

"Astro Turf works well as a brief, clear history of a field; even better as a piece of cultural criticism; and best of all as a moving memoir of the difficult love between a daughter and father."

Astro Turf The Private Life Of Rocket Science:

Astro Turf M. G. Lord, 2006-02-14 The author combines a history of the Jet Propulsion Laboratory with an exploration of the effects of her father's career in rocket engineering on her family **To Touch the Face of God** Kendrick

Oliver, 2013-01-15 Was the space program the signature project of secular modernity or a symbol of humankind's perpetual quest for communion with God In the beginning God created the heavens and the earth In 1968 the world watched as Earth rose over the moonscape televised from the orbiting Apollo 8 mission capsule Radioing back to Houston on Christmas Eve astronauts recited the first ten verses from the book of Genesis In fact many of the astronauts found space flight to be a religious experience To Touch the Face of God is the first book length historical study of the relationship between religion and the U S space program Kendrick Oliver explores the role played by religious motivations in the formation of the space program and discusses the responses of religious thinkers such as Paul Tillich and C S Lewis Examining the attitudes of religious Americans Oliver finds that the space program was a source of anxiety as well as inspiration It was not always easy for them to tell whether it was a godly or godless venture Grounded in original archival research and the study of participant testimonies this book also explores one of the largest petition campaigns of the post war era Between 1969 and 1975 more than eight million Americans wrote to NASA expressing support for prayer and bible reading in space Oliver's study is rigorous and detailed but also contemplative in its approach examining the larger meanings of mankind's first adventures in the heavens The Seductions of Pilgrimage Michael A. Di Giovine, David Picard, 2016-03-09 The Seductions of Pilgrimage

explores the simultaneously attractive and repellent beguiling and alluring forms of seduction in pilgrimage It focuses on the varied discursive imaginative and practical mechanisms of seduction that draw individual pilgrims to a pilgrimage site the objects places and paradigms that pilgrims leave behind as they embark on their hyper meaningful travel experience and the often unforeseen elements that lead pilgrims off their desired course Presenting the first comprehensive study of the role of seduction on individual pilgrims in the study of pilgrimage and tourism it will appeal to scholars of anthropology cultural geography tourism heritage and religious studies William H. Pickering Douglas James Mudgway, 2007 From humble beginnings in a remote country town in New Zealand William Pickering became an icon for America's response to the

Sputnik challenge alongside Wernher von Braun and James Van Allen **Making Time on Mars** Zara Mirmalek, 2020-04-07

An examination of how the daily work of NASA's Mars Exploration Rovers was organized across three sites on two planets using local Mars time In 2004 mission scientists and engineers working with NASA's Mars Exploration Rovers MER remotely operated two robots at different sites on Mars for ninety consecutive days An unusual feature of this successful mission was that it operated on Mars time the daily work was organized across three sites on two planets according to two Martian time zones In Making Time on Mars Zara Mirmalek shows that this involved more than a resetting of wristwatches the team's struggle to synchronize with Mars time involved technological and communication breakdowns informal workarounds and

extra work to support the technology that was intended to support people Her account of how NASA created an entirely new temporality for the MER mission offers insights about the assumptions behind the organizational relationship between clock time and work Mirmalek herself a member of the mission team offers an insider s view of the MER workplace and community She describes the discord among MER s multiple temporalities and examines issues of professional identity that helped shape the experience of working according to Mars time Considering time and work relationships through a multidisciplinary lens Mirmalek shows how contemporary and historical human technology relationships inform assumptions about the unalterability of clock time She argues that the organizational connection between clock time and work although still operational is outdated

NASA and the Long Civil Rights Movement Brian C. Odom, Stephen P. Waring, 2022-04-12 Examining the ways in which NASA s goal of space exploration both conflicted and aligned with the cause of racial equality this volume provides new insights into the complex relationship between the space program and the civil rights movement in the Jim Crow South and abroad

Blue Sky Metropolis Peter J. The Province of All Mankind Stephen Buono, 2025-07-15 The Province of All Mankind is the story of a powerful idea about the cosmos Born in the science fiction literature of the nineteenth century and maturing in the Age of Apollo this idea held that outer space should be preserved as a sanctuary from human strife free

from weapons warfare and political rivalry If humanity could somehow leave violence behind as it moved into space perhaps peace would finally reign Bucking a half century of space race scholarship Stephen Buono argues that despite waging a totalizing Cold War the United States achieved stunning diplomatic successes that heralded the cosmos as a realm of peace and cooperation The early story of space politics is not primarily one of militarization but rather of political prescience and restraint The Province of All Mankind demonstrates that space became a unique domain of American foreign relations and international law and provides lessons for the Second Cold War unfolding over the horizon *Los Angeles Magazine*

Dick, Steven J. Dick, Roger D. Launius, 2006 In March 2005 the NASA History Division and the Division of Space History at the National Air and Space Museum brought together a distinguished group of scholars to consider the state of the discipline of space history This volume is a collection of essays based on those deliberations The meeting took place at a time of extraordinary transformation for NASA stemming from the new Vision of Space Exploration announced by President George W Bush in January 2004 to go to the Moon Mars and beyond This Vision in turn stemmed from a deep reevaluation of NASA's goals in the wake of the Space Shuttle Columbia accident and the recommendations of the Columbia Accident Investigation Board The new goals were seen as initiating a New Age of Exploration and were placed in the context of the importance of exploration and discovery to the American experience Amazon *A Ball, a Dog, and a Monkey* Michael D'Antonio, 2007-09-18 A Ball a Dog and a Monkey tells the remarkable story of America's first efforts to succeed in space a time of exploding rockets national space mania Florida boomtowns and interservice rivalries so fierce that President Dwight Eisenhower had to referee them When the Soviet Union launched the first orbital satellite Sputnik I Americans panicked The Soviets had nuclear weapons the Cold War was underway and now the USSR had taken the lead in the space race Members of Congress and the press called for an all out effort to launch a satellite into orbit With dire warnings about national security in the news almost every day the armed services saw space as the new military frontier But President Eisenhower insisted that the space effort which relied on military technology be supervised by civilians so that the space race would be peaceful The Navy's Vanguard program flopped and the Army led by ex Nazi rocket scientist Wernher von Braun and a martinet general named J Bruce Medaris whom Eisenhower disliked took over Meanwhile the Soviets put a dog inside the next Sputnik and Americans grew more worried as the first animal in space whirled around the Earth Throughout 1958 America went space crazy UFO sightings spiked Boys from Brooklyn to Burbank shot model rockets into

