Lindsey,2002-03-11 Over recent years the policy of isolating and institutionalizing mentally handicapped people has gradually been dismantled and a major shift to community care has taken place But integration within the general community and access to special services has greatly increased the number of people with a need to know about mental handicap Each profession or discipline has its own terminology nowadays one must be conversant with all of them In this comprehensive dictionary Mary Lindsey has brought together terms and concepts from a wide variety of fields Approximately 2 400 entries are included ranging in length from concise explanations to encyclopaedic essays but always expressed in clear simple language Where appropriate suggestions for further reading are made and possible sources of further information given An extensive system of cross references leads the interested reader further and makes valuable connections between entries The medical aspects of mental handicap its causes prognoses and treatments are of course covered in detail But although the cause of mental handicap may be medical subsequent interventions may be sociological psychological educational medical paramedical or psychiatric This is reflected in the choice of entries making the Dictionary an invaluable source of reference for all those involved with mentally handicapped people in any capacity whatsoever Assessing Adults with Intellectual Disabilities James Hogg,Arturo Langa,2008-04-15 This handbook helps professionals working with adults with intellectual disabilities to establish the needs of individuals through systematic assessment and to monitor and evaluate the effectiveness of the service they provide A comprehensive handbook for professionals working with adults with intellectual disabilities Enables these professionals to establish the needs of individuals Helps them to monitor and evaluate the effectiveness of the service they provide Expert contributions include conceptual chapters and descriptions of selected assessment instruments Covers the full spectrum of need including adults with mental health difficulties behavioural problems forensic needs and assessment of people with profound intellectual and multiple disabilities and those suspected of developing dementia Ageing and Mental Handicap James Hogg,Steve Moss,Diana Cooke,2024-05-10 In the 1980s there was growing interest in the topic of ageing and learning disabilities for two principal reasons First the life expectancy of people with learning disabilities had risen significantly over the previous decades and many once infancy had been survived could expect a life span similar to that of non disabled people Secondly a growing commitment on the part of the government and service providers to make provision for people with disabilities in the community rather than in institutions had focused attention on this group Originally published in 1988 reissued here with a new foreword this book was one of the first on this
