importance of the architectural evidence for an understanding of the Norman Conquest The second part the core of the book is an examination of the buildings defined by their function as castles halls and chamber blocks cathedrals abbeys and collegiate churches monastic buildings parish churches and palace chapels The third part is a reference guide to the elements which make up the buildings such as apses passages vaults galleries and decorative features and the fourth offers an account of the processes by which they were planned and constructed This book contains powerful new ideas that will affect the way in which we look at and analyze these buildings

Castles and Landscapes O. H. Creighton, 2005 This paperback edition of a book first published in hardback in 2002 is a fascinating and provocative study which looks at castles in a new light using the theories and methods of landscape studies

The Post-Roman Small Finds from Excavations in Colchester 1971-85 Nina Crummy, 1988

Landscapes of the Norman Conquest Trevor Rowley, 2024-01-05 For a long time the Norman Conquest has been viewed as a turning point in English history an event which transformed English identity sovereignty kingship and culture The years between 1066 and 1086 saw the largest transfer of property ever seen in English History comparable in scale if not greater than the revolutions in France in 1789 and Russia in 1917 This transfer and the means to achieve it had a profound effect upon the English and Welsh landscape an impact that is clearly visible almost 1 000 years afterwards Although there have been numerous books examining different aspects of the British landscape this is the first to look specifically at the way in which the Normans shaped our towns and countryside The castles abbeys churches and cathedrals built in the new Norman Romanesque style after 1066 represent the most obvious legacy of what was effectively a colonial take over of England Such phenomena furnished a broader landscape that was fashioned to intimidate and demonstrate the Norman dominance of towns and villages The devastation that followed the Conquest characterised by the Harrying of the North had a long term impact in the form of new planned settlements and agriculture The imposition of

Forest Laws restricting hunting to the Norman king and the establishment of a military landscape in areas such as the Welsh Marches had a similar impact on the countryside

Castle Builders Malcolm James Baillie-Hislop, 2016-10-31 In *Castle Builders* Malcolm Hislop looks at the hugely popular subject of castles from the unusual perspective of design and construction In this general introduction to the subject we discover something of the personalities behind their creation the architects and craftsmen and furthermore the techniques they employed and how style and technology was disseminated *Castle Builders* takes both a thematic and a chronological approach to the design and construction of castles providing the reader with clear lines of development Themes include earth timber and stone construction techniques the evolution of the great tower the development of military engineering the progression of domestic accommodation and the degree to which aesthetics contributed to castle design

The Roman Small Finds from Excavations in Colchester 1971-9 Nina Crummy, 1983 *Essex Archaeology and History*, 2007

The Coins from Excavations in Colchester 1971-9 Marion Archibald, 1987

Animal Bones from Excavations in Colchester, 1971-85 Rosemary-Margaret Luff, Don R. Brothwell, 1993
