Assessing Building Performance:

Building Performance Evaluation Wolfgang F.E. Preiser, Andrea E. Hardy, Ulrich Schramm, 2017-08-30 The main aim of this book is to present an intriguing retrospective of Building Performance Evaluation BPE as it evolved from Post Occupancy Evaluation POE over the past 25 years On one hand this is done by updating original authors chapter content of Building Evaluation the first edition published in 1989 That in turn is augmented by an orientation toward current and future practice on the other including new authors who are engaged in ongoing cutting edge projects Therefore individual methodology oriented chapters covering the fundamental principles of POE and BPE go along with major thematic chapters topics of which like sustainability or integration of new technologies are addressed in a diversity of case studies from around the globe Research methodologies and framework of POEs continue to evolve POEs are one step on the larger scale of BPE in understanding how buildings function after they are occupied This resource helps architects building owners and facility managers understand the implications and reactions to the facilities that they designed built and or commissioned By considering the whole process from conception to future uses of the building there can be a more holistic approach to the planning programming design construction occupancy and future adaptability of the structure This book is dedicated to first editor Wolfgang F E Preiser who passed away during the process of editing and reviewing chapters of this volume

Assessing Building Performance Wolfgang F. E. Preiser, Jacqueline Vischer, 2005 The contributors in this volume introduce readers to methods of assessing building performance illustrated with case studies from around the world

Enhancing Building Performance Shauna Mallory-Hill, Wolfgang F. E. Preiser, Christopher G. Watson, 2012-03-05 Building Performance Evaluation BPE informs and enhances the usability and sustainability of building designs with lessons learned from evaluation of building performance throughout the building life cycle from initial planning through occupancy to adaptive re use A key feature of BPE is that it examines design and technical performance of buildings alongside human performance criteria That is it seeks to examine facilities in order to determine whether they will work for the people that will use and occupy them Rigorous BPE helps to improve design practice by providing feedback on the effectiveness of the choices made about the building to ensure that its design is optimised for stakeholders uses The overarching theme for *Enhancing Building Performance* is to present the next generation of BPE work The book provides an updated systematic approach for BPE as well as chapters written by experts from around the world who demonstrate how to apply BPE to enhance building design Topics covered include evidence based and integrative design processes evaluation methods and tools and education and knowledge transfer In addition case studies provide specific examples of how BPE has been used to study such things as the impact of workplace design on human productivity and innovation Written primarily for design professionals and facility managers who wish to use BPE to deliver improved building performance that is responsive to the needs of stakeholders *Enhancing Building Performance* will also be of great value to researchers and students across a range

of architecture and construction disciplines **Assessing Building Performance** Wolfgang Preiser, Jacqueline Vischer, 2006-08-11 The building performance evaluation BPE framework emphasizes an evaluative stance throughout the six phases of the building delivery and life cycle 1 strategic planning needs analysis 2 program review 3 design review 4 post construction evaluation review 5 post occupancy evaluation and 6 facilities management review adaptive reuse The lessons learned from positive and negative building performance are fed into future building delivery cycles The case studies illustrate how this basic methodology has been adapted to a range of cultural contexts and indicates the positive results of building performance assessment in a wide range of situations Building Performance Analysis Pieter de Wilde, 2018-07-23 Explores and brings together the existent body of knowledge on building performance analysis Shortlisted in the CIBSE 2020 Building Performance Awards Building performance is an important yet surprisingly complex concept This book presents a comprehensive and systematic overview of the subject It provides a working definition of building performance and an in depth discussion of the role building performance plays throughout the building life cycle The book also explores the perspectives of various stakeholders the functions of buildings performance requirements performance quantification both predicted and measured criteria for success and the challenges of using performance analysis in practice Building Performance Analysis starts by introducing the subject of building performance its key terms definitions history and challenges It then develops a theoretical foundation for the subject explores the complexity of performance assessment and the way that performance analysis impacts on actual buildings In doing so it attempts to answer the following questions What is building performance How can building performance be measured and analyzed How does the analysis of building performance guide the improvement of buildings And what can the building domain learn from the way performance is handled in other disciplines Assembles the current body of knowledge on building performance analysis in one unique resource Offers deep insights into the complexity of using building performance analysis throughout the entire building life cycle including design operation and management Contributes an emergent theory of building performance and its analysis Building Performance Analysis will appeal to the building science community both from industry and academia It specifically targets advanced students in architectural engineering building services design building performance simulation and similar fields who hold an interest in ensuring that buildings meet the needs of their stakeholders *Building Performance Evaluation in Non-domestic Buildings* Michelle Agha-Hosseini, Sarah Birchall, Saryu Vatal, 2015 This guide explains how to use Building Performance Evaluation BPE to address issues of inefficiency and user dissatisfaction It is a general introduction to BPE and explains why it is important and how it can be carried out **Building Performance Evaluation in Domestic Buildings** Michelle Agha-Hosseini, Sarah Birchall, Saryu Vatal, 2016 **Post-Occupancy Evaluation (Routledge Revivals)** Wolfgang F. E. Preiser, Edward White, Harvey Rabinowitz, 2015-07-24 Post occupancy evaluation focusing on building occupants and their needs provides insight into the consequences of past design decisions and forms a sound basis for

