Launius, Janet R. balloon became an important symbol of the fledgling Third Republic and France established itself as the world leader in flight. In *Ascending Republic* Patrick Luiz Sullivan De Oliveira tells for the first time the story of this surprising revival. Through extensive research in the press and archives in France, the United States, and Brazil, De Oliveira argues that French civil society cultivated popular enthusiasm for flight, what historians call *airmindedness*, decades before the advent of the airplane. Champions of French ballooning made the case that if the British Royal Navy controlled the seas and the Imperial German Army dominated the continent, then France needed to take ownership of the skies. The French appropriated this newly imagined geopolitical space through a variety of practices: from republican savants who studied the atmosphere at high altitudes to aristocrats who organized transcontinental long distance competitions. All of this made Paris into the global capital of a thriving aeronautical culture that incorporated seemingly contradictory visions of sacrificial patriotism, aristocratic modernity, colonial anxiety, and technological cosmopolitanism. **Dayton Aviation Heritage National**

Historical Park, Ohio United States. National Park Service, 1997 **World's Great Inventors** Rajni Das, *World's Great Inventors* is an inspiring and educational book that celebrates the brilliant minds who transformed the world through innovation and creativity. To Conquer the Air James Tobin, 2012-06-12 James Tobin award winning author of *Ernie Pyle's War* and *The Man He Became* has penned the definitive account of the inspiring and impassioned race between the Wright brothers and their primary rival Samuel Langley across ten years and two continents to conquer the air For years Wilbur Wright and his younger brother Orville experimented in obscurity supported only by their exceptional family Meanwhile the world watched as Samuel Langley armed with a contract from the US War Department and all the resources of the Smithsonian Institution sought to create the first manned flying machine But while Langley saw flight as a problem of power the Wrights saw a problem of balance Thus their machines took two very different paths Langley's toward oblivion the Wrights toward the heavens though not before facing countless other obstacles With a historian's accuracy and a novelist's eye Tobin has captured an extraordinary moment in history *To Conquer the Air* is itself a heroic achievement
