## Birds In Kansas:

Birds in Kansas Max C. Thompson,1989      Birds in Kansas Max C. Thompson,1900 Kansas knows how to attract birds Located in the very center of the North American continent it straddles the Central Flyway one of the primary migration highways between Canada and South America It also contains a broad spectrum of habitats including deciduous forest grassland sagebrush and a remarkable system of internationally important wetlands As a result of this unique combination of natural features Kansas attracts most of the eastern bird fauna and many of the western and southern species as well as those northern birds that either winter on the central plains or pass through during their migratory flights The number of bird species recorded in the states is 424a total that places Kansas among the top five birding states in the country      Birds in Kansas Max C.
