Assaults Within Psychiatric Facilities:

Assaults Within Psychiatric Facilities John R. Lion, William H. Reid, 1983 **Assaults Within Psychiatric Facilities**
John R. Lion, William H. Reid, 1985 Handbook of Modern Hospital Safety William Charney, 2009-07-28 It is ironic that those whose job it is to save lives often find themselves injured in the course of performing their duties In fact according to the Bureau of Labor Statistics healthcare workers have higher injury rates than agriculture workers miners and construction workers The Handbook of Modern Hospital Safety Second Edition covers expo **Workplace Violence in Mental and General Healthcare Settings** Michael R. Privitera, 2010-04-28 The American Psychiatric Foundation Manfred Guttmacher Award Winner for 2012 Workplace Violence in Mental and General Health Settings provides clinicians health care administrators law enforcement professionals and educators with an easily accessible cross disciplinary approach to preventing and controlling violence in the workplace This book condenses the vast literature available on workplace violence and renders it operational allowing readers to rapidly digest important concepts and put them into action in real world settings Workplace Violence in Mental and General Health Settings draws on knowledge from fields beyond medicine to provide a comprehensive resource on everything from organizational and emergency room violence to self defense techniques for the health care professional More than any other this book guides the reader from theory to practical application of prevention and management methods in the workplace Key Features An explanation of violence terminology to enhance readability New information on how workplace violence affects quality of care Steps to manage high volume emergency room violence Specific training protocol to prevent workplace violence A free CD Rom containing sample workplace violence guidelines powerpoints internet links and more **Violence among the Mentally III** Sheilagh Hodgins, 2012-12-06 The NATO Advanced Study Institute on the Prevention of Crime and Violence Among the Mentally III was held in May 1999 in Tuscany Italy Participants from 15 countries attended Since care for persons with mental illness schizophrenia major depression bipolar disorder delusional disorder atypical psychoses has been deinstitutionalized some persons with these disorders are committing crimes and serious violence Consequently societies around the world are confronted with a new challenge to provide mental health care and social services to mentally ill persons in a humane way that will prevent illegal behaviours Research in this field has been dominated by investigations designed to improve clinicians accuracy in predicting violent behaviours with little attention focused on the organization and implementation of treatments The premise of the Advanced Study Institute was that treatments must have empirically proven efficacy Both professional ethics and public accountability require empirical evidence that each treatment will alleviate the problem that it targets However despite the fact that Western industrial societies provide treatment for mentally ill persons who have offended there is a very limited base of knowledge on what constitutes effective treatment and how such treatments should be organized and delivered The Advanced Study Institute was an attempt to stimulate and encourage research that will extend this

knowledge base The goals were to review what is known about mentally ill offenders and about effective treatments for them and to provide a framework for the orientation of future investigations designed to improve treatment efficacy

Violence and Health Care Professionals Til Wykes, 2013-11-11 Til Wykes BACKGROUND The recent publication of several surveys on violence was the impetus for this book The first was carried out in 1986 by the Health and Safety Commission Health Services Advisory Committee 1987 They conducted a comprehensive survey of the incidence of violence to 5000 workers in five separate health districts The results from the 3000 people who eventually replied made many in the caring professions worried One in 200 workers had suffered a major injury following a violent attack during the previous year and a further one in ten needed first aid following an assault Other surveys also showed high risks of social service staff 6% had suffered an attack in the past 5 years Saunders 1987 and

sodal workers were at even higher risk 29% had been assaulted in the last 3 years Rowett 1986 In addition 4% of general practitioners had experienced an attack resulting in injury in the past year D Urso and Hobbs 1989 Clinical psychologists were also at risk 53% had been assaulted at least once during their professional career and 18% in the past year Perkins 1991 Media reports of extreme violence seem to be the tip of the iceberg Many staff are attacked and some of these attacks have serious physical or psychological consequences that interfere with the victim's ability to return to their full working capacity This loss of highly trained staff should be recognized by employers and the community

Nursing Staff in Hospitals and Nursing Homes Institute of Medicine, Committee on the Adequacy of Nursing Staff in Hospitals and Nursing Homes, 1996-03-27 Hospitals and nursing homes are responding to changes in the health care system by modifying staffing levels and the mix of nursing personnel But do these changes endanger the quality of patient care Do nursing staff suffer increased rates of injury illness or stress because of changing workplace demands These questions are addressed in *Nursing Staff in Hospitals and Nursing Homes* a thorough and authoritative look at today's health care system that also takes a long term view of staffing needs for nursing as the nation moves into the next century The committee draws fundamental conclusions about the evolving role of nurses in hospitals and nursing homes and presents recommendations about staffing decisions nursing training measurement of quality reimbursement and other areas The volume also discusses work related injuries violence toward and abuse of nursing staffs and stress among nursing personnel and examines whether these problems are related to staffing levels Included is a readable overview of the underlying trends in health care that have given rise to urgent questions about nurse staffing population changes budget pressures and the introduction of new technologies *Nursing Staff in Hospitals and Nursing Homes* provides a straightforward examination of complex and sensitive issues surround the role and value of nursing on our health care system

Aggression and Violence David M. Stoff,Robert B. Cairns,2014-02-04 Conceived at a time when biological research on aggression and violence was drawn into

controversy because of sociopolitical questions about its study this volume provides an up to date account of recent biological studies performed mostly on humans A group of scientists recognized the importance of freedom of inquiry and deemed it vital to address the most promising biological research in the field The focus on biological mechanisms is not meant to imply that biological variables are paramount as a determinant of violence Rather biological variables operate in conjunction with other variables contributing to aggression or violence and a complete understanding of this phenomenon requires consideration of all influences bearing on it This book will familiarize readers with the rapidly growing and increasingly significant body of knowledge on the biological bases of human antisocial aggressive and violent behaviors The editors concentrated on biological influences that support the basic physiological and biochemical processes of the brain and did not cover those biological influences that impact on the health of the individual such as head injury pregnancy and birth complications diet and exposure to lead and other toxins They focused on biological influences to illuminate their role in the complex behavioral phenomenon of violence Three different approaches to the biological study of human antisocial aggressive and violent behaviors are represented genetic neurobiological and biosocial Representing each of these three approaches individual chapters from investigators in psychobiology biological psychiatry and basic clinical neurosciences address the most recent experimental findings methods theory and common misconceptions in the biological study of aggression and violence The areas of primary focus are behavior and molecular genetics neurochemistry and hormones neuroimaging psychophysiology and developmental psychobiology Generally speaking investigators following these different approaches have experience in different scientific backgrounds select different methods generate different analyses employ different conceptual definitions for some of the same terms and assume a different philosophical stance in attempting to explain violence Nevertheless all are united in their efforts to understand the biological underpinnings of violence This book then assumes a comprehensive approach wherein different levels of analysis and different approaches inform each other It is clear from the studies reported that aggression and violence are multidetermined phenomena and understanding them requires an interdisciplinary approach spanning economic sociopolitical psychological sociological and criminological as well as biomedical considerations Nature biology and nurture experience context are fundamentally inseparable in explaining aggression and violence biology may affect experience or context but experience or context also influences biology Both need to be studied in a search for explanations of this phenomena
