[With Maps.]** Robert LATOUCHE, 1967 Max Weber and the Idea of Economic Sociology Richard Swedberg, 2018-06-05 While most people are familiar with The Protestant Ethic and the Spirit of Capitalism few know that during the last decade of his life Max Weber 1864-1920 also tried to develop a new way of analyzing economic phenomena which he termed economic sociology Indeed this effort occupies the central place in Weber's thought during the years just before his death Richard Swedberg here offers a critical presentation and the first major study of this fascinating part of Weber's work This book shows how Weber laid a solid theoretical foundation for economic sociology and developed a series of new and highly evocative concepts He not only investigated economic phenomena but also linked them clearly with political legal and religious phenomena Swedberg also demonstrates that Weber's approach to economic sociology addresses a major problem that has haunted economic analysis since the nineteenth century how to effectively unite an interest driven type of analysis popular with economists with a social one of course preferred by sociologists Exploring Weber's views of the economy and how he viewed

its relationship to politics law and religion Swedberg furthermore discusses similarities and differences between Weber's economic sociology and present day thinking on the same topic In addition the author shows how economic sociology has recently gained greater credibility as economists and sociologists have begun to collaborate in studying problems of organizations political structures social problems and economic culture more generally Swedberg's book will be sure to further this new cooperation

Lordship in the County of Maine, C. 890-1160 Richard Ewing Barton, 2004 The vision and chronology of tenth and eleventh century lordship on offer here departs from the model of feudal mutation and emphasizes two major themes the centrality of intangible charismatic elements of honor prestige and acclamation and the lack of foundation for any notion of feudal transformation while acknowledging changes in the geography of power across the tenth and eleventh centuries the argument insists that the practicalities of the practice of lordship remained essentially the same between 890 and 1160
