Birds of Ethiopia and Eritrea John Ash, John Atkins, 2010-06-30 This groundbreaking book fills a large hole in the literature for one of the most diverse and least known areas of Africa Ethiopia and Eritrea have a fascinating and unique avifauna Poorly known in comparison to many parts of Africa knowledge on bird distribution in the two countries is scattered throughout the literature For more than 35 years the authors have been painstakingly collecting bird records in the region and plotting them on half degree maps including published records data from museum specimens sightings from their own extensive travels and more recently records from the many birdwatchers that now visit Ethiopia The resulting atlas provides for the first time an accurate assessment of the distribution of each of the 870 species known from the two countries including valuable information on breeding The succinct text summarises the results and discusses distribution to subspecies level Extensive introductory chapters cover topics such as topography geology vegetation climate habitats conservation

Field Guide to Birds of the Horn of Africa Nigel Redman, Terry Stevenson, John Fanshawe, 2010-06-30 This is the first field guide to the birds of this fascinating region and a companion to *Birds of East Africa* by two of the same authors The Horn of Africa has the highest endemism of any region in Africa and around 70 species are found nowhere else in the world Many of these are confined to the isolated highlands of Ethiopia and Eritrea but a large number of larks specialise in the arid parts of Somalia and adjoining eastern Ethiopia whilst the island of Socotra has its own suite of endemic species The region is also an important migration route and wintering site for many Palearctic birds Over 200 magnificent plates by John Gale and Brian Small illustrate every species that has ever occurred in the five countries covered by the guide and the succinct text covers the key identification criteria Special attention is paid to the voices of the species and over 1000 up to date colour distribution maps are included This long awaited guide is a much needed addition to the literature on African birds and an essential companion for birders visiting the region

Taxonomy of the birds of the world fotolulu, 2018-10-30 How do you come up with the idea to list all the birds in the world including the subspecies and to give all birds English names There is a reason for it my favorite saying whose author is unknown Everyone said that's not possible then there was one who did not know that and just did it I am an animal photographer and probably a little bit crazy I've built a complete animal database for mammals and birds over the last decade This facilitates my work in determining and archiving images and assigning keywords especially among the many subspecies With this book I would like to give all birding friends and ornithologists a complete overview in English For this I have given unique English names to all subspecies The naming should not meet any scientific requirements The names are based on translations from the Latin name geographical distribution areas and the names of the discoverers The entries consist of the scientific name the English name the distribution areas and the author I wish you a lot of fun with this book but especially while watching the fascinating birdlife fotolulu
