Bismarck Edgar Feuchtwanger, 2014-04-03 Bismarck was arguably the most important figure in nineteenth century European history after 1815 In this biography Edgar Feuchtwanger reassesses Bismarck's significance as a historical figure He traces his development from a typical Junker a reactionary and conservative into the so called white revolutionary who recast European affairs more drastically than anyone since Napoleon This second edition includes a new introduction taking into account the most recent scholarship on Bismarck which reflects on Bismarck's legacy in modern Germany which is once again the European economic powerhouse for which Bismarck laid the foundations Feuchtwanger's lucid account demythologizes the German leader without demonising him This book leaves the reader with a strongly etched portrait of one of the decisive makers of the modern world

Aluminum Upcycled Carl A. Zimring, 2017-03-15 Tracing the benefits and limitations of repurposing aluminum Besides being the right thing to do for Mother Earth recycling can also make money particularly when it comes to upcycling a zero waste practice where discarded materials are fashioned into goods of greater economic or cultural value In Upcycling Aluminum Carl A Zimring explores how the metal's abundance after World War II coupled with the significant economic and environmental costs of smelting it from bauxite ore led to the industrial production of valuable durable goods from salvaged aluminum Beginning in 1886 with the discovery of how to mass produce aluminum the book examines the essential part the metal played in early aviation and the world wars as well as the troubling expansion of aluminum as a material of mass disposal Recognizing that scrap aluminum was as good as virgin material and much more affordable than newly engineered metal designers in the postwar era used aluminum to manufacture highly prized artifacts Zimring takes us on a tour of post 1940s design examining the use of aluminum in cars trucks airplanes furniture and musical instruments from 1945 to 2015 By viewing upcycling through the lens of one material Zimring deepens our understanding of the history of recycling in industrial society He also provides a historical perspective on contemporary sustainable design practices Along the way he challenges common assumptions about upcycling's merits and adds a new dimension to recycling as a form of environmental absolution for the waste related sins of the modern world Raising fascinating questions of consumption environment and desire Upcycling Aluminum is for anyone interested in industrial and environmental history discard studies engineering product design music history or antiques

Under the Wire David Paull NICKLES,David Paull Nickles,2009-06-30 How did the telegraph a new and revolutionary form of communication affect diplomats who tended to resist change In a study based on impressive multinational research David Paull Nickles examines the critical impact of the telegraph on the diplomacy of the nineteenth and early twentieth centuries Case studies in crisis diplomacy the War of 1812 the Trent affair during the U S Civil War and the famous 1917 Zimmermann telegram introduce wide ranging thematic discussions on the autonomy of diplomats the effects of increased speed on decision making and public opinion the neglected role of clerks in diplomacy and the issues of expense garbled text espionage and technophobia that initially made foreign ministries wary of telegraphy Ultimately the introduction of the telegraph contributed to the centralization of foreign ministries and the rising importance of signals intelligence The faster pace of diplomatic disputes invited more emotional decisions by statesmen while public opinion often exercised a belligerent influence on crises developing over a shorter time period Under the Wire offers a fascinating new perspective on the culture of diplomacy and the social history of technology Table of Contents Introduction I Control 1 The Anglo American Crisis of 1812 2 Diplomatic Autonomy and Telecommunications II Speed 3 The Trent Affair 4 Speed and Diplomacy 5 Diplomatic Time

Acknowledgments Index Reviews of this book David Paull Nickles has plumbed the archives of four countries to determine just how transformative the invention of the telegraph really was Under the Wire is a subtle and impressive examination of history Christian D Brose Wall Street Journal In this study of the impact of telegraphy on the management of international relations the reader is rewarded time and again by finding original observations regarding familiar events This is a book that can have a shaping effect not only on the field of international relations but on many others since it compels one to think hard about how changes in technology affect behavior and thought among groups with deeply rooted traditions and beliefs Ernest R May Harvard University *Threats and Promises* James W. Davis,2000-08 In this work the author works towards a theory of influence in international politics that recognizes the power of promises and assurances as tools of statecraft He offers an analytic treatment drawing on international relations theory deterrence theory and cognitive and social psychology Building on prospect theory from cognitive psychology he develops a testable theory of influence that suggests promises are most effective when potential aggressors are motivated by a desire to avoid loss Davis then considers a series of case studies drawn principally from German diplomatic relations in the later 19th century and early 20th century From the case studies which focus on such issues as European stability colonial competition and the outbreak of World War I Davis shows how a blending of threats and promises according to reasoned principles can lead to a new system of more creative statecraft

Before the Holocaust Hermann Beck,2022-07-28 As the Nazis staged their takeover in 1933 instances of antisemitic violence began to soar While previous historical research assumed that this violence happened much later Hermann Beck counteracts this drawing on sources from twenty German archives and focussing on this early violence and on the reaction of German institutions and the elites who led them Before the Holocaust examines the antisemitic violence experienced in this period from boycotts violent attacks robbery extortion abductions and humiliating pillory marches to grievous bodily harm and murder which has hitherto not been adequately recognized Beck then analyses the reactions of those institutions that still had the capacity to protest against Nazi attacks and legislative measures the Protestant Church the Catholic Church the bureaucracies and Hitler s conservative coalition partner the DNVP and the mindset of the elites who led them to determine their various responses to flagrant antisemitic abuses Individual protests against violent attacks the April boycott and Nazi legislative measures were already hazardous in March and April 1933 but established institutions in the German State and society were still able to voice their concerns and raise objections By doing so they might have stopped or at least postponed a radicalization that eventually led to the pogrom of 1938 Kristallnacht and the Holocaust German Naval Strategy, 1856-1888 David H. Olivier,2004-08-26 This book is a comparative study of the evolution of the German navy in the second half of the nineteenth century It examines the development of strategy especially commerce raiding in comparison to what other navies were doing in this era of rapid technological change It is not an insular history merely listing ship rosters or

specific events it is a history of the German navy in relation to its potential foes It is also a look at a new military institution involved in an inter service rivalry for funds technology and manpower with the prestigious and well established army