creating better buildings in the future This book first published in 1988 includes a review of the evolution of the field a conceptual frame work for POE and pragmatic information on planning conducting and reporting POEs Post Occupancy Evaluation categorizes the approaches to building evaluation by describing the three levels of POE effort indicative investigative and diagnostic each differing in terms of time resources and personnel needed In its scope Post Occupancy Evaluation is both comprehensive and specific professionals in the design and planning disciplines will find it an invaluable resource for understanding the theory behind POE s and the procedures needed to put the theory into practice **Building Performance** Gerald Davis,1986 *Sustainable Construction* Charles J. Kibert,2022-04-12 SUSTAINABLE CONSTRUCTION DISCOVER THE LATEST EDITION OF THE LEADING TEXTBOOK ON SUSTAINABLE CONSTRUCTION AND GREEN BUILDING In the newly revised Fifth Edition of Sustainable Construction Green Building Design and Delivery the late Dr Charles J Kibert delivers a rigorous overview of the design construction and operation of high performance green buildings In the leading textbook on sustainable building the author provides thoroughly updated information on everything from materials selection to building systems Updated to reflect the latest building codes and standards including LEED v4 1 the book offers readers coverage of international green building codes and standards biomimicry ecological design focused assessment systems like SITES EDGE WELL and Fitwell and sustainable construction resilience Readers will learn to think critically about all aspects of green building and benefit from the inclusion of A thorough introduction to sustainable construction including the landscape for green buildings sustainable development sustainable design and the rationale for high performance green buildings An exploration of the foundations of green buildings including biomimicry and ecological design basic concepts and vocabulary and the green building movement Practical discussions of ecological design including a historical perspective contemporary ecological design In depth examinations of high performance green building assessment including focused assessment systems and international building assessment systems Perfect for upper level undergraduate and graduate level students in architecture architectural technology civil engineering and construction management Sustainable Construction is also an indispensable resource for anyone studying for the LEED Green Associate exam as well as industry professionals and building owners **Building Energy Performance Assessment in Southern Europe** Simone Ferrari,Valentina Zanutto,2015-10-16 This book discusses the issues relevant to the evaluation of the thermal energy balance of buildings in southern Europe and equips readers to carry out optimal building energy performance assessments taking into account the peculiarities of the climatic context Evaluation of building energy performance in this region is complex since the significant need for cooling means that the effect of thermal capacity glazed surfaces and ventilation and shading strategies have to be carefully considered when determining the indoor operative temperatures This is fully explained and critical issues in the application of the commonly employed simplified procedures and assumptions are identified In addition to the theoretical analysis there are case studies that explore the energy performances of a set of

typical building typologies within the variability of the Italian climate considered as representative of conditions in southern Europe These descriptions will support energy consultants and other stakeholders in assessing building energy performances beyond the mere simplified standard assumptions Furthermore the numerous graphs and tables documenting data can be easily adopted to serve as design advice tools for both new constructions and retrofits

Biomimicry and Sustainable Building Performance Olusegun Aanuoluwapo Oguntona, Clinton Ohis Aigbavboa, 2024-02-01 This book on biomimicry assessment tools studies the concepts of sustainability sustainable construction practices and the evaluation categories that constitute a sustainability assessment tool By exploring and drawing lessons from biomimicry principles the book provides a nature inspired assessment tool to aid and guide the sustainable transformation of the built environment The book encapsulates the attributes of the conceptualised biomimicry assessment tool which is aimed at helping practitioners regulatory bodies and governmental and non governmental agencies in greening the built environment Owing to the dire need for country specific and tailor made tools that address developing countries needs this book serves as a practical reference and theoretical springboard for the development of sustainability assessment tools for the built environment Furthermore the book serves as a guide in navigating the path towards achieving the greening agendas of the built environment and other sectors and seeks to align the new biomimicry assessment tool with the UN Sustainable Development Goals SDGs It is important reading for academics professionals and advanced students in the built environment engineering and sustainable development

Innovations for Sustainable Building Design and Refurbishment in Scotland Branka Dimitrijević, 2013-11-08 This book presents innovations for sustainable building design and refurbishment developed and tested through feasibility studies undertaken by researchers at Scottish universities in collaboration with small to medium size enterprises in Scotland during the CIC Start Online project that ran from September 2009 to February 2013 The project was led by Glasgow Caledonian University in collaboration with Edinburgh Napier University Glasgow School of Art Heriot Watt University the Robert Gordon University University of Edinburgh and the University of Strathclyde Glasgow The book includes chapters on Context and Policies Planning Building Design Technologies Construction Refurbishment and Performance The contents of each chapter are based on 63 completed studies that were initiated by businesses operating in the construction sector or providing services to the sector indicating the scope of research required to assist the industry to develop more sustainable products and processes The book informs the reader about the range of innovations that were tested and highlight potential future research areas Readers can find in depth information by accessing the project website www.cicstart.org where full reports on most studies and the video

recordings of interactive online seminars that presented the outcomes of the studies are available Along with the new knowledge on how innovations for sustainable building design and refurbishment can be applied in practice the book demonstrates how joint projects of several universities can be successfully managed and how an immediate knowledge transfer can be organized by using web tools to reach over 2 200 current members nationally and internationally in UK and 53 other countries

