 Timely NET coverage BizTalk Server 2000 is an integral member of Microsoft s net Enterprise Server suite BizTalk James G. Kobielus,2001 BizTalk Microsoft s strategic e Commerce initiative enables companies and industries to develop and evolve sophisticated e marketplaces far more easily than ever before In this authoritative book renowned e business consultant James Kobielus walks you through every issue associated with BizTalk deployment business and technical He introduces the fundamentals of BizTalk what it is who supports and oversees it the value it adds to B2B e Commerce and the current status of BizTalk compliant products and services Next he reviews anticipated BizTalk applications in B2B e Commerce to be based on Microsoft s BizTalk Server 2000 BizTalk Implementing Business to Business E Commerce outlines three common BizTalk scenarios hubbed marketplace integration that integrates your internal business processes indirectly via external trading hubs and exchanges extranet supply chain integration that your internal business processes directly with trading partners and enterprise application integration integrating internal back end business applications with your e Commerce site The book reviews commercial BizTalk enabled products and services and Microsoft s strategy for rolling out BizTalk enabled offerings both as server based software and as portal based services It introduces Microsoft s BizTalk Server 2000 product roadmap shows how BizTalk Server integrates with Windows 2000 Active Directory and COM and demonstrates how it utilizes XML technologies including XSLT XML schemas and namespaces Interorganizational Workflow Management Karin Pargfrieder,2002-05-30 Inhaltsangabe Abstract Conventional workflow management focuses on improving the efficiency of business processes within one organization However processes should not only be supported within the enterprise but also when crossing organizational boundaries e g in order to support new forms of collaborations as virtual enterprises Due to the different nature of interorganizational workflows conventional workflow technology cannot be directly applied The most important requirement specific to interorganizational workflow systems is obviously that they are able to deal with heterogeneity and that it is not too expensive to achieve interoperability Also maintaining the privacy of internal processes is a major concern and security issues should be addressed This diploma thesis gives an introduction to conventional and interorganizational workflow management their aspects and concepts It elaborates the requirements relevant for interorganizational workflow systems describes the most important approaches projects and initiatives that currently exist in the area of interorganizational workflows including XML based approaches the standards of the WfMC electronic marketplaces and electronic contracting An evaluation of these approaches based on criteria derived from the requirements and other characteristics shows the differing strengths and weaknesses The XML based approaches provide standards for the process interfaces and can cope with heterogeneous environments very well Some of them even allow spontaneous commerce with new trading partners without custom integration Traditional EDI is in principle similar but has many disadvantages The standards of the WfMC enable integration with a very low effort if they are followed by software

providers But privacy and security are potential problem areas and the models of interoperability that realistically can be supported are simple Electronic marketplaces and electronic contracting are ideal if a high number of business partners has to be supported and the services are chosen dynamically depending on the situation But these services have to be comparable with rather simple interfaces Inhaltsverzeichnis Table of Contents 1 Introduction1 2 Workflow Management4 2 1Requirements on WfMSs6 2 2Workflow Modeling8 2 2 1The Functional Aspect Workflows and Activities8 2 2 2The Operational Aspect Applications9 2 2 3The Behavioral Aspect Control Flow10 2 2 4The Informational
