Bison Hunting At Cooper Site Where Lightning Bolts Drew Thundering Herds:

Bison Hunting at Cooper Site Leland C. Bement, Brian J. Carter, 1999 The Cooper site discovered in 1922 in northwestern Oklahoma is one of the largest bison kill sites in the southern plains It has yielded major contributions to what is known about Paleoindian people at the end of the last ice age This book outlines the history of the Cooper site its discovery

Bison Hunting at Cooper Site Paul Allen Zoch, Leland C. Bement, Brian J. Carter, 1999 Almost seventy years ago the first Folsom projectile point found in association with ancient bison bones in northern New Mexico demonstrated that Paleoindian people were in the New World as long ago as the end of the last ice age To this day intact deposits containing Folsom points are rare yet these points with their distinctive channel flakes and exquisite craftsmanship remain the best identifier of the culture The Cooper site discovered in 1992 in northwestern Oklahoma is among the largest Folsom age kill sites in the southern plains Including extraordinarily well preserved bison bones and thirty three projectile points the site has yielded major contributions to what is known of this early people Leland C Bement outlines the history of the Cooper site its discovery and excavation As the remains were found in stratified bonebeds they provide the first clear traces of sequential Folsom activity Analysis of the bones indicates a selective or gourmet butchering technique and offers insights into bison herd demographics Assessment of the projectile points suggests the movements of Folsom groups in relation to lithic sources Here also is the first evidence of Folsom hunting ritual in the form of a startling red zigzag painted on one of the skulls The painted skull the oldest design painted object in North America greatly enlarges the significance of the Cooper site offering evidence of early ritual rarely seen in the tangible physical record

Thunder and Herds Lawrence L Loendorf, 2016-07-22 This volume is the first summary and synthesis of the rock art of the American High Plains from Archaic times to the historic period linked to holistic archaeological research in the region

Survival by Hunting George Frison, 2004-08-11 The North American Great Plains and Rocky Mountains have yielded many artifacts and other clues about the prehistoric people who once lived there but little is understood about the hunting practices that ensured their survival for thousands of years Noted archaeologist George Frison brings a lifetime of experience as a hunter rancher and guide to bear on excavation data from the region relating to hunting illuminating prehistoric hunting practices in entirely new ways Sharing his intimate knowledge of animal habitats and behavior and his familiarity with hunting strategies and techniques Frison argues that this kind of firsthand knowledge is crucial for understanding hunting in the past

Holy Ground, Healing Water Donald J.

Blakeslee, 2010 Most people would not consider north central Kansas Waconda Lake to be extraordinary The lake completed in 1969 by the federal Bureau of Reclamation for flood control irrigation and water supply purposes sits amid a region known when it is thought of at all for agriculture and perhaps to a few as the home of The World's Largest Ball of Twine in nearby Cawker City Yet to the native people living in this region in the centuries before Anglo incursion this was a place of great spiritual power and mystic significance Waconda Spring now beneath the waters of the lake was held as sacred a place

where connection with the spirit world was possible Nearby a giant snake symbol carved into the earth by native peoples likely the ancestors of today's Wichitas signified a similar place of reverence and totemic power All that began to change on July 6 1870 when Charles DeRudio an officer in the 7th U S Cavalry who had served with George Armstrong Custer purchased a tract on the north bank of the Solomon River a tract that included Waconda Spring DeRudio had little regard for the sacred properties of his acrea instead he viewed the mineral spring as a way to make money In Holy Ground Healing Water Cultural Landscapes at Waconda Springs Kansas anthropologist Donald J Blakeslee traces the usage and attendant meanings of this area beginning with prehistoric sites dating between AD 1000 and 1250 and continuing to the present day Addressing all the sites at Waconda Lake regardless of age or cultural affiliation Blakeslee tells a dramatic story that looks back from the humdrum present through the romantic haze of the nineteenth century to an older landscape one that is more wonderful by far than what the modern imagination can conceive It Happened in Oklahoma Robert L.

Dorman,2019-05-17 This book offers an inside look at over 30 interesting and unusual episodes that shaped the history of the Sooner State Read all about the Trail of Tears in Tahlequah Find out why George W McLaurin was denied admission to the University of Oklahoma in 1950 Try to solve the mystery of Karen Silkwood's suspicious death in 1974 **Folsom** David J. Meltzer,2006-06-05 In the late 1920s an exciting discovery was made at the New Mexico site of Folsom spear points found embedded between the ribs of an Iron Age bison that was to resolve decades of bitter conflict amongst archaeologists

New Perspectives on Old Stones Stephen Lycett,Parth Chauhan,2010-09-05 As the study of Palaeolithic technologies moves towards a more analytical approach it is necessary to determine a consistent procedural framework The contributions to this timely and comprehensive volume do just that This volume incorporates a broad chronological and geographical range of Palaeolithic material from the Lower to Upper Palaeolithic The focus of this volume is to provide an analysis of Palaeolithic technologies from a quantitative empirical perspective As new techniques particularly quantitative methods for analyzing Palaeolithic technologies gain popularity this work provides case studies showcasing these new techniques Employing diverse case studies and utilizing multivariate approaches morphometrics model based approaches phylogenetics cultural transmission studies and experimentation this volume provides insights from international contributors at the forefront of recent methodological advances **Toward a Behavioral Ecology of Lithic Technology** Todd A. Surovell,2012-11-01