Building Futures Jane Powell,Jennifer Monahan,Chris Foulds,2015-11-24 A reduction in the energy demand of buildings can make a major contribution to achieving national and international carbon reduction goals in addition to addressing the interlinked issues of sustainable development fuel poverty and fuel security Despite improvements in thermal efficiency the energy demand of buildings stubbornly remains unchanged or is only declining slowly due to the challenges posed by growing populations the expectations of larger more comfortable and better equipped living spaces and an expanding commercial sector Building Futures offers an interdisciplinary approach to explore this lack of progress combining technical and social insights into the challenges of designing constructing and operating new low energy buildings as well as improving the existing inefficient building stock The twin roles of energy efficiency which is predominantly concerned with technological solutions and energy conservation which involves changing peoples behaviour are both explored The book includes a broad geographical range and scale of case studies from the UK Europe and further afield including Passivhaus in Germany and the UK Dongtan Eco City in China and retrofit houses in Denmark This book is a valuable resource for students and academics of environmental science and energy based subjects as well as construction and building management professionals

Building Pathology David S. Watt,2009-05-12 Building pathology provides an interdisciplinary approach to the study of defects and performance in order to develop appropriate remedial and management solutions It considers how the structure and materials of a building relate to its environment its occupants and the way the building is used so as to develop a better understanding of building failures This book provides a well illustrated introduction to the discipline of building pathology bridging the gap between current approaches to the surveying of buildings and the detailed study of defect diagnosis prognosis and remediation It features a number of case studies and a detailed set of references and further reading This second edition has been updated to reflect changes in legislation guidance and construction and provides new case studies that demonstrate the breadth and depth of the subject

levels in the building sector The first chapter introduces the topic and its importance providing data on the impact of the building sector and the construction industry The following chapters are dedicated respectively to tools and protocols for cities and neighbourhood sustainability assessment tools and protocols for buildings sustainability assessment and certification and for building materials and components Finally this book includes an overview of the legislation and standards in the field and case studies to exemplify the application of the different tools and labels This is a key reference for decision makers researchers scholars students and professionals approaching research and work in the field of energy and environmental impact of the building sector be they engineers architects planners owners developers or facility managers

Building Evaluation Wolfgang F.E. Preiser, 2013-12-14 This book is about building evaluation in the broadest sense and it transcends the meaning and conventional boundaries of the evolving field of post occupancy evaluation by focusing on evaluation throughout the building delivery process This process is seen not just as being linear with a product in mind i e the completed and occupied building but rather it is seen as a cyclic evolution which has as its goal the continuous improvement of the quality of buildings This goal can only be accomplished if evaluation occurs throughout the building delivery process and if 1 the evaluation that does occur is systematic and rigorous 2 the data that is obtained can be fed into data bases and clearinghouses for use in future generations of buildings and 3 there is continuity in information flow The idea for this book originated with a symposium that was part of a conference held at the Technical University in Delft Netherlands in July of 1988 i e IAPS 10 the tenth biannual conference of the International Association for the Study of People and their Physical Surroundings Authors presented papers based on their book chapters and discussions ensued about the expanded boundaries of the field about theoretical methodological and practical issues as well as applications in building evaluation Other relevant topics were identified and several additional authors were invited to participate in order to round out the contents of this book [A Practical Guide to Post-Occupancy Evaluation and Researching Building User Experience](#) Nigel Oseland, 2023-09-11 A Practical Guide to Post Occupancy Evaluation offers high level pragmatic guidance and case study examples on how to conduct a Post Occupancy Evaluation POE to determine whether a workplace project is successful and uncover the lessons learned for future projects For designers POEs provide essential predesign feedback informing the design brief to determine occupant requirements and help focus expenditure For those in charge of a building or buildings POE offers proactive building management and can also be used as part of the change management programme in larger projects informing the occupants of progress The practical guidance offered in this book will help the workplace industry understand if a design meets the requirements of an occupier and measure the success of and value offered by a workplace project This book will be of interest to professionals in the workplace industry responsible for delivering and evaluating capital projects as well as those studying interior design architecture surveying facilities management and building services engineering **Workplace Strategies and Facilities Management** Rick Best, Gerard de Valence, Craig

Langston,2007-08-22 This book provides comprehensive coverage of issues that facility managers in the property industry need to understand and apply in the pursuit of value for money over the life span of built facilities The authors introduce the fast growing discipline of facility management examine the core competencies that facility managers should possess and study different contemporary drivers of change The book emphasises the need to consider facilities management issues at the pre design stage of the construction process rather than only when the building is completed in order to maximise value for money
