north Queensland where brilliantly plumaged Superb Fruit Doves *Ptilinopus superbus* are heard more easily than seen to cold windswept heathlands of Tasmania where Brush Bronzewing *Phaps elegans* are locally common most regions of Australia are frequented by one or more species For more than a century after arrival of the First Fleet interest in these birds focused on the eating qualities of larger species In addition to contributing to declines of local populations in some parts of Australia excessive hunting brought about the extinction of two species on Lord Howe Island and another species on Norfolk Island In Pigeons and Doves in Australia Joseph Forshaw and William Cooper have summarised our current knowledge of all species including those occurring on Christmas Norfolk and Lord Howe Islands and with superb artwork have given readers a visual appreciation of the birds in their natural habitats Historical accounts of extinct species are also included Detailed information on management practices for all species is presented ensuring that Pigeons and Doves in Australia will become the standard reference work on these birds for ornithologists and aviculturists

A Guide to Bird Habitats in New South Wales Richard Massey Cooper, Ian A. W. MacAllan, 1999 The Birds of Western New South Wales Richard Massey Cooper, Ian A. W.
