**Representations of China in Latin American Literature (1987-2016)** Maria Montt Strabucchi, 2023-11-15. An Open Access edition of this book is available on the Liverpool University Press website and the OAPEN library as part of the Opening the Future project with COPIM. *Representations of China in Latin American Literature 1987-2016* analyses contemporary Latin American novels in which China is the main theme. Using China as a multidimensional term, it explores how the novels both highlight and undermine assumptions about China that have shaped Latin America's understanding of China and shows China to be a kind of literary imaginary, third term which reframes Latin American discourses of alterity. On one level, it argues that these texts play with the way that China stands in as a wandering signifier and as a metonym for Asia, a gesture that essentialises it as an unchanging other. On another level, it argues that the novels' employment of China resists essentialist constructions of identity. China is thus shown to be serving as a concept which allows for criticism of the construction of fetishized otherness and of the exclusion inherent in essentialist discourses of identity. The book presents and analyses the depiction of an imaginary of China which is arguably performative but which discloses the tropes and themes which may be both established and subverted in the novels. Chapter One examines the way in which China is represented and constructed in Latin American novels where this country is a setting for their stories. The novels studied in Chapter Two are linked to the presence of Chinese communities in Latin America. The final chapter examines novels whose main theme is travel to contemporary China. Ultimately, in the novels studied in this book, China serves as a concept through which essentialist notions of identity are critiqued.

**The Woman in Latin American and Spanish Literature** Eva Paulino Bueno, María Claudia André, 2014-01-10. Noted scholars of Latin American and Spanish literature here explore the literary history of Latin America through the representation of iconic female characters. Focusing both on canonical novels and on works virtually unknown outside their original countries, the essays discuss the important ways in which these characters represent nature, history, race, and sex, the effects of globalization, and the unknowable other. They examine how both male and female writers portray Latin American women, reinterpreting the dynamics between the genders across boundaries and historical periods. Drawing on recent theories in literary criticism, gender, and Latin American studies, these essays illuminate the women characters as conduits for the appreciation of their countries and cultures.