the air Space themed beauty pageants became a national phenomenon The news media flocked to the launchpads on the swampy Florida coast and reporters reinvented themselves as space correspondents And finally the Army s rocket program succeeded Determined not to be outdone by the Russians America s space scientists launched the first primate into space a small monkey they nicknamed Old Reliable for his calm demeanor And then at Christmastime Eisenhower authorized the launch of a secret satellite with a surprise aboard A Ball a Dog and a Monkey memorably recalls the infancy of the space race a time when new technologies brought ominous danger but also gave us the ability to realize our dreams and reach for the stars

Into the Black Peter J. Westwick,2008-10-01 divIn the decades since the mid 1970s the Jet Propulsion Laboratory in Pasadena California has led the quest to explore the farthest reaches of the solar system JPL spacecraft Voyager Magellan Galileo the Mars rovers and others have brought the planets into close view JPL satellites and instruments also shed new light on the structure and dynamics of earth itself while their orbiting observatories opened new vistas on the cosmos This comprehensive book recounts the extraordinary story of the lab s accomplishments failures and evolution from 1976 to the present day This history of JPL encompasses far more than the story of the events and individuals that have shaped the institution It also engages wider questions about relations between civilian and military space programs the place of science and technology in American politics and the impact of the work at JPL on the way we imagine the place of humankind in the universe DIV

Societal Impact of Spaceflight Steven J. Dick,Roger D. Launius,2007 Since the dawn of spaceflight advocates of a robust space effort have argued that human activity beyond Earth makes a significant difference in everyday life Assertions abound about the impact of spaceflight on society and its relationship to the larger contours of human existence Fifty years after the Space Age began it is time to examine the effects of spaceflight on society in a historically rigorous way Has the Space Age indeed had a significant effect on society If so what are those influences What do we mean by an impact on society And what parts of society Conversely has society had any effect on spaceflight What would be different had there been no Space Age The purpose of this volume is to examine these and related questions through scholarly research making use especially of the tools of the historian and the broader social sciences and humanities Herein a stellar array of scholars does just that and arrives at sometimes surprising conclusions

Braille Books Library of Congress. National Library Service for the Blind and Physically Handicapped,2005 *Critical issues in the history of spaceflight* Steven J. Dick,2018 *Engineers for Change* Matthew Wisnioski,2012-10-19 An account of conflicts within engineering in the 1960s that helped shape our dominant contemporary understanding of technological change as the driver of history In the late 1960s an eclectic group of engineers joined the antiwar and civil rights activists of the time in agitating for change The engineers were fighting to remake their profession challenging their fellow engineers to embrace a more humane vision of technology In *Engineers for Change* Matthew Wisnioski offers an account of this conflict within engineering linking it to deep seated assumptions about technology and American life The postwar period in America saw a near utopian

belief in technology's beneficence Beginning in the mid 1960s however society influenced by the antitechnology writings of such thinkers as Jacques Ellul and Lewis Mumford began to view technology in a more negative light Engineers themselves were seen as conformist organization men propping up the military industrial complex A dissident minority of engineers offered critiques of their profession that appropriated concepts from technology's critics These dissidents were criticized in turn by conservatives who regarded them as countercultural Luddites And yet as Wisnioski shows the radical minority spurred the professional elite to promote a new understanding of technology as a rapidly accelerating force that our institutions are ill equipped to handle The negative consequences of technology spring from its very nature and not from engineering's failures Sociotechnologists were recruited to help society adjust to its technology Wisnioski argues that in responding to the challenges posed by critics within their profession engineers in the 1960s helped shape our dominant contemporary understanding of technological change as the driver of history *Shoot for the Moon* James

Donovan, 2019-03-12 Learn why NASA astronaut Mike Collins calls this extraordinary space race story the best book on Apollo this inspiring and intimate ode to ingenuity celebrates one of the most daring feats in human history When the alarm went off forty thousand feet above the moon's surface both astronauts looked down at the computer to see 1202 flashing on the readout Neither of them knew what it meant and time was running out On July 20 1969 Neil Armstrong and Buzz Aldrin became the first humans to walk on the moon One of the world's greatest technological achievements and a triumph of the American spirit the Apollo 11 mission was a mammoth undertaking involving more than 410 000 men and women dedicated to winning the space race against the Soviets Set amid the tensions and upheaval of the sixties and the Cold War *Shoot for the Moon* is a gripping account of the dangers the challenges and the sheer determination that defined not only Apollo 11 but also the Mercury and Gemini missions that came before it From the shock of Sputnik and the heart stopping final minutes of John Glenn's Mercury flight to the deadly whirligig of Gemini 8 the doomed Apollo 1 mission and that perilous landing on the Sea of Tranquility when the entire world held its breath while Armstrong and Aldrin battled computer alarms low fuel and other problems James Donovan tells the whole story Both sweeping and intimate *Shoot for the Moon* is a powerfully written and irresistible celebration of one of humankind's most extraordinary accomplishments Booklist starred review **To Show**
