Second International Conference of the International Council for Global Health Progress ICGHP held at UNESCO in Paris France on January 15-17, 1996. This conference brought together experts in many disciplines that deal with the devastating diseases of cancer and AIDS with a focus on the concerns for quality of life. The ICGHP fosters multicultural and multidisciplinary approaches to global health problems to help influence governments and other international health organizations to emphasize prevention and care of diseases and to understand their scientific, social, and cultural features. The Council encourages the interchange of information on health problems and policy and supports educational funding for the public at large. Its objective is to effect disease-free lives in the world community. Participants of the conference included scientists, sociologists, government leaders, physicians, health care providers, epidemiologists, religious leaders, company officials, ethicists, and philosophers. They examined and discussed the many variables involved in quality of life for people affected with cancer and with AIDS. The volume's text begins with introductory comments by officials attending the ICGHP conference. Subsequently, a chapter is dedicated to one aspect of quality of life: be it definition, scientific research, evolution, cultural changes, ethics, measurements, or other issues dealing with health care and treatment survival. The second part of the volume includes commentaries dealing with five aspects of quality of life which merit consideration. **Monthly Labor**
