Bl Historic Lives Queen Elizabeth I:

Courting the Virgin Queen Carol Ann Lloyd, 2024-08-30 Examines Queen Elizabeth I's complex courtships revealing how her romantic and political decisions shaped her reign as England's Virgin Queen. The many courtships of the woman who became Elizabeth I began when she was an infant displayed before foreign ambassadors who considered her as a possible clause of a contract between England and France. From such an unromantic beginning Elizabeth grew to see her father marry multiple times and experienced frequent changes in stepmothers and status in the family. Eventually she became the most eligible woman in Europe. From start to finish her marriage prospects were as much political as they were personal. When she came to the throne in 1558 the primary question facing everyone from foreign monarchs to English nobles and ministers was which of her many suitors would finally win her hand. Through the longest Tudor reign Elizabeth used courtship as a tool to consider foreign alliances, hold ambitious English courtiers in check and navigate her role as a woman ruler in a world that considered her unnatural without a man at her side. Elizabeth was in fact always the Virgin Queen from the early days as a twenty-five-year-old presenting herself as a potential royal bride to her final years as an ageing and unmarried woman who was destined to end the Tudor dynasty. Ultimately she became the only monarch in England to rule as an adult and never marry. Through it all as friends and potential lovers faded away she clung to the one true love of her life: England.

Women and Epistolary Agency in Early Modern Culture, 1450-1690 James Daybell, Andrew Gordon, 2016-06-10 Women and Epistolary Agency in Early Modern Culture 1450-1690 is the first collection to examine the gendered nature of women's letter writing in England and Ireland from the late fifteenth century through to the Restoration. The essays collected here represent an important body of new work by a group of international scholars who together look to reorient the study of women's letters in the contexts of early modern culture. The volume builds upon recent approaches to the letter both rhetorical and material that have the power to transform the ways in which we understand study and situate early modern women's letter writing, challenging misconceptions of women's letters as intrinsically private, domestic and apolitical. The essays in the volume embrace a range of interdisciplinary approaches: historical, literary, palaeographic, linguistic, material and gender-based. Contributors deal with a variety of issues related to early modern women's correspondence in England and Ireland. These include women's rhetorical and persuasive skills and the importance of gendered epistolary strategies; gender and the materiality of the letter as a physical form; female agency, education, knowledge and power; epistolary networks and communication technologies. In this volume the study of women's letters is not confined to writings by women: contributors here examine not only the collaborative nature of some letter writing but also explore how men addressed women in their correspondence as well as some rich examples of how women were constructed in and through the letters of men. As a whole the book stands as a valuable reassessment of the complex gendered nature of early modern women's correspondence.
