Rédigé par une équipe de chercheurs expérimentés et de cliniciens chevronnés, cette deuxième édition aborde les addictions avec et sans substance selon une perspective bio-psycho-sociale. L'ouvrage met en évidence les points communs des différentes addictions comme la motivation, le craving et la perte de contrôle, mais il les aborde également dans leur diversité : médicaments, alcool, opiacés, cannabis, tabac, achat pathologique, sexualité compulsive, daydreaming, jeu pathologique, jeu vidéo. Les auteurs proposent les principes pratiques et spécifiques de la prise en charge pour chaque addiction dans un setting individuel, familial ou de groupe. Le lecteur y trouvera également une réflexion sur les grandes questions théoriques en rapport avec les addictions : quel est le poids des facteurs socio-démographiques, des événements de vie traumatiques, de la culture et des traits de personnalité dans le développement et le maintien de l'addiction ? Comment adapter la prise en charge en fonction de ces variables ? L'ouvrage s'appuie sur des cas concrets, des vignettes cliniques et des protocoles validés scientifiquement afin d'enrichir rapidement une pratique en addictologie et de guider les praticiens dans la prise en charge de leurs patients.

of substance and non substance addictions and addresses selected prospects that will shape future studies on addiction. Addiction is a global problem that costs millions of lives tremendous damage year after year. Based on existing evidence, both types of addiction produce negative impacts on individuals' physical, mental, social, and financial well-being and share certain common mechanisms which involve a dysfunction of the neural reward system and specific gene transcription factors.
