Birkitts Lymphoma:

Burkitt's Lymphoma Erle S. Robertson, 2012-12-09 The study of Burkitt's lymphoma is now in its 6 decade beginning with its discovery by Dr Dennis Burkitt in equatorial Africa in the mid to late 1950's. A large body of information is available which provides a current understanding of the underlying molecular changes that are linked to the initiation and development of Burkitt's lymphoma. This proposed volume will provide a comprehensive view of Burkitt's Lymphoma from the diagnosis to potential animal models for this disease and include a view from physicians who have a up close view of the patients in populations where the disease is rampant. Forms, Effects, Risk Factors, Treatment** Patrick Kimuyu, 2017-11-21 Research Paper postgraduate from the year 2017 in the subject Health Public Health grade 1 Egerton University language English abstract. This research paper will provide an overview on Burkitt lymphoma disease and its pathophysiology. Burkitt lymphoma has become one of the most prevalent cancers in the past two decades in which the number of people with the disease has increased especially in Africa. Research indicates that Burkitt lymphoma has emerged to be the fastest growing tumor among humans. Burkitt lymphoma was identified in 1956 by Denis Burkitt and it is one of the principal forms on non

Hodgkin's lymphoma which affect immune cells Epidemiological reports indicate that Burkitt lymphoma is more prevalent in malaria endemic regions than other regions although its greatest impact is experienced in Africa where it affects children who are also experiencing episodes of malaria and Epstein Barr viral infection Epstein Barr virus is believed to be the principal cause of infectious mononucleosis which leads to the transformation of B cells into tumor cells especially following malaria episode which weakens the immune system This is probably the reason as to why 98% of Burkitt lymphoma cases in Africa are linked to Epstein Barr infection Elsewhere in the U S the incidence of Burkitt lymphoma accounts for about 1 200 people annually in which 59% of all the patients diagnosed with the disease being adults above the age of 40 years In Burkitt lymphoma lymphocytes primarily the B cells of the immune system which are involved in cell mediated immune response during pathogenic infections are affected In most cases the prevalence of the disease is enhanced by infections which weaken the immune system For instance malaria Epstein Barr viral infection and HIV are some of the diseases associated with a decrease of the immune system response In addition therapies which are immune suppressive especially those involved in organ transplantation to prevent transplant rejection and highly active antiretroviral therapy HAART used for HIV AIDS treatment facilitate the formation of cancerous B cells However the physiology and anatomy of Burkitt lymphoma encompasses diverse aspects compared to other forms cancer

Molecular Pathology of Hematolymphoid Diseases Cherie H. Dunphy, 2010-06-16 The past two decades have seen an ever accelerating growth in knowledge about molecular pathology of human diseases which received a large boost with the sequencing of the human genome in 2003 Molecular diagnostics molecular targeted therapy and genetic therapy are now routine in many medical centers The molecular field now impacts every field in medicine whether clinical research or routine patient care There is a great need for basic researchers to understand the potential clinical implications of their research whereas private practice clinicians of all types general internal medicine and internal medicine specialists medical oncologists radiation oncologists surgeons

pediatricians family practitioners clinical investigators pathologists and medical laboratory directors and radiologists require a basic understanding of the fundamentals of molecular pathogenesis diagnosis and treatment for their patients Traditional textbooks in molecular biology deal with basic science and are not readily applicable to the medical setting Most medical textbooks that include a mention of molecular pathology in the clinical setting are limited in scope and assume that the reader already has a working knowledge of the basic science of molecular biology Other texts emphasize technology and testing procedures without integrating the clinical perspective There is an urgent need for a text that fills the gap between basic science books and clinical practice In the Molecular Pathology Library series the basic science and the technology is integrated with the medical perspective and clinical application The Imaging of Tropical Diseases Philip E.S.