Modern humans and their hominid ancestors relied on chipped stone technology for well over two million years and colonized more than 99 percent of the Earth's habitable landmass in doing so Yet there currently exist only a handful of informal models derived from ethnographic observation experiments engineering and common sense to explain variability in archaeological lithic assemblages Because the fundamental processes of making using and discarding stone tools are at root exercises in problem solving Todd Surovell asks what conditions favor certain technological solutions Whether asking if a biface should be made thick or thin or if a flake should be saved or discarded Surovell seeks answers that extend beyond a

case by case analysis One avenue for addressing these questions theoretically is formal mathematical modeling Here Surovell constructs a series of models designed to link environmental variability to human decision making as it pertains to lithic technology To test the models Surovell uses data from the analysis of more than 40 000 artifacts from five Rocky Mountain and Northern Plains Folsom and Goshen complex archaeological sites dating to the Younger Dryas stadial ca 12 600 11 500 years BP The primary result is the production of powerful new analytical tools useful to the interpretation of archaeological assemblages Surovell s goal is to promote modeling and explore the general issues governing technological decisions In this light his models can be applied to any context in which stone tools are made and used *Hunter-Gatherer Behavior* Metin I Eren,2016-05-23 This volume addresses key questions regarding the extent of the Younger Dryas climate event at the end of the Pleistocene and how hunter gatherer populations worldwide adapted behaviorally and technologically in the face of major climatic change **Designing Experimental Research in Archaeology** Jeffrey R. Ferguson,2010-05-15 Each chapter addresses a particular classification of material culture ceramics stone tools perishable materials composite hunting technology butchering practices and bone tools and experimental zooarchaeology detailing issues that must be considered in the development of experimental archaeology projects and discussing potential pitfalls The experiments follow coherent and consistent research designs and procedures that are given theoretical context Contributors outline methods that will serve as a guide in future experiments This degree of standardization is uncommon in traditional archaeological research but is essential to experimental archaeology **Archaeological Narratives of the North American Great Plains** Sarah J. Trabert,Kacy L. Hollenback,2021-08-12 Stretching from Canada to Texas and the foothills of the Rockies to the Mississippi River the North American Great Plains have a complex and ancient history The region has been home to Native peoples for at least 16 000 years This volume is a synthesis of what is known about the Great Plains from an archaeological perspective but it also highlights Indigenous knowledge viewpoints and concerns for a more holistic understanding of both ancient and more recent pasts Written for readers unfamiliar with archaeology in the region the book in the SAA Press Current Perspectives Series emphasizes connections between past peoples and contemporary Indigenous nations highlighting not only the history of the area but also new theoretical understandings that move beyond culture history This overview illustrates the importance of the Plains in studies of exchange migration conflict and sacred landscapes as well as contact and colonialism in North America In addition the volume includes considerations of federal policies and legislation as well as Indigenous social movements and protests over the last hundred years so that archaeologists can better situate Indigenous heritage contemporary Indigenous concerns and lasting legacies of colonialism today *Arkansas* Jeannie M. Whayne,Thomas A. DeBlack,George Sabo,Morris S. Arnold,2013-06-01 *Arkansas A Narrative History* is a comprehensive history of the state that has been invaluable to students and the general public since its original publication Four distinguished scholars cover prehistoric Arkansas the colonial period and the nineteenth and twentieth centuries and incorporate the newest

historiography to bring the book up to date for 2012 A new chapter on Arkansas geography new material on the civil rights movement and the struggle over integration and an examination of the state s transition from a colonial economic model to participation in the global political economy are included Maps are also dramatically enhanced and supplemental teaching materials are available No less than the first edition this revision of Arkansas A Narrative History is a compelling introduction for those who know little about the state and an insightful survey for others who wish to enrich their acquaintance with the Arkansas past Ben Johnson from the Foreword

The Oxford Handbook of the Archaeology and Anthropology of Hunter-Gatherers Vicki Cummings,Peter Jordan,Marek Zvelebil,2014-04-24 For more than a century the study of hunting and gathering societies has been central to the development of both archaeology and anthropology as academic disciplines and has also generated widespread public interest and debate The Oxford Handbook of the Archaeology and Anthropology of Hunter Gatherers provides a comprehensive review of hunter gatherer studies to date including critical engagements with older debates new theoretical perspectives and renewed obligations for greater engagement between researchers and indigenous communities Chapters provide in depth archaeological historical and anthropological case studies and examine far reaching questions about human social relations attitudes to technology ecology and management of resources and the environment as well as issues of diet health and gender relations all central topics in hunter gatherer research but also themes that have great relevance for modern global society and its future challenges The Handbook also provides a strategic vision for how the integration of new methods approaches and study regions can ensure that future research into the archaeology and anthropology of hunter gatherers will continue to deliver penetrating insights into the factors that underlie all human diversity

Decolonizing the Diet Gideon Mailer,Nicola Hale,2018-03-22 Decolonizing the Diet challenges the common claim that Native American communities were decimated after 1492 because they lived in Virgin Soils that were biologically distinct from those in the Old World Comparing the European transition from Paleolithic hunting and gathering with Native American subsistence strategies before and after 1492 the book offers a new way of understanding the link between biology ecology and history Synthesizing the latest work in the science of nutrition immunity and evolutionary genetics with cutting edge scholarship on the history of indigenous North America Decolonizing the Diet highlights a fundamental model of human demographic destruction human populations have been able to recover from mass epidemics within a century whatever their genetic heritage They fail to recover from epidemics when their ability to hunt gather and farm nutritionally dense plants and animals is diminished by war colonization and cultural destruction The history of Native America before and after 1492 clearly shows that biological immunity is contingent on historical context not least in relation to the protection or destruction of long evolved nutritional building blocks that underlie human immunity **First**
